COMPEX PREVIEW

November 10, 1983 Number 886 35p

BARRON . . . "We see it as a component for a lot of Alvey activities."

## Inmos plays its trump card

by Philip Hunter

**Inmos**, the UK state-owned semiconductor company, last Tuesday unveiled a prototype of its much talked about transputer, a single chip which combines a processor, memory and communications.

Managing director Iann Barron hopes that the transputer will figure prominently in the government's Alvey programme to develop a Fifth Generation of computers.

"We do see it as a component for a lot of Alvey activities," he says.

As expected, the chip is 32-bit, and will process 10 million instructions a second, which is almost 10

times faster than conventional 32-bit chips recently unveiled by US companies such as National Semiconductor.

The processor does not support the Unix or Concurrent CP/M operating systems, but instead offers Ocean, an assembly language developed by Inmos which also works as an operating system and can be used as a high level language.

The transputer has for several months been dangled as a carrot to potential chip investors, and Barron hopes soon to announce new finance to boost further development and marketing. The government has refused to put up any more cash.

But BT will not be able to cross-subsidise its own services. For example, BT will not be able to subsidise equipment supply with revenue from its network business. This is supposed to make it easier for telecoms manufacturers to compete in the market for subscriber equipment. In fact BT has supplied this market for so long it will be difficult for manufacturers to compete directly.

BT itself has one reservation about the licence – it must allow competitors to hook up to its network. According to BT this will affect its ability to modernise the network.

BT will have to keep increases in

rental and local calls below the level of inflation for five years after privatisation.

But POOUNG (Post Office Engineering Union) has issued a statement that BT will operate on its privatised future.

It includes BT's obligations to provide a comprehensive telephone service, such as public call boxes, rural services and 999 calls. And it lists restrictions to prevent a privatised BT abusing its position as a monopoly.

BT will be able to make access charges to other networks like private telecoms company Mercury and the Hull telephone service to help pay for uneconomic services.

But BT will not be able to cross-

## DEC puts power of a Vax on a micro

by John Riley

DIGITAL Equipment is to put the power of a Vax on a micro.

The new 32-bit micro, the MicroVAX 1, is scheduled for US deliveries next March and DEC claims that it will deliver the power of a Vax 11/730.

The company has rushed forward a series of hardware and software products to offset the news of its dramatic drop in profit for the first quarter of its financial year and the sharp decline in its share price (a drop of \$32 in the last week).

DEC announced another new Vax machine, the Vax 11/75; and details about software additions to the Vax family, including Unix and a Pascal development system.

The MicroVAX 1, which supports up to four users, combines VLSI and off-the-shelf chip technology, and is fully compatible with VMS, the Vax operating system. It runs MicroVMS, a version of VMS.

The MicroVAX 1 will be available in the US in March 1984, and a basic configuration comprising CPU, 512 Kbytes of RAM, two 400 Kbyte floppy drives, two TUS5 tape cartridge drives and VMS software licence, is \$24,950.

■ Further DEC software releases – page 15

## BT spends £350m to speed up System X

by Donald Kennett

BRITISH Telecom is to spend £350 million with UK suppliers to almost double the speed of its planned installation of System X, its digital telephone exchanges.

The corporation is to boost the installation of local exchanges to 3.2 million lines by the end of 1986, instead of the planned 1 million.

And it will be putting out orders worth around £350 million for trunk and local exchanges to the two System X suppliers, GEC and Plessey, to accelerate its

planned installations.

Annotating the move at Telecom 83 in Geneva, BT technology director John Alvey said: "British Telecom wants digital service on there as fast as it can get them."

The orders had not been placed

as an attempt to stimulate the export market, he said, although System X was likely to sell well abroad from a strong home market.

He also denied reports that BT had been on the point of going to Sweden's LM Ericsson for the extra 750,000 digital lines.

"System X is very competitive," he said. "One of the reasons we're talking to people like Ericsson is because we like to know what their costs are."

"We know what their costs are, we've bought several major systems from them. They've been talking to us for 12 years, they're great marketing people."

"Non-British hardware accounts for 5% of our expenditure today. It will be 7% in a couple of years, including nails, wire and

telephone poles we spend £1.75 billion a year, 95% of it in the UK. I'd be a very naive procurement man if I guaranteed to my suppliers what I was going to buy from them."

"I'm saying: 'You perform and that's what the market is. If you get it wrong, alternatives are feasible.'

The ordering programme has been stepped up because System X has now been proven in service and because there has been a dramatic reduction in its cost per line – by a factor of three, according to Alvey. The line card was one major element, the cost of which has been cut and the processor was another.

"We have now moved on to second generation technology," he said, said. "The first exchange

is being built in the new processor, Connex Spars trunk exchange, which was put into service two weeks ago. It is a 16-line Erlang (calls per hour) exchange. Eventually it will be 4,000."

Alvey said: "System X is competitive."

according to the latest survey from the European Computing Services Association.

The recession may not be over, but jobs in the data processing industry are on the increase.

In a bid to reduce the shortfall of skilled computer staff, the Manpower Services Commission has just announced plans to move away from training school leavers on its Careers Register – the service offered to companies to take much of the legwork out of the annual milk round of graduate recruitment.

The MSC's "Open Technology" scheme aims to provide adults – both in and out of work – with low interest loans to pay for re-training in new skills.

"More companies are looking for trainees now," said Alan Lewis of the NCC's Careers Projects Scheme. "The demand for good people is increasing, and it's not just experienced people in demand."

The £200 million spent on Taps can be used more effectively," said a spokesman for the MSC. "We aim to reduce the 61,000 people currently on the scheme in 1984/85 next year, enabling 25,000 or so to benefit from open tech.

"Over the past three to four months the number of vacancies has gone up noticeably, and we're

placing people at the same rate as '77 and '78 – which was 70%."

This rate has not been matched by Taps trainees. The poor level of placement courses, along with substantial changes to both course content and the criteria by which training providers are judged,

led to a major re-think on the part of the MSC.

A critical report on the

shortcomings of Taps by MSC's ex-head of computer training, Hugh Sharp, called for the scrapping of operating and data preparation courses, along with substantial changes to both course content and the criteria by which training providers are judged.

But the main short-coming is the same – it is not the recession which is holding up business development – it is the shortage of experienced staff.

Under the aegis of Sharp's re-

placement, John Collins, the

## Licence tells how private BT will work

by Nuala Moran

THE government last week published the draft licence setting out how British Telecom will operate in its privatised future.

It includes BT's obligations to provide a comprehensive telephone service, such as public call boxes, rural services and 999 calls. And it lists restrictions to prevent a privatised BT abusing its position as a monopoly.

BT will be able to make access charges to other networks like private telecoms company Mercury and the Hull telephone service to help pay for uneconomic services.

But BT will not be able to cross-

subsidise its own services. For example, BT will not be able to subsidise equipment supply with revenue from its network business.

This is supposed to make it easier for telecoms manufacturers to compete in the market for subscriber equipment. In fact BT has supplied this market for so long it will be difficult for manufacturers to compete directly.

The unions are also dissatisfied with this assurance. BTUG, the union of engineers in front of cable London, bringing them from a field as Bristol and Birmingham on Thursday.

Mercury launched an appeal on Monday against the high court ruling that it cannot have an injunction to stop the POEU refusing to interconnect to the BT network.

BT action against Mercury

## Topics covered in this issue

### Wales and the West Country

Although traditional industries are in decline in west as part of the worldwide recession, the computer industry is expanding. Find out more as Jacqueline Moore discovers that there's a welcome in the hillsides for computer staff with skill and experience.

Page 66

### Management

The data processing environment is changing. But do data processing managers face up to the uncertain future with fear or uncertainty? Ted Cluff, the secretary-general of the Institute of Data Processing Management, thinks that data processing managers are better placed than anybody to meet the challenge.

## CUSTOMER SUPPORT- Share in WANG's brilliant future

Many top software specialists have already joined WANG from other leading manufacturers and major software houses. They've been attracted by:

GROWTH – the sheer excitement of working for one of the most successful computer companies in Britain. Last year alone, turnover increased by a massive 65%.

PRODUCTS & SYSTEMS – the challenge of the 'state-of-the-art' in office automation based on WANG's six technology strategies – data, word, voice and image processing, networking, and human factors.

Rewards – reflecting WANG's policy of attracting and retaining people of the highest ability.

PROSPECTS – second-to-none in the industry, with individual development and training programmes to ensure rapid progress.

Instructors

London

£9K inc. London allowance

Following the success of our new WP systems and the Professional Computer, we will shortly be opening a new central London training facility. Instructors are needed to teach a range of WP and QLs courses. Aged 25 plus, you will need relevant customer support or educational experience.

WANG offers an attractive benefits package including HUPA, pension, free life assurance, and Stock Purchase Scheme. Relocation assistance may be available.

Please send full CV or write or telephone for an application form to: Christine Townsend, WANG U.K. Limited, WANG House, 161 London Road, Isleworth, Middlesex, Tel: 01-569 4151.

**SUCCESS...IT'S IN THE BAG  
WITH SAINSBURY'S**

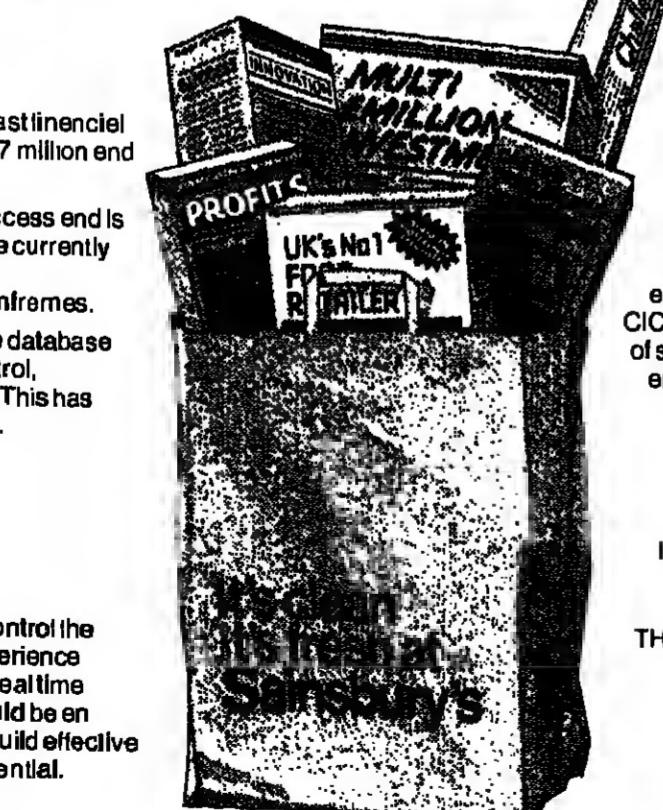

Sainsbury's is the UK's leading food retailer. In our last financial year sales increased 17%, profit was up 20% to £107 million and we created an additional 3,300 jobs.

Our Systems Department is vital to our on-going success and is rapidly expanding to satisfy business growth. We are currently changing from ICL to IBM hardware and our present configuration comprises IBM 3033 and Atlas 10 mainframes. We have a major commitment to a significant on-line database systems programme covering distributed stock control, purchasing and management information systems. This has created the following attractive career opportunities.

**System Team Leaders**  
**up to £15,000**

Responsibility will be to plan, organise, direct and control the activities of a systems development team. Your experience should include designing commercial systems in a real time environment utilising CICS. Knowledge of DL/1 would be an advantage. Self motivation, drive and the ability to build effective working relationships with user management is essential.

- For all posts, excellent benefits include:
- \* interest free season ticket loan, after six weeks
  - \* subsidised restaurant
  - \* profit sharing after 2 years' service
  - \* share option scheme after 3 years' service
  - \* pension scheme
  - \* relocation assistance, where appropriate

**SAINSBURY'S****Senior Analysts/Analysts**  
**up to £13,500**

Responsibility will be to investigate, design and implement new systems. Experience must have been gained with commercial applications in an IBM environment and a practical knowledge of CICS and DL/1 would be an advantage. Familiarity with each stage of systems development is necessary as is the capacity to prepare and present management reports. Effective communication with systems staff and user departments is essential.

**Analyst Programmers**  
**up to £11,500**

Initially to be responsible for the sophisticated ordering systems for branches (currently on ICL hardware) and for their redevelopment onto IBM mainframes.

THE POSTS OFFER THE OPPORTUNITY TO GAIN VALUABLE EXPERIENCE ON IBM HARDWARE FOR WHICH FULL TRAINING WILL BE PROVIDED.

At least 3 years' experience on ICL 2900 series using COBOL and VMEB is essential. Some analysis experience would be an advantage.

Interested in joining in our success then please telephone Lorraine Catherides on 01-921 6047 for an application form or to arrange an informal discussion with our Systems Managers.

Alternatively please forward a detailed c.v. to heral J. Sainsbury plc, Wakefield House, Stamford Street, London SE1.

**Computer Professionals****Customer Engineers****London Area****£9-£10K + car**

Our client has an established range of business, contract and non-computer based systems. The requirement is for CE's with one to two years' experience of hard disc based systems looking for a position with real scope to achieve technical satisfaction and rapid promotion. Applicants need a good understanding of Customer Relations.

Ref. 1011 F

**Design Engineers****South and North London****£8-£12K**

Highly successful British manufacturer of single and multi-axis robots has vacancies for talented engineers with at least one year's design experience of microprocessor based products using the latest chip technologies. Knowledge of operating systems, networks and communications techniques advantageous.

Ref. 1011 G

**Senior Analyst/Programmer****Central London****Up to £14K**

Highly successful systems organisation needs several embryo consultants to work on implementation projects. Above average skills are sought for the above average rewards and opportunities for career progression that are offered.

Ref. 1011 H

**Sales Support****London and West****£11-£14K + car**

Experienced systems engineers accustomed to providing software support, who understand pre-sales work and have knowledge of advanced applications such as COBOL, Office Automation and Transaction Processing can be offered excellent career prospects. We have several clients with vacancies for candidates of the right calibre.

Ref. 1011 I

**Real Time Applications****Surrey Border****Up to £17K**

The systems house is seeking computer professionals capable of responding to a variety of technical challenges. Analysis, Analyst Programmer, with design and then conversion experience of defence, information and industrial time applications, as well as a degree of interest. Familiarity with APL and/or Fortran, Pascal, COBOL, PL/I and/or assembler language, with knowledge of one or more of these languages desirable.

Ref. 1011 J

**(Some European Travel)****£10-£14K + car**

A well-established supplier of packaged software for the IBM 3030 computer, is seeking a dedicated professional to provide technical support and education services to customers and distributors in the UK and Europe. Candidates must have in-depth experience of IBM 3030 hardware and familiarity with programming productivity packages available.

Ref. 1011 K

**System 34/38 Analyst/Programmers****West London/Surrey****£10-£17K**

We have several clients with vacancies for IBM 34/38 specialists. Knowledge of MAPLES or COPICS together with RPG programming skills is the basic requirement. Candidates with the appropriate personal qualities, including mobility and motivation, will be considered for consideration for posts.

Ref. 1011 L

**Systems & Programming Permanent Vacancies****Systems Analysts****c £10,500****South Herts**

A high technology manufacturing environment needs to be complemented by advanced Data Processing services. Our client is currently engaged in the development of systems to provide advanced information services for a wide range of related application areas.

They operate an IBM 4341 making extensive use of CICS and DL1 with VM and have established links to other IBM mainframes in the UK. They are now seeking additional Systems Analysts to play a major part in this challenging development area with involvement in all levels of System activity working in a project team environment.

Candidates should have experience in the following:

- \* 2 years + Systems Analysis and Design
- \* Manufacturing applications preferred
- \* IBM on-line systems will be of interest

The company offers a wide range of benefits including Pension and Life Assurance schemes, five weeks holiday, sports and social club on site, a subsidised restaurant and relocation assistance. Find out more - contact Knight 01-491 4706 quoting ref. YY301.

Alternatively telephone 01-845 4945 evenings and weekend.

**OPPORTUNITIES AT A DIFFERENT LEVEL****RPG PROGRAMMERS ON-LINE DEVELOPMENT TO £12,000PA**

Continuing expansion of the development workload at Everest Double Glazing means continuing opportunities for top flight RPG programmers to climb even higher.

Major new on-line systems on a powerful WANG VS100 machine, supporting a growing telecommunications network provide the challenging environment for people from Junior Programmers up to Team Leaders to really make a name for themselves.

Good programming skills are a pre-requisite, but any additional experience of analysis/design, or for the senior positions, team leadership would be an added advantage. An excellent on-going training programme and the opportunity to develop analysis techniques will further enhance your career opportunities in an expanding department.

Everest Double Glazing, part of the RTZ Group, are the acknowledged market leaders in their field, with a quite unprecedented record of growth and business development.

They are situated in rural Hertfordshire with good communications to surrounding areas and the excellent benefits package (including regular merit reviews and bi-annual bonuses) will be supported by relocation expenses if appropriate.

So if you really want to climb, telephone now or post the coupon and we will forward an Application Form and comprehensive Company Profile.

**Programmers**

Make a move into Software Support with a leading minicomputer manufacturer

**N.W. London****c £10,000 + Car**

Datapoint Corporation is a leader in the manufacture of minicomputers, office automation and distributed processing systems with a world-wide user base of 40,000 systems.

As a subsidiary, Datapoint (UK) Limited has installed 150 local area networks (LANs) throughout the UK and the company has maintained an exciting and profitable expansion over the past six years. At the heart of the company's operation is the Software and Communications Support group, engaged in a variety of essential activities including:

- \* Support of systems software products
- \* Development and support of communications software
- \* Evaluation of new software products
- \* Trouble shooting

As a Programmer within this group, you will enjoy working in an informal but professional atmosphere with many diverse responsibilities.

Candidates should be able to demonstrate a high degree of initiative and self motivation and experience in some of the following areas will be an advantage (but not mandatory):

- \* Low level language programming
- \* Communications knowledge
- \* Minicomputer systems software
- \* Datapoint systems

Datapoint (UK) Limited will present you with the opportunity to develop your own skills, offering excellent prospects for career advancement within an international organisation at the forefront of its field. We would also be interested in hearing from you if you are an Applications Programmer or Hardware Technical Support Engineer.

Find out more - contact Knight 01-491 4706 quoting ref. YY300. Alternatively telephone 01-845 4945 evenings and weekend.

## SOFTWARE ENGINEERS/SYSTEMS DESIGNERS

To c.£15,000

Home Counties

**CORAL    PASCAL    C    RTL2    ASSEMBLER**

We require a number of Engineers and Designers. People who can play a major part in our expansion. Important people, reporting directly to a Divisional Manager. People who can take project responsibility, control teams comprising clients and software house personnel. People who have the flexibility to travel and implement some very exciting projects with major clients. People who can adapt to different client cultures, who can define clients' problems in technical terms. People who have the diplomacy and determination to design and implement the solutions. People who have the intellect to absorb lots of experience quickly.

To these people we offer direct lines of communication to senior management and rapid career progression. To these people we offer a continued variety of quality work in communications software, command and control, industrial process control, systems programming and general scientific applications. In short a highly stimulating environment!

# Systems Programmer

c. £12K

*make the most of your potential...  
... and ours*

The Computer Services Branch is responsible for the development and maintenance of commercial, technical and scientific computing systems, with particular reference to the aviation environment. Two ICL 2968s running VME/B, GEORGE 3, and CAFS 500, are installed. DRS equipment is used exclusively in local area networks linked via an NPS to the mainframes. We are now looking for a Systems Programmer to develop and fully utilise the potential of this computing power.

Applications are invited from candidates with the following qualifications and experience:

- A degree, professional equivalent or good "A" Levels
- One or more years' VME base experience
- Knowledge of ICL superstructure products
- DRS experience.

Experience of the following would be advantageous:

- IDMS-X
- TPMS
- Mini-computers
- Communications (ICL, IBM, LANs)
- CP/M.

We offer:

- an excellent salary
- good career prospects
- training, both technical and managerial
- excellent pension scheme
- good annual leave allowance
- interest-free season ticket loan
- LVS

For a confidential technical discussion telephone 01-379 7311 ext. 2887. Alternatively, send a brief career history or telephone for an application form to Michele Owens, Personnel Branch, Civil Aviation Authority, Room T1219, CAA House, 45-69 Kingsway, London WC2B 6TE. Tel. 01-379 7311 ext. 2883.

The Civil Aviation Authority regulates civil aviation in the UK and provides air traffic control for all air traffic into, over and out of UK airspace.

# MANAGEMENT INFORMATION SERVICES

*Expanding operation: West London and Milton Keynes*

### TECHNICAL ANALYST

#### - BASED MILTON KEYNES

To work within the Technical Support Group at the Management Information Systems Data Centre at Milton Keynes on the support of system software for B6/7000 mainframes. We are looking for a Computer Science graduate with experience of Burroughs large systems who can operate on-call support to the Data Centre out of normal hours.

### COMPUTER OPERATORS

#### - BASED MILTON KEYNES

To work on a five day week, two-shift basis with some overtime. Experience of Burroughs hardware is required and training on large systems can be provided as necessary.

All positions offer excellent scope for involvement in a major systems development programme and can provide exceptional opportunities for career growth in a high technology environment. Salaries will amply reflect responsibility and additional benefits include contributory pension and free life assurance schemes.

Write with full c.v. to: D. H. Walker, Manager, Management Information Services, Burroughs Machines Limited, Norwood Wharf, Norwood Road, Southall, Middlesex UB2 4JA.

### SYSTEMS ANALYSTS/PROGRAMMERS

#### - BASED WEST LONDON

Within the database administration area we are looking for a specialist who will be involved in the implementation and support of both existing and new database systems including the development of back-up and security procedures, system optimisation and standards. A knowledge of Burroughs DMS II and GEMCOS is required together with some knowledge of B6/7000 systems and ALGOL or COBOL languages.

### COMMUNICATIONS SPECIALIST

#### - BASED WEST LONDON

To assist in the development, implementation and support of integrated on-line database systems. A minimum of two years' COBOL programming experience is required, ideally on Burroughs large systems, using DMS II. A degree level qualification is desirable plus an ability to communicate effectively with end-users.

**Burroughs**

# DEC/VAX

## BIRMINGHAM

Our client, a Division of one of the world's largest high-technology companies, is seeking top-class systems people with sound DEC experience to enhance their progressive Data Processing team. The successful candidates will be responsible for the development and implementation of a variety of Commercial applications. The salaries reflect the importance of these positions and the benefits are those expected from a leading international Corporation.

### PROJECT LEADER

**£613K**

In addition to a relevant qualification, the company is seeking applicants who have had at least 4 years Data Processing experience with one year in a supervisory role. A systems bias is required plus substantial programming experience. Reporting to the Data Processing Manager, you will liaise with 5 Analyst/Programmers. It is unlikely that candidates under the age of 30 will have the required experience.

### ANALYST/PROGRAMMER to £10K

You will possess the necessary ability gained as a direct result of at least 5 years DP experience. Ideally, the company requires VAX exposure; however, strong PDP-11 candidates will be considered favourably. You will also have experience of database and text processing applications as well as BASIC and/or MACHO language. This position offers genuine career progression.

Call Clare Evans on 021-455 7811 (office) 0905 350581 (home) or send full CV to Search Dynamics Limited, Edgbaston House, 3 Duchess Place, Hagley Road, Birmingham B16 8NH

## COMPUTER PROFESSIONALS

### NORTH WEST IBM 4341/2 8Mb

We are Cussons U.K., a leading manufacturer of soaps, toiletries and household freshener products, and we are seeking dynamic Computer Programmers to join our busy team on a variety of exciting projects.

The person appointed will have at least 3 years programming experience in a real time/data base environment; and have an excellent opportunity to develop their career path on the technical side of the computing spectrum.

Salary will not prove a problem to the right person, and we offer a very attractive benefits package, dependent on qualifications and experience.

To apply, please write with full curriculum vitae, stating current salary, to Mrs Anne Mobbs, Assistant Personnel Manager.

**CUSSONS**  
(U.K.) LIMITED,  
Kersal Vale, Manchester M7 0GL.

## Senior Analyst Programmer

### Development Role - Romford c. £13,500

We seek an experienced analyst/programmer who can fill a senior position within our Insurance Development project team.

Our organisation is a market leader offering a wide range of financial services to over 500,000 clients with £1.6 Bn under management. In order to maintain our current levels of customer service, a high premium is placed upon our D.P. Personnel and on-line systems running on Twin IBM 4341s.

We offer an immediate challenge to a candidate who has 5 years experience of systems analysis and programming including COBOL and CICS. Together with the opportunity to develop within a growing environment.

PROSPER**

## NEWBURY in STAINES?

### ANALYST/PROGRAMMERS to £12,000

### minis & micros or VAX 11/750

Based in Staines, Middlesex, NEWBURY DATA is forging ahead as the UK's most successful computer peripheral manufacturer. As a result of dramatic company growth we have taken a fresh look at our D.P. policy to take into account the diverse nature of our many U.K. and European user departments over financial, manufacturing and marketing application areas.

Whilst our larger systems will run on two VAX 11/750 mainframes, we wish to consider alternative, but complimentary, mini or micro-based solutions for each given requirement. We already operate NIXDORF minis and a variety of business micros, but we are not restricted by choice regarding new hardware.

Consequently we now require 3 key staff to make this dual strategy really work:

**THE NEW TEAM:** Two capable and professional ANALYST/PROGRAMMERS will initiate and form the nucleus of the "alternative systems" team. With a background in min/micro-based business applications they will demonstrate a keen commercial awareness to produce flexible, cost-effective solutions. They should be confident at all stages of a project from initial research/analysis through hardware/software feasibility studies to programming and implementation of the chosen system, always in close liaison with the user.

**VAX:** An experienced VAX ANALYST/PROGRAMMER is needed to strengthen the team. You will need in-depth BASIC programming experience within commercial applications, as well as an enthusiastic personality to fit in with the lively and very friendly department! A first class package includes contributory pension, life insurance, subsidised restaurant and relocation assistance where applicable.

For more details please contact our Recruitment Consultant JOHN GHAHAM, or send your C.V. to him at: CONQUEST RECRUITMENT, 93 Whitley Court, SL6 0UG, Berkshire SL3 0RJ. Telephone Slough 021644 (evenings and weekends 06285-21922)

### THE IBM SYSTEM 34/36/38 Recruitment Specialists

### RPG Permanent vacancies for programmers, analyst programmers and above

We invite you to contact us and discuss your career future. We will plan not only for the short term benefits but more importantly for your long term prospects, and security. Naturally you will be represented fully confidentially and representations will only be made on you behalf on the condition that you are consulted prior to the event.

Our philosophy is to help you determine the companies you want to see rather than the companies that want to see you. The decision will be based on future job security, technical development and, of course, job satisfaction.

For an informal and confidential discussion regarding your career ring Richard Millson on 01-354 1055 during office hours or on 01-958 2553 evenings and weekends. Alternatively, please send full details to us at:

MARCH COMPUTER RECRUITMENT LTD.

1 NOEL ROAD, LONDON N1 8HQ 01-354 1055

## Development Manager

### SOFTWARE/HARDWARE

#### West Yorkshire

**£19,000 + Car**

Our client, an extremely profitable privately owned company, has built up a seven figure turnover in less than four years. Specialising in the development of unique microcomputer products and customised software for specific markets, the Company is now poised for further phase of growth.

This is a challenging new position and as a key member of the senior management team you will spearhead the Company's development activities. This will include meeting clients' requirements for advanced software, peripheral design and electronic packaging as well as day to day control over sub-contractors, and overall responsibility for ongoing projects.

The ideal candidate will be 30 plus and have broad experience in Electronics or Computer Science, be a first class man manager and an original thinker. Experience of software development using micros is essential. Knowledge and experience of production techniques as applied to electronic devices would be an added advantage.

The ability and personality to represent the Company in technical discussion at a very senior level in Public and Private Sectors at home and abroad is a very important plus.

Please send curriculum vitae including current salary or phone for an application form to:

Roy Longworth,  
THE JOHN DALTON PARTNERSHIP LIMITED,  
4 Post Office Avenue,  
SOUTHPORT PR9 0JS.  
Tel: Southport (0704) 38778

## Data

### Computer Applications Engineers for three Mainframes

At a time when other companies were suffering from the effects of economic recession, our client was achieving remarkable growth from advanced product design and innovation. This thrust is continuing with many new products planned or under way. Recent teams are probing new fields in signal processing, advances in chip technology and generally focusing on new product ideas. Developments in software and electronics use the most advanced tools with a concentration on UNIX-like systems and 'C' and extensive use of M68000 processors in current products. With vast power in CAD/CAM systems readily available to engineers, very complex new PCB's are designed and in production in remarkably little time. Sales are increasing, exports are buoyant, profits are up. More talented people are needed in every area to keep pace with expansion. Salaries are in the range £10,000 to £18,000 with an emphasis about the mid-point of the range.

- \* Signal Processing Engineer
- \* L.A.N. Software Designer
- \* Project Leader X.25/PAD Products
- \* S/W Engineer SDLC/Multiplexor
- \* Bisync Protocols Specialist
- \* Group Leader, Modem Design
- \* S/W Engineer Z80/8080/6800
- \* Network Control RSX11/Pascal
- \* Multiplexor Dev. Engineer
- \* 'C' & Assembler Progs - Multiplexors
- \* Message Switch Designers S/W
- \* Technical Author

Herts based

### Op. System & Compiler Dev.

**Beds. £9K to £14K**

In the field of office automation, our client is a world leader with a range of fully compatible, high technology information processing equipment. We are seeking a hardware engineer to provide engineering support to development teams within the R&D Division. Responsibilities will include evaluation of change requests, report findings, components and sub-assemblies and reporting the results to the design authority. Successful candidates will be experienced in logic design, analogue and digital electronics, communication and self-motivation.

### Software Engineer

**Beds. £8K to £10K**

Ideally you will be degree level with technical programming experience in assembler and Pascal, or similar. Any experience with UNIX, data acquisition and logging, desk top computers, MDS's and imbedded systems in measurement and control instruments would be useful. Hardware level ability for interfacing with IEEE 488 controllers, logic analysers and test equipment rigs. Your work will cover design proposals, feasibility studies, documentation, implementation, test and verification. Excellent career prospects and relocation assistance where appropriate.

### Hardware Support Engineer

**Wtts. £13,000**

In the field of office automation, our client is a world leader with a range of fully compatible, high technology information processing equipment. The provision of a commercially widespread language like COBOL to the micro market and the addition of sophisticated development aids and friendly, interactive debug tools required top level designers and developers with initiative. New facilities with advanced personal computers at everyone's finger tips have been provided to ensure that the company can continue to attract the most talented software people available. Main skills being sought are UNIX and 'C' programming ability, technical programming on micros or minis, compiler design, assembler programming on micros or minis.

- Salary will not be a barrier to recruiting the right people.
- \* Project Leader, Compilers
  - \* 6800 Assembler Programmer
  - \* Designer - Code Generation
  - \* Compiler Support Specialist
  - \* Run-time System Specialist
  - \* COBOL Q.A. Programmer
  - \* Customer Support Programmer
  - \* S/W Technical Author
  - \* Installation Engineer
  - \* IBM VM/CMS Specialist
  - \* 'C' UNIX Enthusiasts

Berks based

## Micro Systems Software Design and Development

Enthusiasm, dedication and energy abound in this company. Small in numbers (115) with remarkable successes in overseas markets, its products are adopted by most of the household name companies in the micro-computer world. Having established its reputation with the 8 bit CP/M product range the company has enhanced its range into the UNIX and MS-DOS market. The provision of a commercially widespread language like COBOL to the micro market and the addition of sophisticated development aids and friendly, interactive debug tools required top level designers and developers with initiative. New facilities with advanced personal computers at everyone's finger tips have been provided to ensure that the company can continue to attract the most talented software people available. Main skills being sought are UNIX and 'C' programming ability, technical programming on micros or minis, compiler design, assembler programming on micros or minis.

Salary will not be a barrier to recruiting the right people.

### Open letter to experienced computing staff seeking new opportunities

Our free service to you is advice and assistance in identifying the most suitable new position for the development of your career. Our consultants have held a variety of responsible positions in the computer industry. With this experience and their knowledge of the job market they are available to help you. The advertised vacancies are only a representative sample of the many that are regularly registered with us by our clients. Write or call us anytime to discuss your ideas.

Write or telephone (02403) 28383 during office hours.

We are always ready to discuss these and many other interesting positions.

**JOB IN THE CITY OF LONDON**

Benefits of a job in the 'square mile' are substantial — and this is reflected in low staff turnover, says Margaret Park

THE City's square mile may hold the highest concentration of money in the country, but its relative prosperity has not produced any more jobs for computer staff than appear elsewhere.

Most employers in the City of London report a low turnover of staff, which is a reflection, they think, of the security and benefits attached to jobs there, most of which are in high finance.

Benefits for staff employed by banks or insurance companies are substantial, the most famous being the cheap mortgages offered by banks to attract employees. And a 5% interest rate on home loans — less than half the usual rate — adds considerable value to ordinary income.

City computer staff obviously know when they're on to a good thing. All indications are that they stay in their jobs longer than computer staff in other industries. Compared with computer departments dependent on manufacturing to supply them with work, the money business is at least secure.

Computer services companies in the City rely largely on business from the banks, Stock Exchange and insurance brokers.

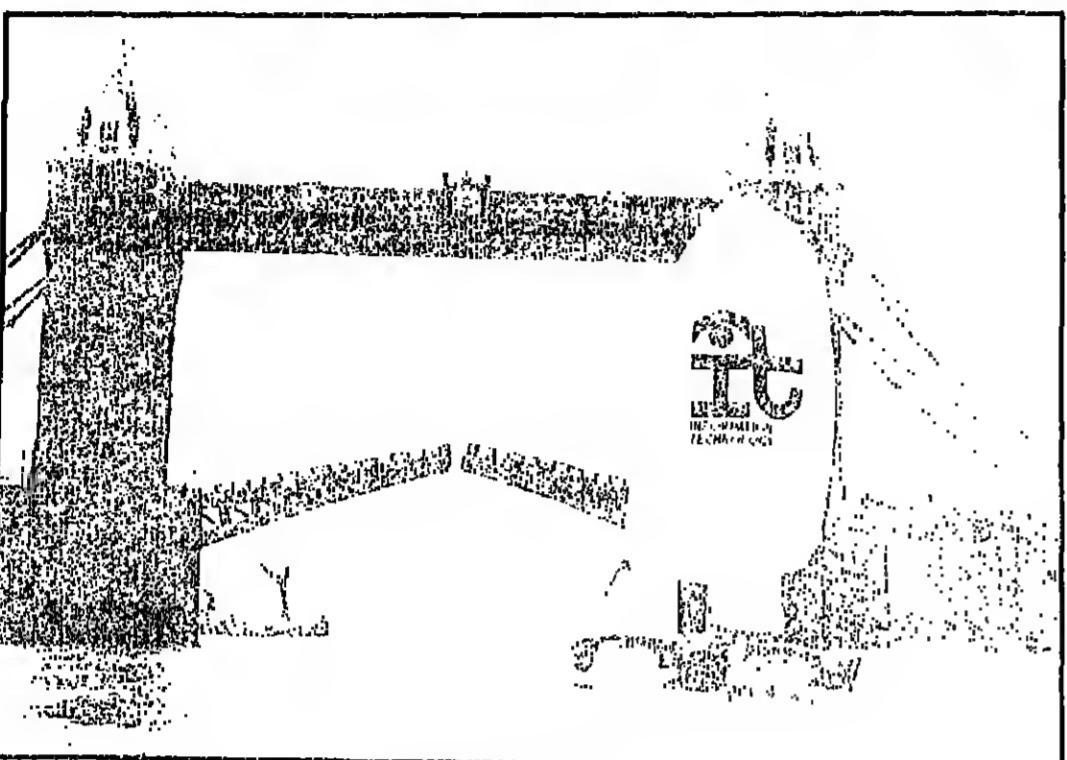

Rolle and Nolan Computer Services, for example, provides computing power for the City's commodity brokers, but this specialization makes the hunting out of fresh staff an uphill task.

John Plant, programming manager with Rolle and Nolan, said: "Knowledge of the commodities market was as valuable in his computer department as any technical experience.

"This knowledge is very hard to get hold of," he said. "So we don't mind if applicants do not have the right systems experience; we'd rather have an understanding of business."

The understanding of the industry is most important at the level of systems analysis, which is where recruitment problems begin.

# Computer people stay where the money is

Ancient and modern in the City as IT82 sets under Tower Bridge before docking at St Katharine's.

"The people with the right amount of commodities knowledge tend to be fairly well on in management positions and not keen to give that up to go back to systems work," said Plant.

Plant echoed the general opinion among City employers that staff tend to become entrenched with

its sights a little lower. Even more money is apparently not enough to attract computer people away from long sought-after management positions.

Plant cited the general opinion among City employers that staff tend to become entrenched with

much more demanding when it comes to skills and experience.

Jack Watkins, administrator manager at the American Foreign Insurance Association, said: "It's what people are capable of that counts with us. We expect them to be able to use certain skills in certain ways.

"CICS is a good example," he added. "A lot of computer people will say they know it, but we don't think it's sufficient to use it on a screen without understanding how and why it does what it does."

American Foreign is US-owned and, according to Watkins, salary levels are arranged so that an analyst programmer with the company is expected to have a considerable knowledge.

An example of the City's low staff turnover is in the past 12 months only four of American Foreign's computer staff have left and all did so because they were anxious to move back to the parts of the country they'd originally come from.

"We rarely lose people to rival financial organisations in the City," said Watkins. "Those who do go are usually at the top end of the range, looking for their minor management posts."

Barbican Computing Services is a software house, aiming the banking and accounting community, and again extra skills are needed from would-be computer staff. A large number of City firms are foreign-owned and the high salaries offered make them that

programmers are extremely attractive. According to the personnel manager they are attractively equal to what you can earn as accountants, etc., turnover rate among them is low.

Rolle and Nolan will take on nine staff over the next six months because of a new term software project to be continuity linker clients.

Eight extra staff have been on so far this year, and the system is ready for beta and launch at the end of the year. Extra staff will be needed for its enhancement.

## SYSTEMS DEVELOPMENT MANAGER c.£14,000

Essential qualifications three to four years' extensive experience of GSD equipment with current working knowledge of the System/38 and experience of leading development staff.

## SENIOR ANALYST PROGRAMMER c.£13,000 ANALYST/PROGRAMMER c.£11,000

Similar experience to above gathered over a period of one-and-a-half to two years on GSD computers. A thorough understanding of RPG2/3 is considered important.

Career opportunities are excellent and we offer the normal benefits associated with a major company.

Please Tony Howlett, Information Services Manager, on 01-991 2911 (daytime) or 01-651 4453 (evening/weekend)

## Assistant Engineer Real Time Computer Systems

POTTERS BAR up to £11,793

Eastern Gas operates a number of computers associated with the remote control and monitoring of the Region's gas supply network. Data link and message switching, mobile radio and other essential services.

An engineer with experience in Real Time Computer Programming is now required to assist with the software and hardware development on current and new systems for various applications. A working knowledge of a high level language — preferably CORAL 66 — is essential, plus experience in Digital Electronics or Digital Communications. The successful applicant, male or female, would preferably have a broad-based telecommunications background; but opportunities, including training, will also present themselves in departmental activities concerned with Radio, Telephony, Telemetry and Instrumentation.

This post will suit recently qualified graduates or others who meet the educational requirements for Chartered Engineers, possessing a few years' relevant experience.

Travel throughout the Region will be necessary, and a current driving licence is essential. The work also involves a commitment to take part in computer maintenance standby/call-out arrangements, if required.

Salary will be in the range £10,337 - £11,793 including Metropole Weighting Allowance. Benefits are those normally associated with a large progressive organisation.

Please write or phone for an application form, quoting reference 4455, to: Recruitment Manager, Eastern Gas, Star House, Mutton Lane, Potters Bar, Herts EN6 2PD. Tel: (0707) 51151 ext 584.

Closing date for applications: 24th November 1983.

## EASTERN GAS

### The Hatfield Polytechnic Schools of Engineering and Information Sciences

#### Digital Systems Engineer

£10,473-£12,312

#### Software Technician

£5,205-£5,673

Required to provide hardware and software support in an SERC-funded Digital Systems laboratory.

Appointments for three years in the first instance.

Application forms and further details from the Staffing Officer, The Hatfield Polytechnic, PO Box 109, Hatfield, Herts AL10 9AB (Hatfield 68100, extension 309).

Please quote reference 687 for Engineer, 688 for Technician. Closing date: 24th November, 1983.

## for a constantly challenging environment

Operating in the oceans of the world, sonar is highly responsive to its dynamic environment. Depth, temperature, salinity are some of the factors, a slight variation in any of which can affect the signal, making all the difference between detection and non-detection.

Understanding these characteristics began with the examination of underwater physics and acoustics in the 1950's. Today, the research interest extends to all aspects of enhanced sonar technology and systems development. For specialists working on advanced sonar systems and equipments this means the application of state-of-the-art technology to such areas as computer-assisted target recognition, beam forming, signal processing, and the man/machine interface.

The equipment supplied by Plessey Marine is second to none. Its Fleet Escort Sonars, for example, are the most advanced in the world, and its development of second generation, totally multiprocessor based sonars is setting new and impressive standards of excellence.

### Applications Software (Up to £16k) for surface ship and submarine sonars

For the larger vessels, the systems architecture typically links many multiprocessor based subsystems together along a communications bus (e.g. 1553b) giving a compound view derived from all the vessel's sensors. Software is developed using a Host-Target approach. The host computers are DEC PDP 11 and VAX machines, supporting Intel 8086 and TI 9900 microprocessors. Languages used are CORAL 66, PASCAL and ASSEMBLER, which are normally used in conjunction with a highly developed MASCOT design and implementation methodology. Software tools include the sophisticated package CONTEXT to simulate and then interrogate after committing to hardware, and the graphics aid AADP.

### Wide-open Opportunities

We are currently building up our software teams and have vacancies for the following high-calibre people — degree qualified, preferably in computer science or electronics with at least 3 years practical experience of real-time or interactive systems.

**Section Leaders** — to manage and technically direct small software teams within an established software function.

**Systems Analysts** — to lay down the framework of a multiprocessor design and to communicate and control designs during implementation.

**Systems Designers** — to develop detailed software design concepts and lead technically a team of implementation programmers.

**Programmers** — to develop their existing programming abilities and level of design responsibility.

### Somerset and Gwent

These career opportunities are located at our establishments at Templecombe in Somerset and Newport in Gwent, in the 'high tech corridor' around the M4/M5 Motorways. The working environment is first-class with ultra-modern facilities. Housing is reasonably priced in villages and towns set in beautiful countryside and the cities of Bristol and Cardiff are close at hand.

First rate benefits include full reimbursement of relocation expenses where appropriate, excellent sports and social facilities, a comprehensive pension scheme and many other benefits.

### To apply

For vacancies at Templecombe, Somerset, please write for an application form or send a full cv to C. Weston, Resourcing Development Manager at Plessey Marine Research Unit, Wilkinthorpe House, Templecombe, Somerset BA8 0DH. Tel: Templecombe (0963) 70551 or ring FREEFONE 9622. Please quote ref: TEM/307

For vacancies at Newport, Gwent, please apply to M. Barnes, Personnel Officer, Plessey Marine Limited, Spythy Road, Newport, Gwent NP1 0YY. Tel: Newport (0633) 270110 or FREEFONE 1279. Please quote ref: NEW/208

## Software Programmers **GRASP** Advanced Technology.

Our client is a major international company manufacturing consumer goods for the domestic market. In keeping with their philosophy that major market share relates to forward thinking management and manufacturing techniques, they have established a separate Systems Engineering Department. Based in the West Midlands close to the Worcestershire border, this Department develops, at the leading edge of technology, computer automated production facilities for their world-wide factories.

Current developments include a new generation of Factory Automation equipment including robotic and computer vision techniques, and they seek to recruit additional Software Engineers to facilitate the implementation of these systems and to be responsible for the initiation and development of future systems.

Working in modern, purpose designed premises, every facility is offered to aid development of both hardware and software. Every opportunity is given to the engineers to exercise and expand their skills as part of a small high-drive team.

Hardware currently being used includes DEC, making extensive use of RT12, and Motorola

### SENIOR SOFTWARE ENGINEER to £13½k + bonus + relocation

Responsible directly to the Systems Manager, we would expect you to have extensive experience of working on real-time applications in a scientific or engineering environment using high level languages and Assembler. You are looking for the opportunity to demonstrate your flair, leadership and your ability for innovation in design within a challenging application area.

### SOFTWARE ENGINEER to £11k + bonus + relocation

Responsible to the Senior Software Engineer, you should have a minimum of 2 years post graduate experience in a real-time software environment. You are looking for an outlet for your creative talents, more responsibility and the opportunity to be recognised for your own achievements.

Successful candidates will be offered excellent salaries together with first class benefits including share option and car loan schemes. Career progression is as would be expected of a multi-national group of high reputation.

## Your Programming skills are your Working Capital Invest them in a real career

City

Our client is probably the most highly regarded consultancy in the banking and financial sector. Within the industry their products are household names.

Their secret is people. The people they employ. Whether as consultants working directly with clients at top management level or as specialists designing and putting together the systems. What's important to you is the fact that they only ever recruit at the bottom end. So the only way you can go is up. And if you're good you will - fast. In fact, most of their senior managers and consultants are still under 30.

Also you'll find the environment itself unique in as much as you'll be given immediate responsibility and freedom to do things in very much your own way.

Your initial investment will be your degree and at least two years' good programming experience in banking/financial systems, acquired within an IBM and/or DEC environment.

Also you must have worked on at least one relevant project right through to implementation. Some exposure to analysis would be a distinct advantage. Once into the job, it will take all your energies and commitment, your self motivation, problem solving ability and communicative skills.

In return you'll soon be further ahead in your career than you would have thought possible. Interested? To find out more, contact us quoting reference 6946.

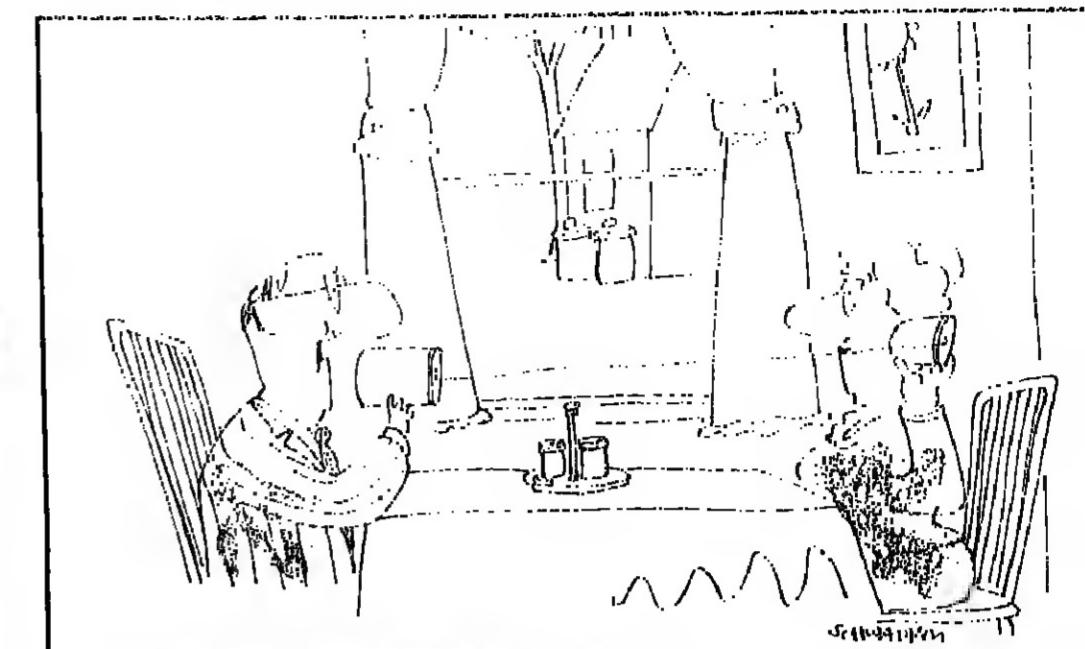

Lloyd Chapman  
Associates

123, New Bond Street, London W1Y 0HR 01-499 7761

## JOBS IN COMMUNICATIONS

# Threat to jobs as telecomms industry expands

Employment will be mainly for the specialists, reports Margaret Park

"I said, Agnes, we don't seem to communicate the way we used to."

THE UK telecommunications industry, despite the efforts of the Post Office Engineering Union (POEU), is set for expansion. But this isn't to say that the union's worst fears are not justified.

Telecommunications business will probably grow, but few of the job opportunities will be in the maintenance and servicing sector supplied by POUU members.

As technology advances, staffing for the day-to-day business of maintenance will decrease. Jobs on offer will be for specialised telecommunications skills such as microwave and optical fibre techniques and for projects design involving a combination of telecommunications and computing skills.

Like so many industries, job quality in telecommunications is being upgraded, and more skilled staff will be needed. Fewer, however, will be required for the

servicing and operations functions. British Telecom plans to have taken on around 200 extra staff by the end of this year, a figure which has been the norm for the past five or six years.

Computer development staff are concentrated in BT's three development centres in Cardiff, Ipswich and London and staff are needed in all grades from operators upwards.

The company divides its intake fairly evenly between experienced staff and trainees but rarely takes arts graduates straight from university for programming jobs.

"Our milk round concentrates on science and maths graduates," says Rikke Herd, BT recruitment manager. "We look for potential management skills and a commercial and technical awareness," she adds.

Arts graduates can get into BT's

computer departments but only as

extra lectures and training courses to attend over the following year.

Salaries are perhaps a little above average in BT. A brand new graduate trainee programmer can expect to start on £6,300 in the region of £7,600 with London weighting. At 26, with some experience, programmers are paid £9,400 or £10,700 in London.

BT expects that the coming decentralisation of its computer operation (as a result of the government's privatisation of the company) will produce a need for more computing staff in the planned autonomous regional centres.

"It's likely," says Herd, "but there's been no firm decision and we can't say when extra people may be needed."

At present, BT computer staff don't switch location unless the company has to move them to another development centre but it is expected that this may change

with decentralisation next year.

Staff will be able to seek promotion by moving between BT's new profit centres.

A number of development people are in the process of being moved from London to Cardiff, Ipswich because of the expense and scarcity of accommodation in London.

BT will consider moving its operations staff into programming but says that when they apply for programming jobs their success rate is lower than outside applicants.

Operators can make the move after two years' experience but one of the big stumbling blocks to their progress is reluctance to change locations. The demand for operators staff is concentrated in Central London, Harmondsworth, Ipswich and Cardiff.

Few new recruits are put to work on System X development,

but computing staff can move into this area of the business after gaining some experience elsewhere.

Mercury Communications, the new business voice and data communication service, will be taking on about 130 staff over the next 12 months. About that number are already employed and the first recruits to Mercury were seconded from its three parent companies: Cable and Wireless, British Petroleum, and Barclays Merchant Bank.

Recruitment needs in Mercury are divided into three categories. The biggest is for sales and marketing staff, a large number of which are being taken on from computer manufacturers or related businesses.

Specialised telecommunications people are needed with skills in microwave and optical fibre work plus project planners whose experience should include leading large teams in long-term projects.

Mercury is keen to take project people from outside industries in civil engineering or petrochemicals, not because experience of those disciplines would be a help, but because development work in those areas has been of a similar scale.

Straight computer staff are in the minority at Mercury. At present, the Covent Garden computer room houses a Digital Equipment Vax machine and is staffed with just one data processing manager and an assistant.

Mercury is being careful not to antagonise BT and the POUU by attempting direct recruitment.

But nevertheless, the company expects that a fair number of applications from BT staff will come in for jobs soon to be created at Mercury's regional offices. Only two of these exist at present, in Birmingham and Warrington, but the recruitment pattern for the next 12 months will change as more open.

Margaret Park is deputy editor of Computer Talk.

## PROGRAMMERS · ANALYST PROGRAMMERS Only IBM Specialists Need Apply

If you are an IBM Programmer or Analyst Programmer here's the perfect opportunity to develop your career in a new and very exciting direction.

Data Logic Altergo, Europe's leading IBM specialists and part of Raytheon, the U.S. electronics giant, can offer career opportunities to those who have the drive, initiative and ability to get on with people, together with experience of both large and small business systems.

More precisely — for Small Business Systems you will need at least 2 years experience in System 34 and/or System 38, with associated languages RPC11 and RPC11. A knowledge of DMAS or MAAPICS will be a distinct advantage.

For Large Business Systems you will require 2 years previous experience, a knowledge of PL/I and/or COBOL and familiarity with a Database System or TP Monitor. Experience

of CICS and DL/1 would prove an asset.

Both positions may entail some travel within the U.K.

In return you can look forward to working within a company with the depth of IBM expertise which is unmatched in Europe and the opportunity to take part in some of today's most exciting software projects.

A salary of up to £13,000 pa is offered together with the standard of benefits package you would expect from a major company.

If you are an IBM specialist, you need only apply in writing to Isabel Jones enclosing a C.V. or ring Jane Shine for an application form. Please quote reference A002.

**JOB FOR SALES PEOPLE**

# Compec—a great chance to look for a new boss!

**It's a time to size up rivals, says Alan Williams**

COMPEC is with us once again, with all its glamour and excitement, the upssets and disappointments. For me it's a very special event, for it is an occasion when the industry not only presents its wares to the world at large, but also to itself. It is a time for renewing relationships with old friends and old enemies.

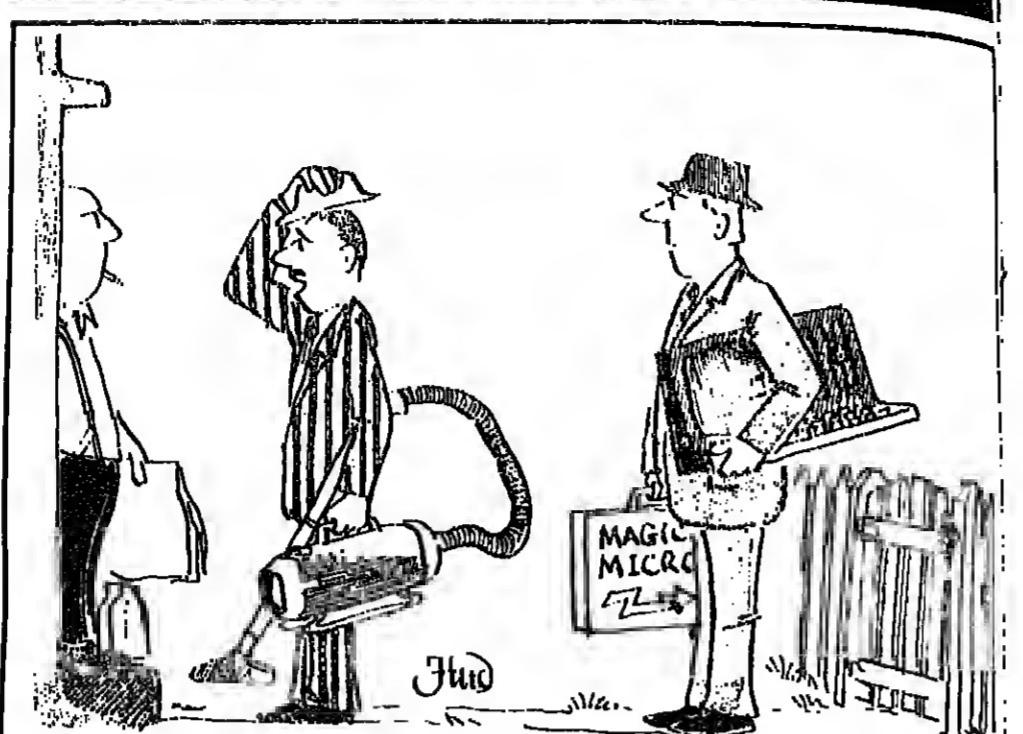

When you're wandering around an exhibition, one prime output looks much the same as another. One could easily pass by a listing of all the secrets of the universe without giving it a second glance.

For sales people as well as exhibitors, Compec is a time of varying work, with exposure to an extreme of situations from boredom to harassment. It is also an

myriad of cloned microcomputers, it becomes increasingly difficult to drum up much enthusiasm for the launch of yet another micro. If only exhibitors would concentrate on methods for increasing the visual impact of software and improving the means of presentation.

It is a necessary exercise in getting back to the reality where your product is not the only good one available and yours is not the only market sector with problems and opportunities.

In many ways, Compec can be disappointing and frustrating. Particularly in recent years with the

opportunity for discovering what the competition is up to, and making the inevitable comparisons of products, as well as noting how the stands compare in terms of visual impact and product literature.

In such circumstances it is difficult for sales people to avoid the comparison of one company with another as a potential employer. Even if there is no intention of abandoning current employment, it is still interesting to make a mental note of those companies which appear attractive and those to be avoided at all costs.

If there is frustration about the shortcomings of a product or the limitation of a product range it can

be illuminating to see how the competition is approaching the situation. Maybe a change of employer won't solve the problem after all!

A particularly interesting aspect of Compec, for me, as a recruiter of sales and sales support staff, is that it occurs at a time of year

when two significant but anomalous events are taking place. First, it is a period when sales budgets for the coming year are being resolved and sales managers begin to realise the probability or improbability of making quota for the current year and the relative expediency of changing employer.

On the other hand, it can also be the time when targets for next year are revealed; this year's performance is forgotten, and the predominant inclination is to flee in horror.

So, what is the current situation for those people who are considering a change?

Well, as ever, there are many forces at work, and it would be unwise of any salesperson to ignore them. Take the relative growth of particular market sectors for instance. Some areas, such as the service bureaux, appear to be in general decline, although it has to be said that some specialist operations, particularly those which have responded to changes in technology, are still doing well.

The biggest benefit to sales people of working in these areas is that they have to develop a good understanding of computer applications at the problem solving level. However, it has to be said that, in general, remuneration is less than the industry average.

This creates a very productive situation for headhunters as potential to agencies and consultancies. Those sales people taken by this year's call should bear in mind the wisdom of not leaving job until the task for which they were recruited.

This creates a very productive situation for headhunters as potential to agencies and consultancies. Those sales people taken by this year's call should bear in mind the wisdom of not leaving job until the task for which they were recruited.

Sadly, the supply of competent sales people does not grow significantly because the industry, by and large, is neither producing new ones nor properly training those it already has.

Consequently there is too much demand for sales people who have proven ability to succeed.

Other areas, such as mainframes and large-scale minicomputer systems, are in a relatively becalmed situation. As the value of £ increases and the number of users does not grow significantly, the large companies do battle over a static market whilst struggling to develop their bottom end.

Nevertheless, these companies provide the best career opportunities for many young sales people in particular, for they are virtually the only companies with the resources and commitment to provide sales training and contribute to career development.

In contrast some sectors of the industry appear to be doing very well. The communication systems sector continues to expand with a continuing demand for competent salespeople. CAD/CAM appears to be advancing now, after a slow start, and business is booming. For example, one of our CAD/CAM clients had only two out of 11 salesmen below target in the last fiscal year. And average earnings were around £42,000 per person!

The microcomputer market is a strange one. As far as I am concerned, the best job opportunities in this area are with the manufacturers, selling to agents and distributors. Selling at a lower level can be precarious.

It seems that everybody and his dog is, or is about to be, a turnkey microcomputer company. There has been a lot of attention to this area already and there is bound to be more. Apart from this, most

## CORD DESIGNS LIMITED SALES EXECUTIVES

We are seeking high-calibre, energetic Sales staff in both the Technical and the Commercial Divisions of the company. Sales Executives with a proven track record and a good knowledge of the software service industry are invited to join in the success of this rapidly expanding systems company.

The company operates on a divisional basis, each of which has a market speciality, ranging from technical and scientific software to commercial project development.

### LOCATIONS

#### LONDON

#### MANCHESTER

#### STAINES

Based at one of our operating offices, you will be responsible for the expansion of our client base. In addition, you will be expected to provide a support service to our current clients — many of whom are prestigious household names.

### ON TARGET EARNINGS — £20,000 p.a.

The package being offered includes on target earnings of £20,000, private health care, pension scheme and company car. However, the successful candidates will be expected to achieve earnings well in excess of these figures.

If you wish to realise your potential by working with a young, innovative systems company, then call Margot Thorpe on 01-409 1244 or Geoff Dongworth on Staines (0784) 63911.

### Senior Software Sales Executive

## A company firmly committed to enhancing your development

**Basic £15K**  
**On-target earnings £25K**  
**+ 2 litre car**

Our client — a systems design company enjoying the resources of a large, successful parent with a strong engineering base — needs a high calibre sales professional to launch a new software development tool performing configuration control and generally enhancing software support and management.

Reporting to Head of Project Management and Marketing, you'll direct and develop a strong support team, initiate performance/expenditure controls and devise your own market strategies. This is a rare opportunity to take on a start-up situation with exceptional long-term career possibilities.

You'll be a self starter with extensive experience in selling to sophisticated end-users for commercial, scientific and technical applications. You will also demonstrate a good understanding of the software development process and the ability to handle and simplify complex concepts. Ideally, you'll combine a mature approach with a zest for a fast moving environment.

An excellent financial package, including full relocation costs, will be negotiated to secure the right candidate. Contact Peter Lloyd today, quoting reference w1256-L.

**Tax Free £15,000-£40,000**

Plus accommodation, car or allowance, flights, medical cover, etc.

Due to continuing expansion and successful marketing, further opportunities have arisen within marketing and support. The Company market the whole range of Burroughs products within the Commercial, Banking, Finance and Government sectors.

There is a continuing need for candidates with Burroughs backgrounds. Specific requirements currently include:

**MARKETING & SALES SUPPORT**

For the large mainframe market, Burroughs experience is essential. For other sectors, networking experience on Mins or Micros, ideally Burroughs, is desirable. For the management appointment, experience of successfully managing sales/marketing personnel is also necessary.

**SALES & MARKETING PARTNERS**

Project Loading, MICR and Clearing Systems experience is required, ideally gained within a Burroughs environment.

**DATA PROCESSING SYSTEMS**

Specific experience on Series 3000 using EPL would be ideal, although related experience may also be considered.

**DATA PROCESSING SUPPORT & SERVICES**

For hardware and software support on the complete range of Burroughs computing and ancillary equipment.

All appointments will be offered on 2- or 3-year renewable contract basis - single or married status.

A position is available in the US from DALROTH &amp; PARTNERS LTD. Please quote Ref: 1441 for further details or send your resume to us quoting Ref: 1441. All applications received by 1st December 1983.

**H/W Engineering Supervisor**

Nottingham: Salaries to £10K

A Networking Systems Distributor requires a Hardware Engineering Supervisor for a key role within its rapidly expanding Operations Department. The successful candidate, aged 25-35 years, should have completed an engineering apprenticeship and have a minimum of 3 years hardware experience with mini or microprocessor preferable in a development or service role. Your current or recent background should include two or more of:- Quality assurance and control, CAD/CAM or PC products, UNIX or CP/M based systems, data communications and protocols, hardware software interfacing. Candidates will lead an established small project team and be responsible for the co-ordination and supervision of Hardware System Engineers. Main management skills and the ability to work to exacting product delivery date are of great importance. You will also be required to travel to clients' site within the U.K. Ref: 1441A

**D.E.C. Comms Systems**

London &amp; E.E.C.: Salaries to £16K

Our client, a major supplier of D.E.C. based minicomputer systems, has a number of vacancies for Communications Software Engineers to join either its London or Dutch-based operations. Suitable applicants will, preferably, have two or more years programming experience in a distributed processing environment where proprietary networking systems

such as DECNET have been utilised. Applications are, however, sought from those with fluency in MACRO II, RLL-2 or Intel Assembler, irrespective of the environment in which the skill have been gained. Of particular interest will be candidates who have been engaged on the development of interface software. Ref: 1441B

**UNIX Applications Engineers**

London and Midlands: Salaries to £11K

A highly respected supplier of UNIX based Microcomputers Systems and Networks is currently seeking to recruit a number of exceptional Applications Engineers for its London (City) and Midlands based operations. Applicants, aged 25-30 years should be qualified to HND level or degree and to have a minimum of 3 years relevant practical experience in a UNIX, CP/M or financial accounting environment. Your programming background must include fluency in two or more of C, PASCAL, FORTRAN, COBOL or Business BASIC. Those candidates fully familiar with UK accounting practice and also having a current background in financial or systems analysis are especially encouraged to apply. It would be advantageous if applicants had used or implemented a relational database (e.g. DBASE II, INFORMIX or RAPPORT) in a business environment. Since all positions entail a significant degree of client contact in the form of product demonstrations, seminars and on the spot training, our clients' sales force will develop their personal skills. Additionally, candidates will be expected to visit clients' sites in the UK on a post sale-support role. A willingness to travel within the U.K. as and when necessary is therefore of paramount importance. Our clients offer a competitive salary, generous company benefits, and outstanding career prospects. Individuals who feel that they meet the specification outlined should either forward a well documented resume or, alternatively, telephone one of our Consultants quoting Ref: 1441A.

**Real-time Analysts & Progs.**

Hants/Berks: Salaries to £12K

Real-time Analysts and Programmers, with at least 2 years post graduate industrial experience, are urgently sought by a leading software consultancy. The broad range of projects they undertake, ranging from advanced defence systems through to office automation products, guarantee a varied and stimulating working environment. Your software skills should include substantial real-time programming in a block-structured language and an Assembler, combined with a knowledge of the utilities offered by operating systems such as RSX, VMS or UNIX. For those applicants with main management experience, or potential, rapid promotion is highly likely. Ref: 1441C

**Process Control Systems**

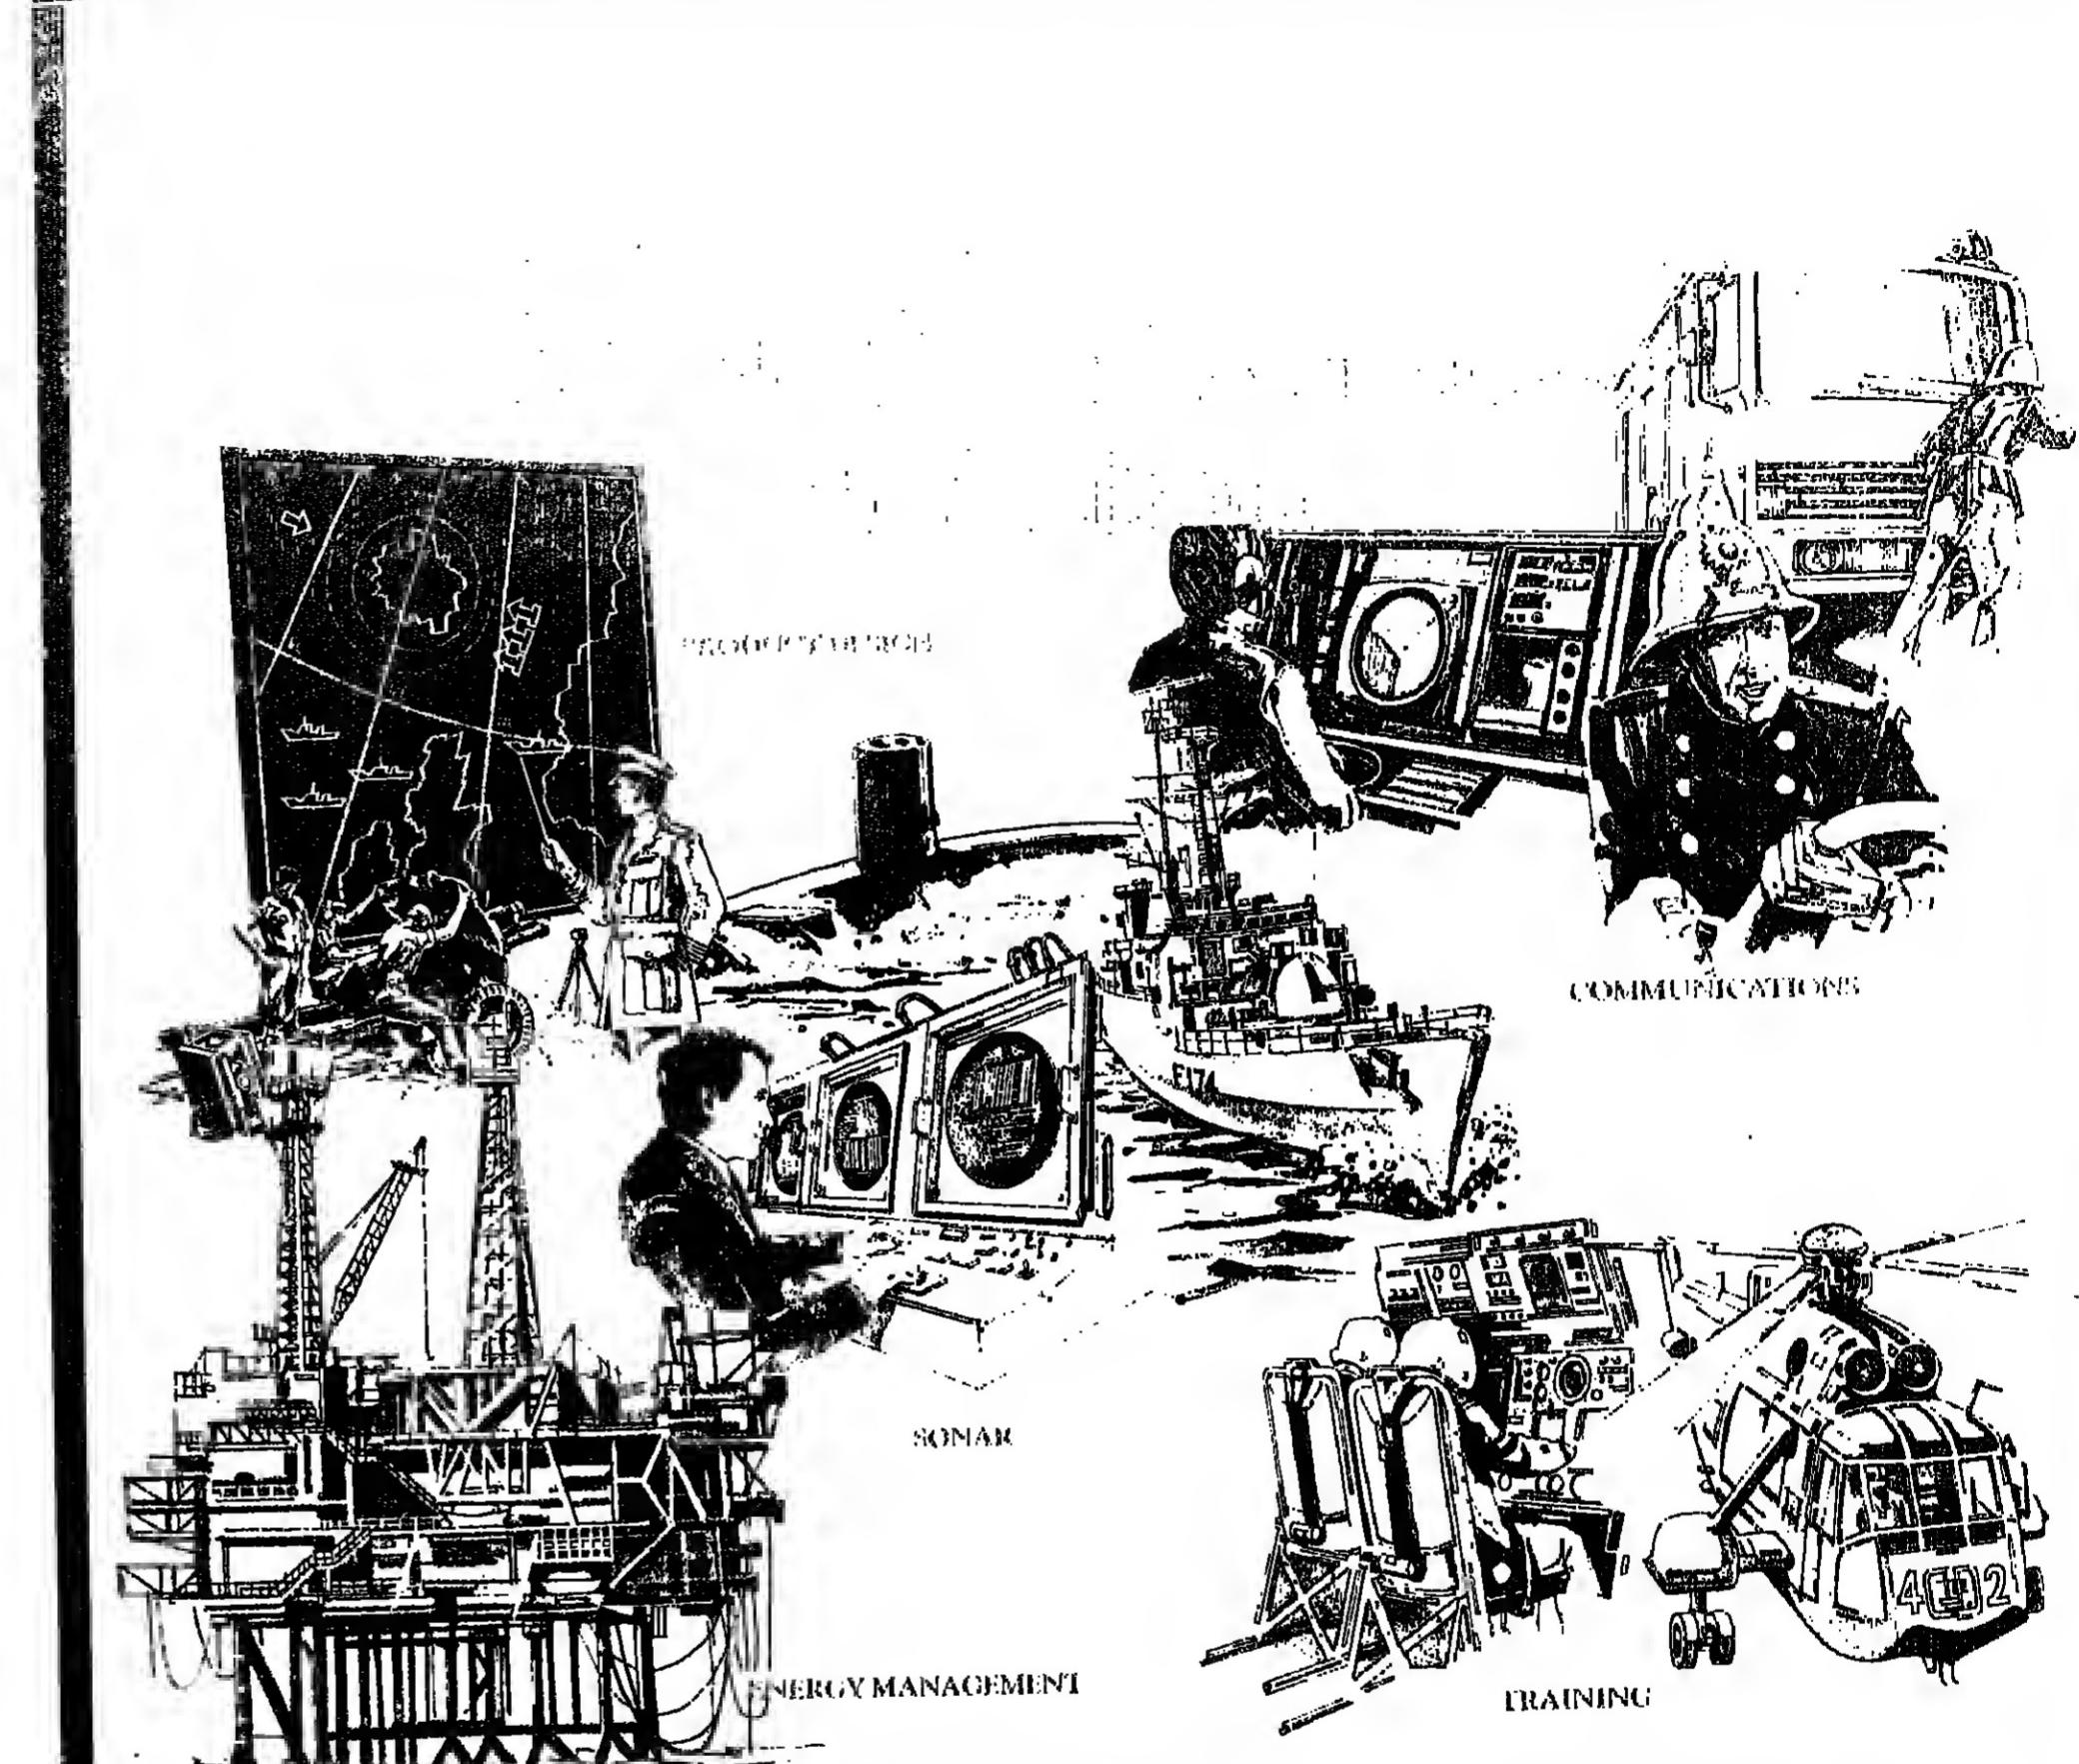

London: Salaries to £15K

A leading U.K. Systems and Software House is currently seeking Programmers, Designers and Consultants for its London-based industrial division. All applicants should hold a numerate degree and be fluent in an Assembler and a high-level block-structured language. There is a strong preference for candidates who are familiar with PDP 11, VAX 11/780 or HP 3000 hardware. For candidates who have real-time software development experience on other mini-computers should not be deterred from applying. For the position of Designer and Consultant, it is anticipated that you will have a background in process control applications, particularly within food, drugs or energy industries. Ref: 1441D

**CORAL 66 Programmers**

S.Hants Counties: Salaries to £11K

Applications Programmers and Designers are currently required by the software development division of a leading Systems Supplier. Suitable applicants should offer a minimum of eighteen months CORAL 66 programming experience in a real-time mini-computer or micro-processor environment. Particular hardware experience is not important, but familiarity with PDP 11, VAX, Ferranti Argus or the GEC 4000 series would be a distinct advantage. Our client offers an excellent training programme and there will be every opportunity for successful applicants to learn new skills and progress into either a Management or Consultancy role. **JOB IN THE HEALTH SERVICE**

# A switch to Britain's biggest business can be a healthy move

Les King looks at a service with a 10-year-old high technology workload

impossible to predict only three or four years ago.

One of the most exciting and

innovative commercial projects within the NHS is the development, by the North-west

After a two-year period of basic planning and data analysis by a mixed team of computer centre and user personnel, departmental manager John Arnold is convinced that the days of separate payroll, personnel and accounting systems in the NHS are numbered.

The project is based on an ICL 2966 mainframe, using IDMS/TPMS and to give some idea of scale, the first phase covering payroll/personnel functions will require some 4,000 incompatibles to store a year's information.

Although the gestation period of this project could be up to five years, Arnold believes that the data modelling approach will make the building of functional programs extremely easy while avoiding the need for large-scale redevelopment in the future.

It is also likely that the work will result in a set of transferrable systems with potential application in other health regions.

South-west Thames region is a fairly new authority which has built up its 125-strong data processing team over the last seven years.

Having completed the development of batch commercial systems based on ICL mainframes, the regional computer centre has embarked on its first major venture into distributed processing which will involve the

installation, in stages, of DEC VME minicomputers at major hospitals within each of the region's 11 district authorities.

Initially, these will be used for patient administration systems whose principal function is to provide hospital staff with access to an appropriate records database, eliminating a time consuming flow of paper around the region's hospitals.

Related systems, ranging from the online analysis of laboratory tests to the control of bed occupancy and out-patient appointments, are designed to speed up the whole process of admission, diagnosis and treatment, reducing waiting lists by making hospital resources more rapidly available.

Within the next few years, the Vax hardware will also form part of an integrated mainframe-micro network supporting some 2,000 terminal devices.

These developments have already generated a number of new job functions and the computer centre's current organisation includes specialist teams for user support, education, technical support, database, network, control and microcomputers as well as applications project teams covering medical systems, finance and manpower/supplies.

Microcomputers are making a major impact within the Health Service, providing dedicated processing for many ad hoc applications whose development and running costs would be uneconomic using traditional hardware.

There is huge potential for computer systems development in the NHS and a detailed description of current applications would probably fill several books. Contrary to common belief, the DP professional joining the NHS will necessarily lose experience of commercial systems which are to be found on a somewhat larger scale than in most other organisations.

At the same time, there are plenty of opportunities to work on specialised, and possibly more interesting, applications while safeguarding future career prospects by keeping a foot in commerce.

## OVERSEAS AREA SALES MANAGERS B.B.C. MICROCOMPUTER/ELECTRON

We are looking for a team of dedicated sales professionals to cover Western Europe, Scandinavia, the Middle East and Latin America. The positions involve much more than good selling techniques; recommendations on potential distributors will have to be made and in addition to planning and forecasting, there will be regular discussions with the U.K. technical departments. Perseverance and attention to detail is required to assist our distributors in exploiting their markets to the full. Overseas travel will account for about twelve working days per month.

A proven track record of selling through an overseas distributor is essential and knowledge of a European language (in addition to fluent English) would be a definite advantage.

We offer excellent career prospects, a high basic salary and commission, giving on-target earnings of about £20,000 p.a. plus a company car.

If you would like one of the most exciting sales opportunities available send your full C.V. to:

### MOSCOM LIMITED SALES SUPPORT ENGINEER

Moscom are a manufacturer of telecoms equipment, microprocessor based controllers and software. We require candidates with a minimum of three years' experience as technical support for the sale of telecoms equipment.

Experience should include knowledge of the telecommunications industry and microprocessor based equipment. Duties to include on-site demonstration, fault diagnosis, fault isolation, preparation of technical quotations, performance specification and design audit tests. This position would appeal to someone who is willing to move to a new dynamic company, and who enjoys travel throughout Western Europe.

Salary commensurate with experience. Please submit c.v. in strictest confidence to Mr J. Cantanni, Director Technical Support, Moscom Limited, Histon Park House, New Histon Road, Histon (in Houndsditch), Cambridge. (6428)

### BRIGHTON POLYTECHNIC FACULTY OF ENGINEERING AND ENVIRONMENTAL STUDIES

#### ENGINEERING PROGRAMMER/ANALYST

Salary up to £9,660

Applications are invited from computer science or technology graduates to fill a newly created role spanning, in the first instance, the Electrical and Mechanical Engineering disciplines. The post holder will work in close co-operation with staff and students of both departments in an area of responsibility which may be developed in both hardware and software development. The ability to programme in microprocessor assembly language, and to understand the principles of assembly, and experience of interfacing both analogue and digital equipment to microcomputer systems would be an advantage.

The post will be one in which a young graduate can acquire a valuable range of experience.

Further details and application forms from the Deputy Head of Parsons, Brighton Polytechnic, Moulsecoomb, Brighton BN2 4ET. Tel: Brighton 0323 6555. Closing date 28 November 1983.

(6441)

## BOOTS-CELLTECH DIAGNOSTICS LIMITED

### computer programmer

#### Scientific Applications

Boots-Celltech Diagnostics is a new company formed as a joint venture between Boots PLC and Celltech Limited. We are involved in the development, production and marketing of diagnostic kits and reagents for the medical profession.

A Computer Programmer is required to work in the Research and Development Department. The candidate appointed will have considerable experience in INTERFACING LABORATORY EQUIPMENT to mini-computers and a minimum of two years FORTRAN experience.

In addition, experience in one or more of the following areas would be advantageous; PDP assembly language, RSX, CP/M and Datavive.

Salary in the range of £9,000 - £9,500 per annum.

To apply please send a full C.V. quoting reference number 192 and give the names of two referees to Jane Waller, Personnel Officer, Celltech Limited, 244 Bath Road, Slough, Berkshire SL1 4DY.

Closing date for applications:  
24th November 1983.

## JOB FOR PROGRAMMERS AND ANALYSTS

# Private prospects take a turn for the better

Philip Hunter discerns a greater willingness to change jobs now that the recession is easing

If good news is not worth reporting, then this article might as well end here. For any analysts and programmers seeking work in the private sector will find that prospects are brighter than they have ever been, with recruitment agencies reporting a sharp upturn in demand from employers.

At the same time, people are more willing to change jobs than they were during the depth of the recession, which means more opportunities for promotion and pay rises. Increased mobility also increases the number of jobs advertised in the public sector, although here the total number of jobs available is unchanged.

"We have noticed a fairly considerable increase in activity," confirms Anthony Lambie, marketing director of VLI, the UK's largest computer recruitment agency group.

Keith Roland, manager of systems and programming for the London-based agency KPG is more emphatic. "We saw an enormous burst of vacancies in mid-September, much more pronounced than usual."

And Neil Williams, permanent recruitment manager for Knight Computer Services, says that the market was picking up well even in the usually slack months of July and August.

The result is that programmers with two years' experience, especially with IBM hardware, can change job easily now, with a good chance of a big rise in salary. But with four years' experience it may only be worth changing jobs if an interesting opportunity arises.

IBM has slightly increased its dominance of the commercial mainframe world in the past few years, and programmers with ex-

perience like Racal, Marconi and Ferranti are desperate for good people, but have had to relax their standards a little to get a steady influx of staff. "Some are taking on more graduates and people in other technical areas," says Lambie.

Quite the opposite in VLI's case, with the rise in vacancies for contractors even more pronounced than for permanent programmers. Lambie says that the tide against contractors resulting from lifting of head count restrictions has been overwhelmed by a huge demand for contractors for new projects - either to fulfil peak requirements or for specialist jobs.

But Alan Renthorn, director of London West Computer Recruitment, says he has not noticed a particular surge in demand for contractors. The situation with contractors is not so clear cut as for permanent people, although the consensus of opinion is that their lot is also happier than it was.

Recent recruitment policy has created the interesting anomaly that people with two years' experience are in much shorter supply than those with three or four years. This is because very few trainees were taken on at the trough of the recession two years ago.

The result is that programmers with two years' experience, especially with IBM hardware, can change job easily now, with a good chance of a big rise in salary. But with four years' experience it may only be worth changing jobs if an interesting opportunity arises.

IBM has slightly increased its dominance of the commercial mainframe world in the past few years, and programmers with ex-

perience of Cobol on the IBM 3000 or 4300 series are popular animals at the moment. Add experience of CICS, IMS, or DL/I, and you can afford to be choosy indeed.

Demand has also risen steadily over the last two years for RPG programmers on IBM's so-called GSD minis, the System 34, 36 and 38. Recently a recruitment agency, March Computer Recruitment, was set up just for this part of the market. Another agency set up to cash in on the growth of a particular sector of the market is London-based CAD Search.

The agency specialises in computer-aided manufacture and design (CAD/CAM) where there is a shortage of skilled analysts. CAD Search has recently advertised a variety of CAD/CAM jobs in Computer Weekly.

Most of the big agencies handle real time recruitment, where prospects for programmers have been good for several years, but are better than ever now.

There are two parts of the real time market: commercial and defence. The highest salaries are to be found in the commercial part, which includes process control and robotics. Agencies are reporting difficulty filling vacancies for these applications, with a shortage of people with experience of real time programming.

But Roland of KPG points out that this shortage in the commercial real time market is only an apparent one caused by companies being very choosy. "Most real time companies want specific experience."

On the defence side of the real time market, the situation is a little different. Companies in this mar-

ket are gaining the necessary experience.

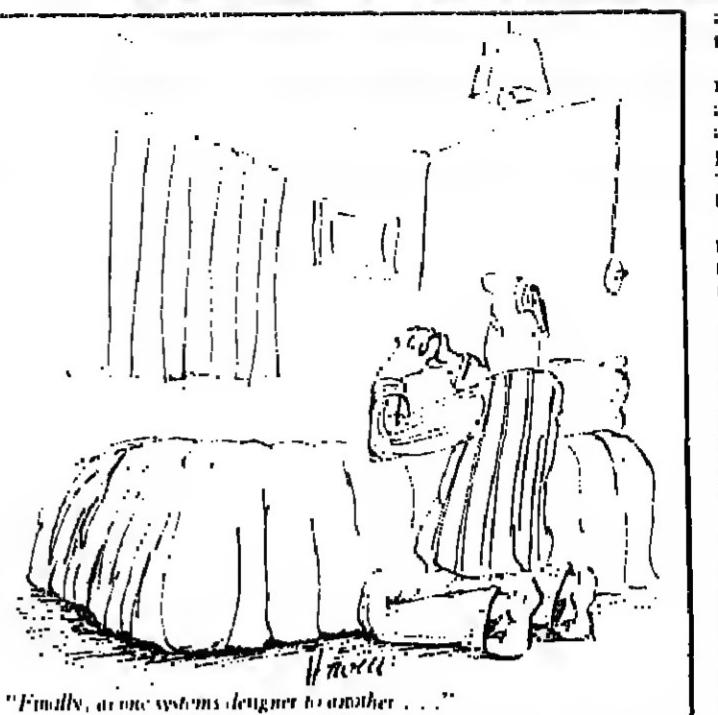

For the agencies, recruitment in the military market is something of a nightmare. McLaren of Jupiter admits that these vacancies can prove impossible to fill, and she sometimes has to headhunt rather than rely on advertisement.

There is the added complication that security clearance is often needed, which takes several months.

Recruitment advertisements are now appearing for programmers in the language Ada developed for defence applications by the US Department of Defence. Most of these jobs are not directly linked with defence however, and involve development of compilers or the language's operating environment.

Mention of the Unix operating system is also creeping into recruitment advertisements. Unix is being adopted in machines of all sizes including the Cray supercomputer, but is chiefly found on minis and micros for multi-user operation. Software support specialists with Unix experience are much in demand.

The finance industry is a good bet for analysts and programmers not keen on the real time market. Many banks, insurance companies and building societies are now expanding their computing staffs.

"Finally, an info systems designer to another..."

For the aspiring real time programmers however, these defence specialists offer a great opportunity to learn the real time skills so much in demand. You can always move on to a better paid job

## ANALYSTS & PROGRAMMERS:

LARGE COMPANY BENEFITS,  
SMALL PROJECT TEAMS,  
VARIED APPLICATIONS...

From Headquarters in Liverpool the Littlewoods organisation, encompassing a chain of 109 High Street stores and 6 Mail Order companies, is now set to expand its DP services within new and enhanced projects. Due to the growth in Mail Order systems and computer based retailing, additional professionals are required to work in a project team environment involved in the development of interesting and varied applications most of which will utilise Database and online techniques.

### Littlewoods

Salaries and benefits are truly excellent.  
COBOL programmers with a minimum of 2 years experience can expect a salary package in a range of £8K-£11K. Systems Analysts with a programming background and sound commercial systems experience can expect £10K-£12K.

In addition to your salary you will receive a very generous bonus plus all the usual large company benefits, yet you can still maintain your own identity by working in compact project teams. You will receive ongoing training in both data processing and management techniques in the company's training centre as part of your structured career development.

There's a lot more, and I would like the opportunity to expand on what you have read so far. In the first instance, a comprehensive pack of company, project development, housing and locality details is available. From there on, telephone me on 061-4911666 during office hours, or phone me at home if it is more convenient on Southport (0704) 211554 and find out more about these genuine career opportunities. Alternatively, write to me by completing the FREEPOST coupon and send it to Computer People North, Freepost, Sovereign House, Stockport Road, Cheadle, Cheshire SK8 2YD.

### Salesmen — Turnkey Systems

Leads Supplied  
Birmingham, Manchester, Leeds

£150,000  
Tidewinner urgently need experienced, solid, proven New Business Salesmen to capitalise on the large volume of leads we are currently generating for our Honeywell and ICL Turnkey opportunities. We have an excellent range of packages for both the mini and micro market, with Network capabilities and stand alone expansion capabilities. We have a fully integrable range of packages from order processing to Accounts, including Stock and Purchasing, ranging also to BOMP and Payroll. Equally, we have many vertical market products.

We seek a sound understanding of application system facilities, the ability to demonstrate from a terminal and the ability to develop tenders through to a full Go Live presentation.

Tidewinner have a UK presence second to none and excellent sales demonstration and support facilities. Our demonstration standards are high. Constant marketing and exhibiting will generate ever increasing volumes of leads. We urgently need experienced New Business Salesmen, with a strong emphasis on closing ability.

Excellent salary and commission structures apply. All sales achievement claims will be fully vetted prior to employment. We are only seeking proven successful performers able to take immediate advantage of the large volume of business opportunities currently developing with us. We know our products and we know the price is attractive. We know the support is excellent. We just do not know if you are good enough to win a job with us and deliver. If you do, we know that the package will be second to none and, as a Public Company subsidiary, the future potential of career progression is equally considerable. You must have achieved at least £250,000 p.a. New Business sales a year before applying to us with mini or £150,000 p.a. on Micro/Mini. No trainees or junior will be considered. Just proven, monitorable performers. No more than one endorsement. We cover the whole of England as a market and will also be appointing Franchise Dealers during the coming months.

If you want the best Hardware/Software facilities, well-qualified feeds to rapidly close and on earnings package which you could turn into a super tax case, we are your only serious UK prospect. No maximum earnings package. We are salesmen. We are already attacking the top 5% for many other positions. For an exciting and rewarding future ring us or send us your cv urgently for a meeting during the next few days to sell yourself to our management team. We are the company of the future and with public company backing, we can support the growth, can you close the opportunities we will give you fast enough?

If you have answered YES to most of these questions, we ought to be talking to each other. Contact us — NOW.

Bob Tait or Geoff Colne.

## Development Opportunities in the Electricity Supply Industry

We have a wide range of vacancies open to professional computer staff to work on financial, commercial and information systems. The hardware is varied and covers central ICL VME minicomputers, location micro-controllers and individual microprocessors. Advanced techniques are used to aid development and maintain high standards.

Applicants should hold a degree or equivalent professional qualification and have relevant experience ranging from at least two years for a trained COBOL Programmer to a minimum of eight years for individuals applying for the Systems Investigator position.

### PROGRAMMER

c. £9,300 - £11,000

Applicants should have a sure grasp of computing fundamentals, structured COBOL documentation and testing in an ICL COBOL environment and be able to demonstrate experience of programming for more than one application system in the past two years. Quota vacancy 1303/83

### LEAD PROGRAMMER/ANALYST

c. £11,600 - £13,500

Applicants should be able to supervise trained and trainee programmers, design, sustain and contribute to a project during development. Further analysis training is available to hold a minimum three year experience. Quota vacancy 1304/83

### MAINTENANCE PROGRAMMER

c. £11,600 - £13,500

Applicants should be able to investigate problems in commercial operational systems, devise solutions and install modifications for a wide variety of work areas. Quota vacancy 1305/83

### MAINTENANCE PROJECT LEADER

c. £14,200 - £15,500

The successful applicant will be responsible for short term projects to modify installed systems, and for the investigation and resolution of problems arising from daily operation. Experience in UNIPAY, TPS or TPMS would be an advantage. Quota vacancy 1306/83

### SYSTEMS INVESTIGATOR

c. £16,700 - £18,000

The successful applicant will be required to review and investigate business systems across wide areas and establish feasible user computer specifications. An initial specialisation in Finance, Accounting or Stores is needed, but systems and machine applications can be widespread. Part of the job will also be to oversee the training of junior staff to professional standards. Quota vacancy 1307/83

Starting salaries would be in the range quoted, but progression beyond this to the maximum of the grade can be expected with satisfactory performance.

Applications giving full details of qualifications and experience should be forwarded to the Personnel Officer (Recruitment), CEGB, South Eastern Region, Banksides House, Summer Street, London SE1, quoting the appropriate vacancy number to arrive by 25th November 1983.

## Software Support Pay Television

Racal Link Limited recently established in the U.K. as result of the significant growth of Pay television services both in the U.K. and Europe, now we are appointing a Senior Software Support Engineer.

Responsibility here centres on support and installation of systems for pay television.

These systems will include both control and image applications software.

The successful candidate will be involved in system

design, system modification and maintenance, on site installation.

Technical support roles.

Applicants educated to

degree level, should have

managed at least three years

experience in real-time

environmental design involving

both micro and mini

computers.

Please write enclosing

detailed experience and

present salary to:

Ian McInroy Personnel

Manager, Racal Link Limited,

Brimmington Lane, 3091 Fleet,

Road, Fleet, Hants.

**RACAL**

**World leaders in electronics**

## PROGRAMMER

Our small, but busy, bureau provides computer systems for firms of accountants and smaller businesses, using terminals in their own offices.

The principal systems include a sophisticated real-time accounts preparation package, on-line payroll and time recording.

Extensive development plans create a new position for a Cobol programmer to design, write, test and implement programs in Range-Cobol and Filelab. Software is run under MTS and TME-TP on our ICL ME29, connected by telephone lines to remote DRS terminals and printers.

The successful applicant will be a non-smoker with at least 18 months experience of Cobol programming in a business environment, particularly with on-line or real-time systems.

Application forms from:

**datareward**

45 MARKET STREET, HUDDERSFIELD 40246

6397

## Systems Analyst

c. £15,000

You're highly motivated, have a sound background in systems development, and the breadth of your experience is reflected in your ability to see things in a broader perspective. You are now looking for a more challenging environment for your talents.

We provide an essential information service to our members as well as meeting an ever-increasing demand from outside organisations. Our Technical Services Division has a systems group, currently 40 strong, which is a critical element in the development and support of these systems.

We are now expanding our team of analysts to cope with the development workload, and are seeking an experienced Systems Analyst to work on the feasibility and analysis for new real-time projects.

In addition to motivation and experience, you must be a good communicator as a high percentage of your time will be devoted to interface with the user at all stages up to implementation. Experience of on-line systems will be a priority.

This is an opportunity to develop your skills and careers we are in the forefront of videodisc technology and real-time information services.

Initially, employment will be for a period of two years, and the remuneration package will be in the region of £15,000 p.a. An immediate permanent position may be considered. The benefits will include a fully-paid season ticket scheme, BUPA, subsidised lunches and flexitime.

Please apply with a full curriculum vitae to: Jen Ross, Personnel Officer, The Stock Exchange, Old Broad Street, London EC2N 1HP.

16404

## New opportunities in Computer-Aided Engineering Application Software Engineers

As part of a major new investment in Computer Integrated Manufacturing, PA is setting up a Computer-Aided Engineering Unit based at Melbourn, Herts. The Unit will be headed by Dr Norman Schofield and will be the focus of development for:

- CAE Consultancy assignments with leading UK companies
- Bespoke CAD/CAM software
- CIM Strategy Development leading to new CAE products
- CAE Education, Training and Advisory Services

With the significant manufacturing experience and resources of PA, the CAE Unit represents an initiative which will

have a major impact on the CAD/CAM scene in the UK and internationally.

We are now seeking graduates with relevant experience for the appointment as:

**Application Software Engineers**  
Salary c. £12,000

Experienced Fortran analysts/programmers to become involved in major new developments for specific customers or for strategic products. Experience of manufacturing industries and a knowledge of portability requirements between major VM machines would be an advantage.

Applications with detailed career histories should be sent to the Personnel Manager, at the address below.

## Sales Executive Computing Services-London

We need a Computer Professional aged 25-35 with a systems or programming background to sell NCC's products and services in the public utilities sector. The post will be based out our London Office but the territory to be covered will be England and Wales.

- \* FILETALK range of software products
- \* A total training package
- \* Computing Information Services
- \* Promotion and retention of NCC membership
- You will receive a remuneration package
- \* Salary within a range rising to £16,000
- \* Sales Performance Bonus
- \* 5 weeks holiday
- \* Contributory pension
- \* Company Car Scheme
- \* Help with relocation expenses

Interviews will be held in London. Please write with full career details to:

The Personnel Manager,  
THE NATIONAL COMPUTING CENTRE LTD.,  
Dixfield Road, Manchester M12 2ED.

The National Computing Centre

## SOFTWARE and CONSULTANCY SERVICES

ICL IDMS TPIMS  
ALL LEVELS

BENEFITS PACKAGE  
£10-14K PLUS CAR

As part of our planned expansion in 1983/4 an outstanding opportunity exists for analysis, designers and programmers with good experience of ICL IDMS and TPIMS to join our systems team based at Egham and Manchester.

P-E Computer Services is a leading international software house and consultancy. Since 1959 we have provided a comprehensive service in the areas of consultancy, training, systems development and support.

Company benefits include an attractive salary, company car, generous expenses allowance, non-contributory pension scheme plus the security of working for a long-established well-managed professional organisation.

If you feel you could respond to the challenge of working in this dynamic environment you are invited to take your career a step further by telephoning or writing to:

Kerry Nash  
P-E Computer Services Limited  
Park House  
Egham  
Surrey TW20 0HW  
Tel: Egham (0784) 34411

## SALES MANAGER

A technically eminent Microcomputer Software House, at the forefront of the industry, wishes to appoint a Sales Manager to develop the Sales function in line with the Company's current growth.

A proven track record as a Sales Manager in the computer industry will not necessarily ensure a place on the shortlist. Maturity in a young professional manager, together with personal integrity and experience beyond the sales arena are required.

Earnings in excess of £20,000 are offered; to the person selected, the total package will not be a source of contention.

Applicants who believe that they could fill this unique position should explain, in a hand-written letter, how they can contribute to this Company's growth and why such an appointment is an appropriate career step for them at this time.

Write, enclosing a concise curriculum vitae, to the consultant to this project: Peter E. Green, Falkland Management Services, Capital House, Market Place, London W3 5AL.

## Freelance on IBM System 38, RPG III

We need the following professional freelancers

- \* Designer / Team Leader
- \* Analyst / Programmer
- \* Programmers

Some of the assignments are immediate, others start during the next eight weeks. Contact me NOW regardless of availability.

Please Ring: Sheila Fox  
Link Associates Limited  
24a High Street, Chesham, Bucks. (0494) 784922

## JOB IN SYSTEMS HOUSES

# Systems houses keep a low profile

Systems and software houses are finding it hard to find experienced staff. So they're digging in, says John Riley

SYSTEMS and software houses are having difficulties finding experienced staff. Those with experience are digging in where they are and need a lot of persuading before they will budge.

There are two reasons for this situation. The industry is getting older, and more security-conscious, and the job-hoppers of the 1970s are settling down as their children start going to school. That accounts for scarcity of staff with much experience, and there is the perennial shortage of staff with two to five years' experience.

Job-hoppers of the 1970s are settling down as their children start going to school

brought by the old problem of training failing to keep pace with expansion.

Despite the recession, systems and software houses are experiencing difficulties in finding good administrative and sales staff, as well as experienced analyst programmers.

Houses usually know what they want, and the largest ones often demand a minimum of four to five years' experience. They tend to find their own staff rather than recruit through recruitment agencies.

"Most software houses specialise in one area or another, for example, in banking or insurance," said Ian Cole, of agency Knight Programming Support, "and they want people with a strong background in those areas. They are looking for specialised people, not necessarily on the software side, but on the environment side."

Richard Milsum, head of the specialist IBM small business system recruitment agency, March Computer Recruitment, says: "Software houses are eternally short, but most of their people come from user sites." Ian Townsend, personnel man-

ager of Scicon, has observed increasing difficulties in attracting staff. Those with experience are dig-

ing in where they are

and need a lot of persuading before

they will budge.

Hoskyns, the major systems software house, has been throughout the UK and has problems recruiting management.

"There is a shortage of qualified

analysts in the middle and

echelons of the business," spokesman.

"Getting good project managers, account managers, and so on is a pain,"

he added. "And people with IBM skills continue to be as marketable as ever."

Townsend believes that compa-

nies will have to pay more attention to training; perhaps too many companies are wanting people to join and then effective the very next day," he said.

Logica, which recently became a public company, employs over 1,200 staff and is also finding a shortage of good people with five or more years' experience. Logica plans to take on 250 staff this year, of whom about half will be graduates.

## USUTU PULP COMPANY LIMITED, SWAZILAND DEPUTY DATA PROCESSING MANAGER

The Usutu Pulp Company is a large  
forestry and pulping operation situated  
in the western highlands of Swaziland,  
with a strength of 2,800 employees.

The Company currently uses an NCR  
V8555M Criterion System running  
under VRX for a wide variety of

applications, some of which are on-line.  
The Deputy Data Processing  
Manager will be responsible to the Data  
Processing Manager, and will be  
involved in all aspects of data  
processing, including systems analysis,  
programming, operations, training  
others and occasional first line  
maintenance.

The successful candidate will be a  
mature all-rounder willing to get his  
hands dirty. Good communication  
skills, the ability to control a small  
staff, a solid background in struc-  
tured cobol, on-line experience  
and a proven track record in  
systems analysis and design.

all requirements. A data processing  
qualification, experience in Fortran  
and/or Database management systems  
would be a recommendation.

Benefits include: Negotiable salary;  
25% terminal gratuity (at present tax  
free); Renewable three year contract;  
Free life assurance; Subsidised housing  
and electricity; Education allowance;  
Medical aid; Excellent sporting and  
social amenities; Assistance with  
relocation expenses and repatriation  
expenses.

Written applications stating full  
details of qualifications, experience,  
education, age and marital status  
should be addressed to:

Mr J.G. Corbot-Milward,  
Personnel Executive,  
Commonwealth  
Development Corporation,

**JOB OVERSEAS**  
UK personnel are drawn overseas for a number of  
reasons, as Ron Coates reports

## The flow abroad picks up speed

It is generally understood that  
British software stands in high re-  
gard in the rest of the world. But what is  
not so well known in the  
UK is the growing international  
reputation of those individuals, the  
programmers and analysts, who  
work there.

There has seldom been such a  
good time for UK computer pro-  
fessionals at all levels to find  
permanent or contract work over-  
seas. And the specialist recruitment  
and contract agencies all report  
a steady flow of people who  
want to extend their experience, both  
professional and personal, by taking  
up jobs overseas.

In the US in particular there is  
an ever increasing demand for  
British computer staff, largely on a  
contract basis. And in the trad-  
itional markets for UK contract  
staff, the Common Market and the  
Middle East, the opportunities are  
expanding, despite worldwide re-  
cession and the threat of war  
smouldering through the Arabian  
half.

The attractions of overseas jobs  
to individuals are fairly straight-  
forward. There is the lure of more  
money, particularly on contract or  
freelance work. There is the general  
attraction of getting to see the  
world and being paid for it, with  
the potential bonus of picking up a  
foreign language. And finally it has  
long been generally felt that exper-  
ience overseas is a boost to a career  
in computing.

It looks good on a CV, the tech-  
nical experience is generally very  
good and the individual has a  
chance to pick up a wider insight  
into international business.

For the overseas buyers of the  
UK's software expertise, it is  
somewhat more difficult to specify  
the attractions. The main one is  
that British DP staff as individuals  
have a high standard of technical  
skill.

This has long been explained by  
the fact that resources in the aver-  
age UK installation have tradi-  
tionally been more restricted than  
in other countries, particularly the  
US. This has meant that there is a  
dearth in the UK to get the most  
out of a system.

Visas for work can be a difficult  
problem. Each of the Middle East  
states has a complex and differ-  
ent series of immigration laws govern-  
ing the religion, nationality and  
background of people that it will  
let in to work.

Most agencies do their best to  
point out the possible difficulties  
of work in the Middle East and  
indeed of any overseas country. It  
isn't in their interests to have  
dissatisfied staff and clients three  
to five thousand miles away.

As with all jobs, it is always  
worthwhile checking with people  
who have done them to find out if  
it is really suitable for you. The  
majority of people who take over-  
seas contracts and jobs enjoy it and  
their career paths."

The easiest part of the world to  
go to is, of course, the Common  
Market. No visas are required and  
there are reciprocal agreements  
with the UK for health services in  
most EEC countries.

At the moment the two bright  
spots on the Continent are Holland  
and Belgium. Both countries have  
a high demand for contract pro-  
grammers, with an additional  
boost for operators in Holland due  
to the fact that employers must  
keep open the jobs of staff called  
up for national service.

But there is bad news for anyone  
hoping to land a year or so in  
Rome or Paris. Demand is

stay on, but most of them will also  
be able to tell of people who for  
one reason or another, absolutely  
had to leave.

The real point is not to be one of  
the latter.

For the really big money, the place to go is still the Middle East.

## COMPUTER SYSTEMS DEVELOPMENT

Salary to  
Plus benefits

Our Client, a major Middle Eastern Banking Organisation with IBM 4341,  
4331 and System 34, is using MIDAS for the Treasury and Merchant  
Banking activities and KAPITI for domestic banking on the IBM hardware.  
They will be introducing the CAPBANK system on an NCR 8565 for the  
domestic banking front office applications.

This position is a new one and the objectives are:

- to assist the Data Processing Manager in the computerisation of the Bank's  
operating and administrative systems and to manage the Bank's ongoing  
computer operations including systems analysis, programming, data pre-  
paration, equipment operation and maintenance.
- to develop the long-term computerisation programme for the Bank and  
ensure that short-term recommendations are compatible with the long-  
term programme and to supervise systems analysis design and program-  
ming stages for all new systems.

The ideal applicant will have extensive systems development experience, very  
considerable banking experience gained on IBM and NCR equipment and a  
knowledge of the products being used. However, applicants with extensive  
systems development and management experience, preferably gained in a  
banking or financial environment on either NCR or IBM equipment, will also  
be considered. Experience in the Middle East would be an added advantage.

A very attractive package will be offered to include married or single status,  
free furnished accommodation, medical insurance, car allowance, leave  
flights, etc.

The Client will be in the UK to conduct final interviews during early December.

For further information, please contact Jenny Dalrymple-Hay or Ian Murray West on  
day, 01-493 2947 8am-10pm or weekends respectively Beaconsfield (04946) 4579  
Milton Keynes (0908) 563415. Quoting reference 5023.

DALROTH & PARTNERS LTD, 4 HALF MOON STREET, LONDON W1  
Telephone 01-493 2947

O'SULLIVAN ... "British people  
are more prepared to travel."

## Programmer

For the DEC 10 computer on system programming, giving assistance to Scientists.  
Applicants must have appropriate A-levels plus a qualification in computer science or  
corresponding experience, preferably in a research establishment or university.  
Gross annual salary from 105,000 FF (including 13th month) depending on  
qualifications and experience, plus expatriation, considerable settling-in (lump sum)  
and varied allowances, pension schemes and refund of travel and removal expenses.  
The Institute is situated in an Alpine environment and offers excellent sports facilities  
and easy access to Switzerland, Italy and the South of France.

Requests for all applications in writing to:

Carola J. Parker, Central Personnel Services Group, Science and Engineering  
Research Council, Polaris House, North Star Avenue, Swindon, Wiltshire SN2 1ET.  
Please quote reference ILL 83/25.

The closing date for the return of applications is 24th November, 1983.

# DATA PROCESSING

## HONEYWELL DPS 6

Our client, a major multinational manufacturing and distribution company, use Honeywell equipment at all their Continental locations. The UK company are about to install a DPS 6 under GCOS MOD400. COBOL will be the main programming language. The successful applicant will be totally responsible for all systems implementation and should:

- ★ Be fluent in COBOL and GCOS 400
- ★ Be capable of selecting and evaluating DPS 6 software packages and products.
- ★ Be capable of installing, customising and interfacing selected packages and products.
- ★ Have a solid commercial background particularly in the sales accounting and order processing fields.

This position offers an ideal opportunity to grow with an expanding company; some European travel is envisaged to co-ordinate and interface development of the TP facilities.

For further information please contact Jenny Dalrymple-Hay or Peter Henrick on, day 01-493 2947 8am-10pm or weekends respectively, Beaconsfield (04946) 4579, 01-390 1540 quoting reference 5024.

# Computer Operator

Bournemouth  
£6,000 - £7,500 Plus Benefits

Remuneration inclusive of Shift Allowance  
Salary is subject to review on 1 January 1984  
Benefits include relocation package and mortgage subsidy (where applicable), non-contributory pension, free life assurance, subsidised restaurant, sports and social club and staff discount shop.

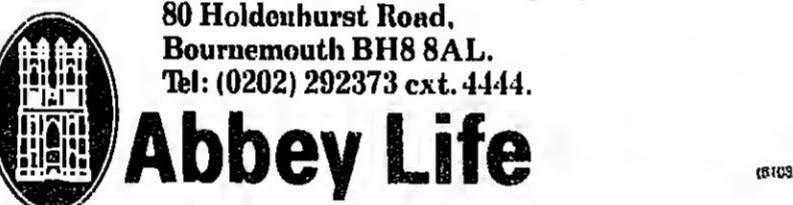

### Requirements

Abbey Life has a vacancy for a Computer Operator with a minimum of 1 years experience of MVS/JES2 (VS1 would be considered). Knowledge of JCL and utilities would be an advantage but not essential. 5 'O' levels (including English and Maths) are also required.

The Company operates a 5 day, three shift system, currently under MVS/SP on IBM 4341 and 3083 CPUS with ACF/VTAM, CICS/VS and ROSCOE.

Please write or telephone for an application form to:

Val Hastrop or Alison Davies,  
S. & D.P. Technical Recruitment,  
Abbey Life Assurance Company Ltd.,  
80 Holdenhurst Road,  
Bournemouth BH8 8AL.

# It Pays To Insure

Our American client is one of the world's largest insurance groups, operating in 130 countries, with assets in excess of \$9 billion and a turnover of more than \$3 billion.

Their UK data centre is located in Croydon and houses dual IBM 4341s with supporting minis and numerous micros, mainly IBM PCs. The D.P. department is currently supported by a staff of 40 but with so many new and interesting developments planned and in progress, there is an urgent need for your participation if:

- you are flexible
- you use initiative
- you are quick to learn
- you take responsibility
- you are a proficient programmer
- you are experienced in, or have an aptitude for, analysis

In return for your services, our client offers:

- Training in hardware/software as needed, including CICS, DL/1, Mark IV and Trans IV
- Experience of the insurance business and associated applications software
- Variety, responsibility and the opportunity to progress
- Extremely comfortable working conditions and a friendly atmosphere
- A generous benefits package including non-contributory pension scheme and life assurance, 50p luncheon vouchers and, after a qualifying period, free BUPA medical care.

# We're looking for top flight Analyst Programmers

Salaries to £11,500 P.A. & Relocation

Our client's name is known throughout the world. They manufacture, distribute and retail a comprehensive range of products for the industrial and domestic marketplace. At their South Coast Computing Centre, ongoing systems growth is now at a stimulating stage. On-line Sales Order Processing, COPICS, and Distributed Systems are but three of their more important developments.

The Centre currently utilises Rediffusion minis and micros, which are linked to an IBM 3083 under DOS/VSE, with CICS, DL1, COBOL, UFO, EASYTRIEVE and DATAMANAGER as software.

These developments are at such a progressive stage, that our Client requires additional ambitious d.p. practitioners to contribute to growth. Therefore, forward thinking analysis and

Recruitment Consultants

Our client is looking for two technically competent Systems Programmers who want to develop their skills in a mainstream IBM software environment.

The company has an IBM 4341/2 processor running under VM and OS/VS1, with CICS, DL/1, APL, ROSCOE & UFO. Early next year it will implement MVS in readiness for a processor upgrade and network support under SNA.

You should have at least 4 years' IBM DP experience and 18 months minimum as a Systems Programmer with in-depth knowledge of VM or VS1 or CICS. Experience of MVS would be an advantage for one post.

A competitive salary will be offered, based on experience, as well as ample training and a good benefits package expected of a large company. For further information, please write or telephone (24 hour answer service) quoting ref: CW103-3D. Applications are invited from either sex.

### Assistant Computer Manager

We are seeking an experienced analyst/programmer who is looking for a wider role in a compact, dynamic computer department.

The main function will be the development and implementation of new applications using CUPID, a 4th generation language, together with some work in Basic Plus.

The company is moving to a Systime VAX computer from a PDP11/44 serving a network of local and remote users. Experience with VMS will be a distinct advantage.

This is a new position and it will appeal to someone with about 5 years experience in computing.

The position carries an attractive salary and excellent working conditions.

Applications in writing with C.V. to Peter Meier, Personnel Manager, Anglia Television Ltd., Anglia House, Norwich NR1 3JG, quoting reference 825/G, to arrive not later than 18th November, 1983.

## EMPLOYMENT

# Job prospects pick up – but 13% of DP workforce is still on dole

The latest statistics look promising for employment, says John Aczel

OVERALL employment in the British computer industry has shown a much better trend since the beginning of 1983, following the shake out in staffing over the past few years. There has been a marked rise in the number of job vacancies in this sector, particularly for specialists in programming and systems analysis, and the employment prospects are forecast as promising for the next 12 months.

Up-to-date statistics about the level of employment are not easily available, and the official figures contain many gaps in this field. For one thing, unemployment figures are no longer available, as a result of the cutbacks in the collection of official data. No meaningful breakdowns are given by types of employees in the hardware sector and other related areas.

Nevertheless, the underlying trends can be analysed by looking at the overall situation affecting the computer hardware sector, as well as the latest figures for employees in the service sector. In the case of hardware firms, there were many cut-backs in employment during 1982, and, by the end of last year, employment fell significantly compared with the previous 12 months.

Due to changes in classification and other problems, it is not easy to monitor the longer term trends over the past five years, but it is believed that 1981 and 1982 represented the bottom of the employment cycle, with a marked reduction in staffing levels for a wide range of computer hardware manufacturers. Nevertheless, conditions by the beginning of 1983 had started to stabilise, and, by June 1983 the number employed in the hardware field was estimated at 58,100 people.

This total was increasing slowly, compared with the beginning of the current year, though it was marginally down when measured against the figure for the same period in 1982. Evidently, one should not read too much into these figures because of the statistical fluctuations which occur, particularly on a monthly basis.

Nevertheless, the heavy falls which had been experienced during the period between 1979 and 1982 have now been arrested and overall employment conditions have become steadier.

It should be stressed, however, that there has not yet been a major pickup in demand for employment in this field, despite the fact that production and sales of computers have been rising rapidly since the beginning of the year.

The official statistics give some idea of the breakdown of employment by sex. Though females represent only a relatively small proportion of the total, their numbers have been increasing faster than their male counterparts' numbers since the beginning of 1983. The number of female employees went up by 5% in the first quarter of 1983, while male staff increased by 2%.

Despite this growth, however, most hardware companies have

been reluctant to increase their staffing requirements and have placed major emphasis on increasing efficiency. Competition in the hardware sector has been fierce and companies have been concentrating on increasing turnover while keeping the same level of employees and, in some cases, even reducing them. Thus, there has been a significant rise in

was steady at the lower level. As mentioned earlier, information about the percentage of unemployed in the computer sector is not being collected any more by the Department of Employment, but it can be estimated roughly by various means. It is reckoned that about 12–13% of the total computer workforce is on the dole at present, though this percentage varies greatly according to the grades and skills of staff.

ing during this period. According to the CSA, the revenue per employee has averaged £27,600 by the end of July 1983 – considerably higher than that recorded in the previous year.

The official statistics published by the British government on computer services employment reveal some interesting trends, even though the data are somewhat dated. The proportion employed as consultants and senior programmers and analysts has been going up markedly. These two categories now account for over 45% of the total for full-time em-

ployees and marketing staff comes for particular mention."

It is believed that the situation has become even more critical in recent months and many firms who want to expand are seeing that the shortage of specialist people is inhibiting their growth.

The prospects for employment

are now much brighter than they have been for some time, but there are various bullish factors affecting the number of vacancies and staff requirements likely to occur over the next 12 months.

One important factor is that the growth in demand for most hardware and computer services will remain at a high level and will continue to grow at a rapid rate.

It is expected that demand for computer hardware will boom and could increase by at least 25% in value terms during the next 12 months. For some products, particularly for microcomputers, the rise will be even more significant and some commentators are forecasting a growth of at least 50% for this market.

A similar trend is also estimated for computer services and this sector could grow by around 20% in billings. Dr Doug Eyelins, the director general of the Computing Services Association, is bullish about the prospects for his industry and says that the buoyancy being shown at the moment is likely to be well maintained for some time, especially for software products and turnkey projects.

Part-time employment in the computer services sector has been gaining in significance, though it is believed to have remained compara-

NUMBER EMPLOYED IN HARDWARE INDUSTRY		No (000)
1st quarter 1981	59.1	
2nd quarter 1981	59.3	
3rd quarter 1981	61.1	
4th quarter 1981	58.9	
1st quarter 1982	59.1	
2nd quarter 1982	59.2	
3rd quarter 1982	58.9	
4th quarter 1982	58.3	
1st quarter 1983	58.2	
2nd quarter 1983	58.1	

turnover per employee during 1983 and this trend is likely to continue for some time.

The official statistics give some idea of the breakdown of employment by sex. Though females represent only a relatively small proportion of the total, their numbers have been increasing faster than their male counterparts' numbers since the beginning of 1983. The number of female employees went up by 5% in the first quarter of 1983, while male staff increased by 2%.

Despite this growth, however,

most hardware companies have

GROWTH RATE IN PERSONNEL FOR 1982 IN EUROPEAN COMPUTER SERVICES COMPANIES (excluding those involved in a merger or acquisition)				
	UK	France	W Ger	Netherl's
Operators and data entry	-6.3	-8.0	-2.4	-5.6
Consultants and programmers	9.2	4.6	6.2	8.3
Sales and marketing	11.3	6.8	4.0	5.8
Others	6.3	9.4	3.1	7.0

Possibly, this growth was too high because of the change in the nature of the sample, as well as the fact that some smaller companies outside the CSA did not take part in the investigation. Nevertheless, it is quite clear that staffing levels among computer services companies have been rising, particularly since the end of last year.

Another source is *The Seventh Annual Survey of the Computing Services Industry in Europe 1983*, published by the European Computing Services Association. According to this survey, the growth in employment in the UK for computer services firms rose by nearly 6%, though it varied considerably according to the type of personnel.

There has been a further fall in employment among operators and data entry staff, while both sales and marketing personnel have increased by an above average rate. Consultants and programmers saw a big rise in 1982, averaging over 9%.

These figures should be treated with some caution, due to the relatively small sample, but it appears that the UK has been showing one of the fastest growth rates in employment, compared with its European competitors. In terms of staff, UK firms have out-paced France, West Germany and the Netherlands during 1982.

Taking Europe as a whole, the average growth in employment for computer services companies was around 3% while the rise in consultants and programmers averaged 7.6% and for sales and marketing personnel 5.2%.

Efficiency among British computer services companies has also been going up, despite the fact that numbers employed have been ris-

## EMPLOYMENT IN HARDWARE SECTOR DURING 1983 (000)

The person our client is looking for is probably quite happy at present as a senior member of a busy team.

With the exacting standards required we think you are likely to be of degree standard with three to five years relevant experience. Whatever age you are, it'd be well worth your first management role, one where you will be involved with customers of every stage from initial contact to acceptance of equipment, where you could run several projects simultaneously and where you can contribute your positive views and considered opinions.

We quote our salary simply because the exact figure depends on you and your ability to demonstrate your expertise. Our client offers a comprehensive list of benefits which includes very generous assistance with relocation.

Find out more. Either send full details to me at the address below or phone me at home this Sunday on 0992 442505 between 10 and 5 (reverse charges as necessary). I look forward to explaining why you'll be even happier in your next job.

Andrew Millhouse, Ref: 246, Deansgate Management Services, 52 Bedford Row, London WC1R 4LX. Tel: 01-405 1260 or 01-405 1220.

## DEANSGATE MANAGEMENT SERVICES

## HP300 ANALYST PROGRAMMER

Foster Wheeler Energy Limited, one of the world's largest petrochemical contractors, is looking for an Analyst/Programmer to provide technical advice and support for the development and marketing of their highly successful personnel computer system. This is an unusual job, with greater breadth and responsibility than is normal at this level — the key requirement being a creative and imaginative approach to development work.

In-depth experience of the HP300 is essential, as is problem-solving ability. The main language is FORTRAN. Knowledge of SPL and IMAGE, and familiarity with the pros and cons of application generators would be an advantage. The job involves a wide range of activities from technical investigations and evaluations, through discussions of problems with clients, to systematic planning and scheduling, analysis and programming.

Suitable candidates are likely to be aged 25 to 35, self-motivating, with the ability to work well in a closely knit team of mainly non-DP people.

We offer an attractive salary, flexible working hours and free membership of our sports and social club.

Please write to Rosemary Manning, Personnel Department, Foster Wheeler Energy Ltd., FREEPOST, Reading RG1 1BR, or telephone Reading (0734) 585211.

**Foster Wheeler Energy Limited**

## TREND IN FULL-TIME EMPLOYMENT FOR STAFF IN COMPUTER SERVICES

	% of total employment 1982	% of total employment 1981
Consultants	3,022	12.3
Programmers/analysts	8,157	33.1
Computer operators	2,851	11.6
Data control staff	929	3.8

Administrative staff	3,117	12.6
Marketing executives	2,040	8.3
Others	2,836	11.4

## SOFTWARE PROJECT LEADER

The person our client is looking for is probably quite happy at present as a senior member of a busy team.

We know we have a job on our hands, that people like you are extremely hard to find and are relatively expensive to employ. We also know that your present employer may bend over backwards to keep you should you decide to leave.

**SO WHY BOTHER?** Well, our client (a major electronics communications company) believes that the job, the interest and the future career prospects on offer are enough to attract even the most selective real-time software specialist keen on broadening his/her horizons. They offer:

- New VAX 11/780 for software development, running under VMS 3, plus the usual micro development systems
- Top flight professional colleagues
- Systems which include 8086, TMS 9900 and 1802 in a broad range of civil and military applications
- Languages including CORAL, PLM and Assembler.

You'll be involved in embedded systems connected with the expanding technology related to Air Traffic Control and in order to cope

## ANALYST DEC/FINANCIAL

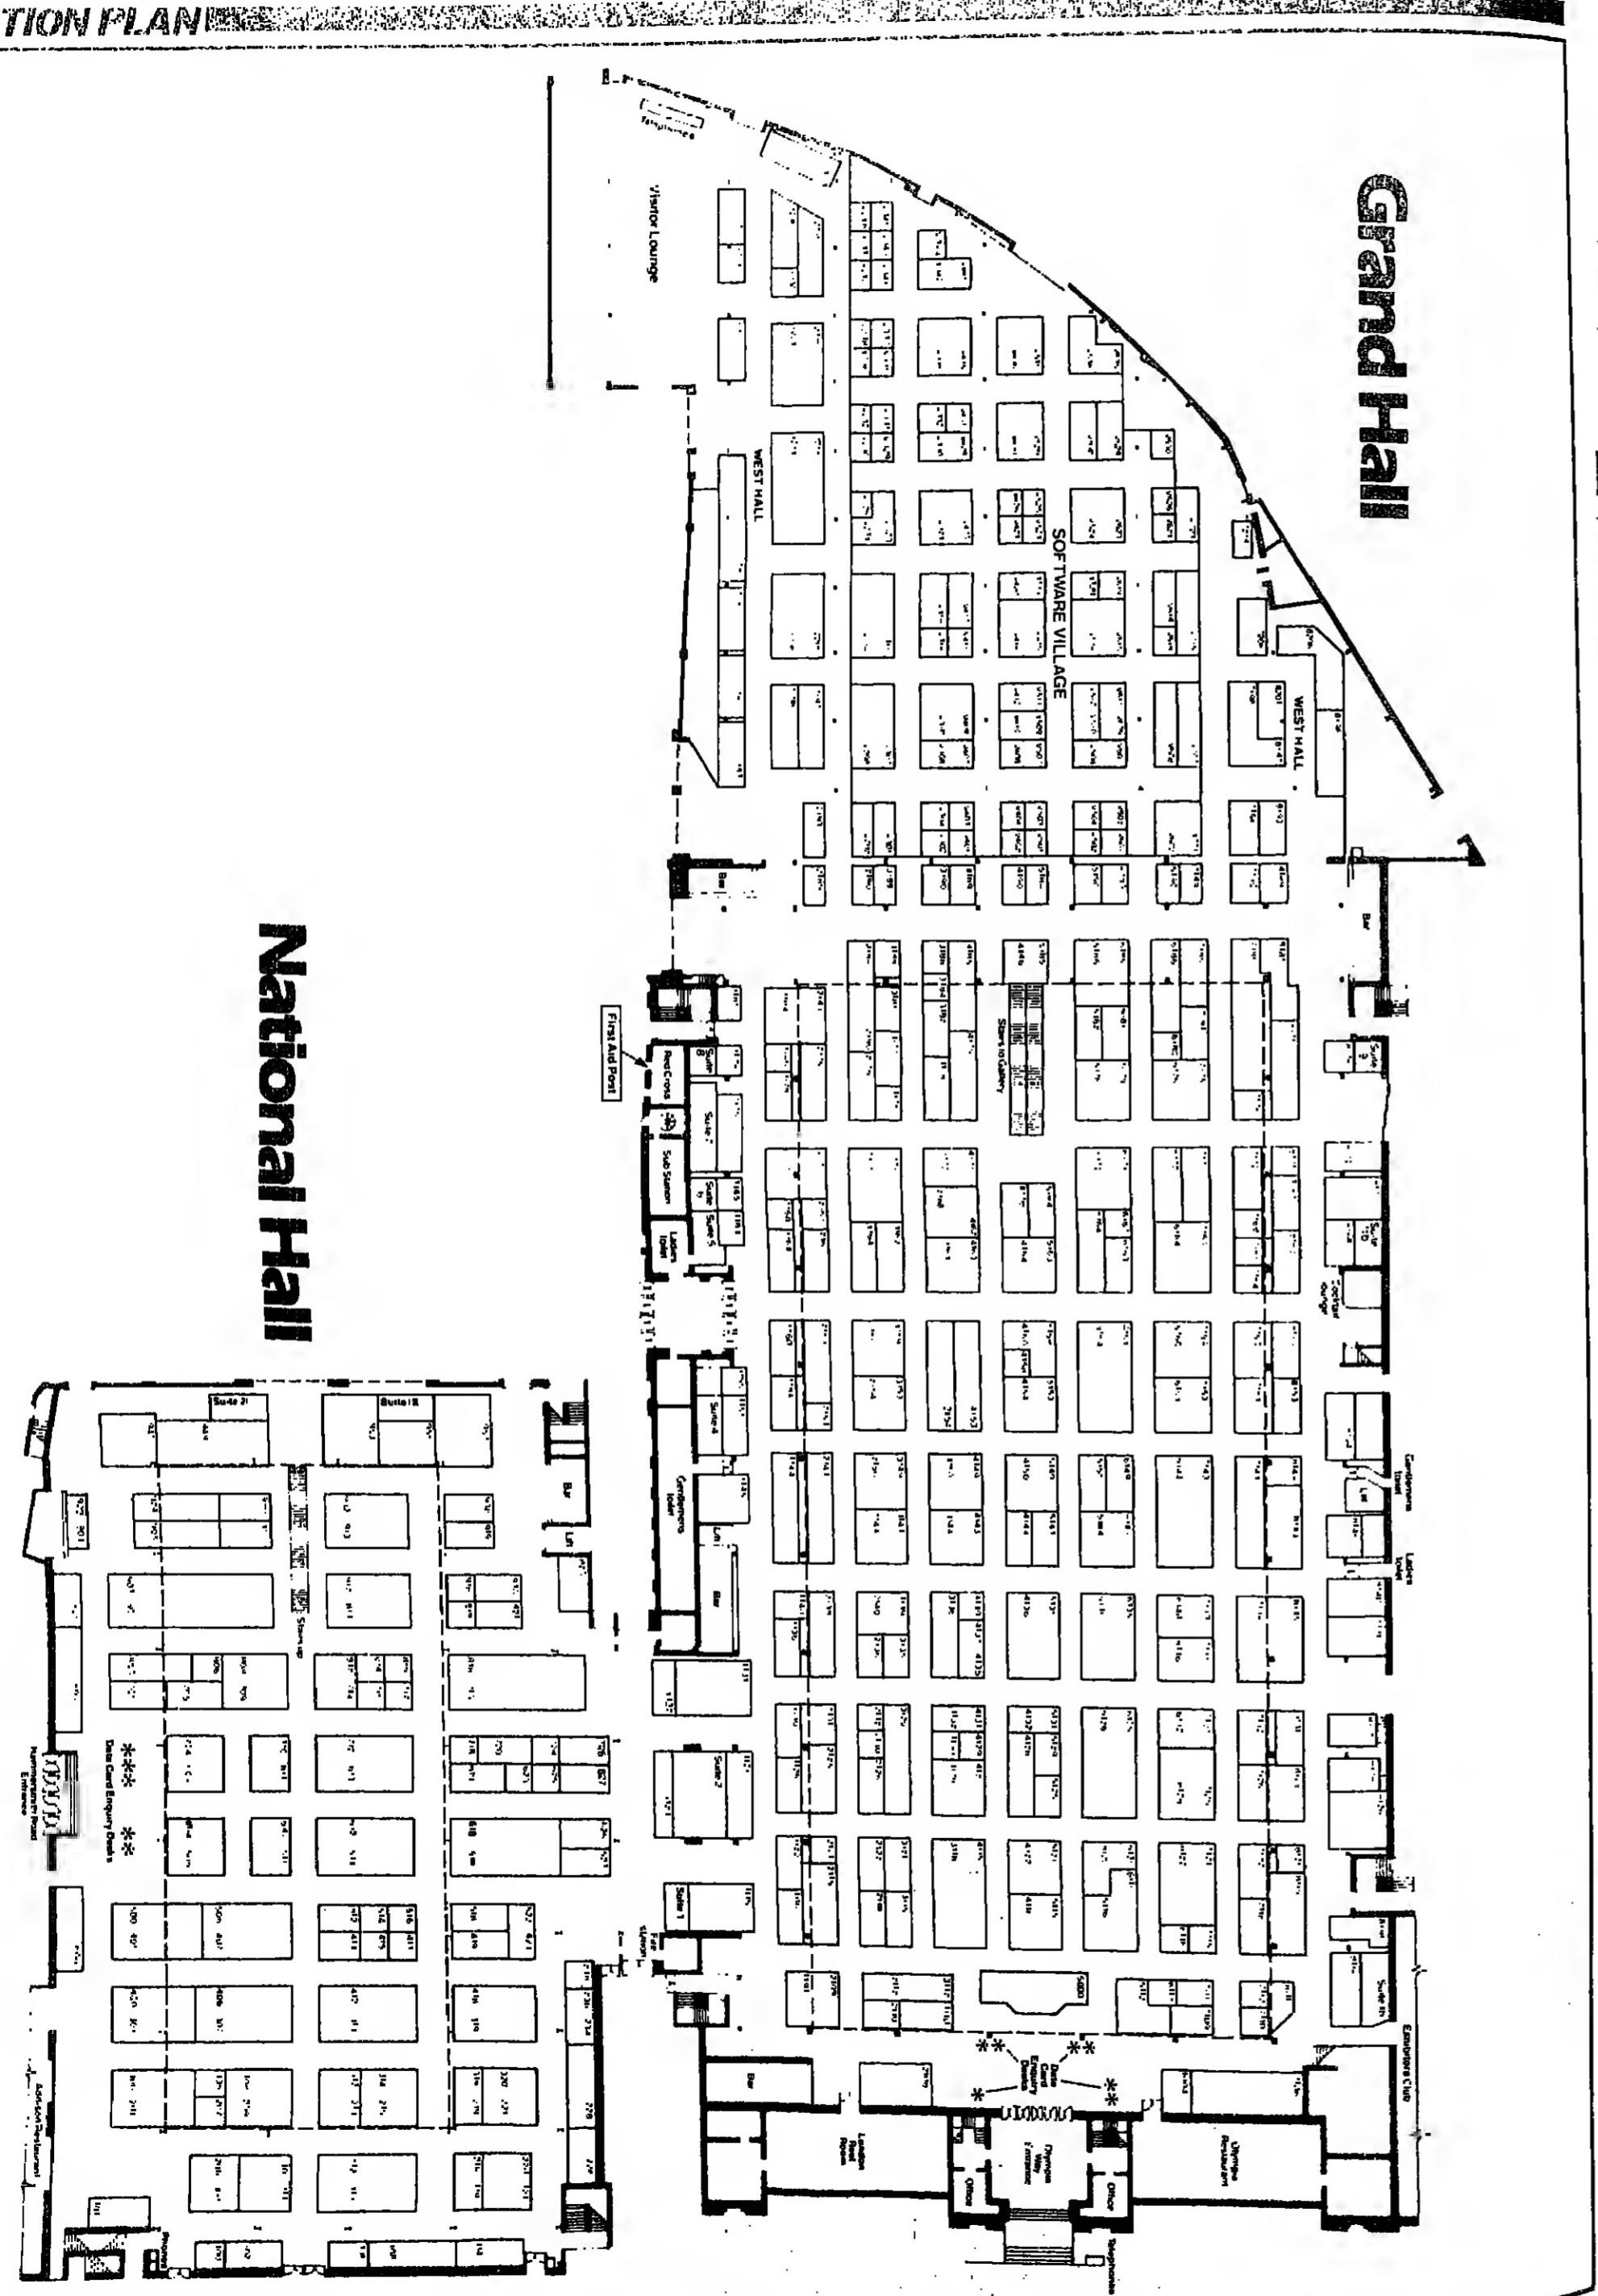

to £13,000

A well known City financial concern requires an Analyst to be involved in the development, implementation and marketing of their on-line real-time systems. They seek a young Analyst with around two years' financial applications exposure, accounting systems being of special interest to our client. This position affords the opportunity to be involved at an early stage of the development and make a heavy impact on this and future projects.

# BRITAIN'S PROFESSIONAL COMPUTER SHOW

This month, it's Compec 83, Britain's biggest ever professional computer exhibition.

From November 15 to 18.

For four days at Olympia, London, over 500 companies are showing the systems, services, software and supplies that are key to the future success of your operation.

## Every computer professional and serious user needs to know what's on show at Compec.

There's no other exhibition with the sheer quality, scope and size of Compec. There's no other show with so many leading names: IBM, ICL, Digital Equipment Co. Ltd., Acorn Computers, Sinclair Computers, Hewlett-Packard, Newbury Data, Norsk Data—and hundreds more.

Compec covers mainframes to micros, modems to matrix printers, media to minis, and much more.

And it's all under one roof, expressly to help you see and select what's your next step in computing.  
Get to know what's going on in the industry.

Spend a day this month at Compec. Admission is just £3.00, with tickets available at the main entrance.

There's no doubt, whatever your interest, whatever your need, it's at Compec 83.

Are you a senior sales executive seeking an attractive and rewarding position in sales management? Our client is a dynamic young company wishing to appoint a London based Sales Manager. Your expertise must include a successful track record in mini-computer sales to major accounts. Ref F184

Our client is a major British manufacturer marketing telex message switching and network management systems. Their 1984 plans include the recruitment of Sales Executives with in-depth experience of communications systems sales, to either small business or major account customers. Ref F195

A major computer manufacturer currently expanding their sales operation throughout the UK require experienced business systems sales people, with a good understanding of the mainframe and large minicomputer market place. You must be able to demonstrate a proven capability to handle major accounts and generate new business. Ref F188

We have many opportunities available to successful sales executives at all levels of hardware, software or business systems sales. All sales personnel with above target performance for this year should contact us to arrange a meeting to discuss your own prospects for 1984. Ref MM1

For more information and an immediate interview contact FRED BRAMLEY on Farnborough 516141 during office hours, or Reading 345588 evenings and weekends.

A major financial institution has engaged our services to select a professional for this senior appointment. You should be able to prove your effective management expertise together with a comprehensive background in IBM DOS Systems Programming. Reporting directly to the MSM you will have responsibility for the systems and operations section and should have the ability to motivate them into effective and efficient teams. Ref J190

One of our most respected clients, a leading insurance company offer a unique career opportunity for a programming team leader to gain management experience whilst retaining the essential technical role necessary to maintain standards, procedures and quality control of design and programming. Ideally you should have proven expertise in IBM COBOL in a DOS environment with CICS and OLE. Ref J175

Our client, an international organisation currently expanding their development in various European sites, offer interesting career opportunities to COBOL Programmers or A/Ps with ADF experience. European travel will be involved and the necessary training will be given to those meeting the desired standards. Ref J191

We have been commissioned to assist our client, currently developing their on-line database system, in supplementing their programming team. They offer an excellent opportunity for IBM COBOL Programmers to gain database experience. Ref J116

Contact PETER JEZEPH on Farnborough 516141 during office hours or at home on Guildford 34718.

# BIGGER. BETTER. BE THERE.

COMPEC, OLYMPIA, LONDON, NOVEMBER 15-18 1983.  
A Computer Weekly EXHIBITION

## COMPUVAC

### DEC POP & VAX (COMMERCIAL)

**ANALYST/PROGRAMMER BERKS.** £9,000-£12,000+  
If you like lots of user contact and enjoy problem-solving, an international organisation, offering a range of VAX, are looking for BASIC and C/EC experience for a position where you will be involved in various small and large projects and no two days are the same. Excellent career path and perks. JHC/W

**8000 GOOD RICHMOND LONDON** £9,500 + FREE HOLIDAYS  
Are you really involved in a monotonous maintenance routine? If you want to work on YAX, be involved in development and have free holidays? If you have the personality for user contact and are looking for a challenging and busy environment, my client needs you for position whose initiative is rewarded with excellent career prospects and free holidays, etc. JHC/W

**MUMPS OR MICR SURREY/MIDDLESEX** £9,000  
Renown company has a requirement for a MIC or MUMPS Programmer to work with VAX, other MINIS and MICROS in an on-line environment. You'll be involved in the development of commercial systems in an installation offering good benefits including relocation. JHC/W

**ICL DME/VME ANALYST/PROGS.** TO £11,000 + PERKS  
Two positions vacant in South London site currently running under CMC. Requirements are four years+ ICL background, ideally with a knowledge of VME and on-line systems with tangible evidence of Analysis from design stage. MN/CW

**ICL ME29 ANALYST/PROGRAMMERS** TO £11,000 + PERKS  
Two London installations require experienced ME or 2804 staff with knowledge of on-line systems using either TPS or TPMS. Some exposure to Analysts work is essential—supervisory experience required for one position. MN/CW

**ICL VME8 CONSULTANTS** TO £15,000  
Mid level job requires excellent VME8 skills with IMOS/TP experience. Applicants must have tangible Analysis and current COBOL programming skills. Salaries excellent—locations either Central or West London. MN/CW

### IBM

#### IBM SYSTEMS ANALYSTS

A number of our clients in the centre of London are looking for experienced IBM System 34 or 36 Systems Analysts. Applicants should have proven experience of designing on-line systems, preferably in a banking/financial environment. A previous financial programming background using COBOL would be highly desirable. RC/CW

#### IMS SYSTEMS PROGRAMMERS

TO £17,000

Candidates will have at least three years' Systems Programming experience on either an IMS or VSAM system. Experience of working with a multi-user environment. You will be responsible for handling all queries relative to the Database Technical Support Group and therefore, must have seen a major project from feasibility through to implementation. RC/CW

#### IBM SYSTEMS 34 and 36

£9,000-£12,000 + BENEFITS

If you are an ambitious Programmer or Analyst Programmer with 3 years' experience using RPL/I or RPG/II in a financial environment, you will be of interest to a couple of our major clients in the centre of London. Both companies offer further training, where necessary and a complete benefits package. MB/CW

#### TRAIN IN CICS & DB/2 OR DB/2000

TO £10,000

A number of our clients based in London and the Home Counties are actively looking for Programmer and Analyst Programmers with between 12 months and four years' experience in IBM Systems wishing to learn on-line and database techniques. If you have a good applications background we would like to hear from you now. MB/CW

#### PRIMOS SYSTEMS

£9,000-£9,000

My client requires two Programmers with two yrs MACRO-II and G502

#### ASSEMBLER

Experience in a lot of areas. Software Engineers, Systems Engineers, hardware, Network and Telecom Engineers. Analyst Programmers— you will have a good degree related to your chosen area and at least two years solid job experience in the computerised industry. RC/CW

#### CITY

£8,000-£10,000 - SUPA

ASSEMBLER. Equipment on DEC POPs and runs under RSX/IM. A block structured language is also necessary. C, PASCAL or ALGOL. FORTRAN IV is a plus. MB/CW

#### HANTS

A rather rural position. A Systems Programmer is required who is fluent in FORTRAN, ASSEMBLER to support PRIMOS systems. They might train an applications programmer who has been involved technically in PRIMOS systems. MB/CW

#### DPII AND LSI ENGINEERS

£9,000 OPEN

My client requires an experienced DEC Microframe and LS1 engineer. MB/CW

#### PROJECT MANAGERS

£9,000 OPEN

My client requires a Project Manager with experience in a financial environment. MB/CW

#### OTHERS

£7,000-£12,000

My client requires a Programmer & Analyst Programmer

#### ANALYST PROGRAMMERS

£7,000-£12,000

We are currently seeking to recruit Programmers and Analyst/Programmers with at least one year's experience of any mini or micro kit using COBOL, FORTRAN or BASIC, for a large variety of clients in all areas. Environments include manufacturing, commercial, financial and government houses. Salaries dependent upon experience. MB/CW

#### S.E. ENGLAND

£8,000-£12,000

We are being retained by several clients to recruit Burroughs professionals at all levels for vacancies in London and Home Counties. Positions available range from Programmer (two years+ experience) to Senior Systems Analyst and Project leaders. Preference given to applicants with Burroughs Link experience. Environments are mainly commercial and software houses. Salaries negotiable by experience. MB/CW

### TECHNICAL

#### SCIENTIFIC, TECHNICAL & COMMUNICATIONS DIVISION

I need top-class Computer Professionals to contact me now by sending their very detailed c.v.'s. Some of you will be available now, some of you will be available in a later date. Software Engineers, Systems Engineers, hardware, Network and Telecom Engineers. Analyst Programmers— you will have a good degree related to your chosen area and at least two years solid job experience in the computerised industry. RC/CW

#### CITY

£8,000-£10,000 - SUPA

ASSEMBLER. Equipment on DEC POPs and runs under RSX/IM. A block structured language is also necessary. C, PASCAL or ALGOL. FORTRAN IV is a plus. MB/CW

#### HANTS

A rather rural position. A Systems Programmer is required who is fluent in FORTRAN, ASSEMBLER to support PRIMOS systems. They might train an applications programmer who has been involved technically in PRIMOS systems. MB/CW

#### PDP11 AND LSI ENGINEERS

£9,000 OPEN

My client requires an experienced DEC Microframe and LS1 engineer. MB/CW

#### PROJECT MANAGERS

£9,000 OPEN

My client requires a Project Manager with experience in a financial environment. MB/CW

#### DATA PROCESSING SPECIALISTS

£9,000 OPEN

My client requires a Data Processing Specialist with experience in a financial environment. MB/CW

#### CONTRACT

BURROUGHS CMS COBOL - SIX MONTHS

We have a number of contract requirements in London/South East for Programmers and Analyst Programmers to work on the development of various commercial systems. SF/CW

#### IBM 0100 OPX - PRIMOS AND DESIGNERS

An Opportunity to Train

Ideally these London-based contracts call for a number of experienced OPX Programmers and establishment/upgrade Designers to start NOW: DEC/JJAN. In addition, our client will run contracts with non-CMS backgrounds willing to learn a new machine environment. SF/CW

**TRAINING**

# Pass on that skill — it's rewarding for the extrovert

**John Charlton looks at the prospects for those who might be tempted by a career in training DP recruits**

ONCE upon a time, as long ago as the 1970s, there were plenty of vacancies in the private sector for anyone who could teach Cobol. In the harsher climes of the 1980s the call is largely for those who have much more substantial skills.

BIS (Business Information Services) is based in London, and runs over 300 courses a year, covering a wide range of data processing subjects. For many of these courses BIS uses specialist consultants, but it is always glad to hear from highly skilled and experienced people to join its own team of lecturers.

Michael Hunt, BIS' personnel manager, told *Computer Weekly*: "We are very interested in hearing from people with experience in real time systems design, database design, and distributed processing."

Vacancies at BIS depend on the expansion of courses — and the number of lecturers who might resign at a given time.

Hunt says: "Normally the resignation process creates four to six vacancies a year."

BIS is looking to fill three vacancies before Christmas with staff who have substantial experience in the above areas. Salaries depend on experience.

Most of the large hardware manufacturers run courses cover-

ing potential to teach well. They are not that easy to find.

"At DT we recruit staff with a minimum of three years' experience in programming and/or systems design. Our programme courses are geared towards mainframe users, and we teach Cobol, Assembler and PL/I. Our systems design teachers give courses in structured systems design, and pupils range from beginners to those with a few years in DP."

New staff are allowed two to three months, depending on progress, to settle in to the job.

They receive training in instruction methods and techniques, sit in with an experienced teacher, take part of a course, and are then usually ready to undertake responsibility for a complete course.

Currently the company is seeking two to three new staff to teach systems design, but would also welcome enquiries from experienced programmers. Salaries start from £9-15,000.

Teaching apart, lecturers must have the confidence to deal with management on a one-to-one basis. After a course is completed the teacher visits each student's boss to report on his/her performance.

Salaries for instructors at Honeywell lie in the £6-15,000 range. Obviously it all depends on experience. Those at the bottom of the scale are recent university graduates. An experienced DP professional can expect to come much further up the salary ladder.

Control Data has built a sound reputation in the DP training field. For many years it trained Tops programmers, but it does less work in that area now, although it still teaches a number of manpower service commission-sponsor courses.

There is a clear progression process at Control Data training institutes. The career tree starts at junior lecturer, the next step up is principal lecturer, above which there is an institute manager. A typical Control Data Institute has two institute managers, one for hardware and one for software. At present there are six institutes in London, Birmingham, Bristol, Nottingham, Leeds and Stevenage.

Control Data's Paddy Carlin said: "The vast majority of our hardware instructors come from the armed services, particularly from the RAF and the Royal Navy. Most have quite a lot of experience, varying from 10 to 15 years."

"On the software side we tend to recruit people with about three years' experience in Cobol. We tend to find a very low turnover among our teaching staff, and most of our instructors have been with us for five years or so. Presently we have one vacancy for an instructor in programming."

Training offers the data processing professional the opportunity to pass on his skills to others, a worthwhile reward in itself, and in some fields pays rewarding salaries. But it is a career for the extrovert. To stand in front of a class which may include some high ranking and well qualified students demands someone with a positive, confident, and outgoing personality.

We welcome enquiries from people with good hands-on experience who want to move into training. Salaries depend on depth of experience.

*"I blame it on the system. On my last stretch I did a computer course, and now I'm in for computer fraud."*

Hunt says: "We pay the market rate for the job. For example, a teacher of systems design can expect to earn about £12,000 a year, but it all depends on experience. For instance, the 30-year-old with four to five years' good experience in systems design could get £14,000."

Apart from a good depth of relevant DP experience BIS looks for people who can communicate. As Hunt puts it: "There are lots of people who want to teach, but lack DP skills, and vice versa. That's the Catch 22 in this business."

The call for good experience is echoed at the London offices of Data Training, founded 12 years ago, and based in the Holborn area of London. It conducts 400 to 500 courses a year, mostly in programming, systems analysis and design.

The managing director Peter Curran says: "I am always glad to hear from people with a good depth of experience who have the

## RESEARCH AND NEW PRODUCT DEVELOPMENT COTSWOLDS

### REALTIME SOFTWARE ENGINEERS COMPUTER SCIENTISTS SYSTEMS ENGINEERS SEMI-CONDUCTOR PHYSICISTS MATHEMATICAL MODELLERS

Our clients have created an elite Research Department and require innovative people who can formulate concepts and translate them into commercially viable products.

Projects will include Artificial Intelligence and Knowledge Based Systems, CAD and Imaging Systems, and Integrated/Fibre Optics for applications.

Opportunities exist at all levels for professionals with the ability to provide a positive contribution to new product and technology research.

Salaries will reflect the importance of these positions and full relocation expenses are available for those moving to this very attractive rural area where houses and cottages are still sensibly priced.

For an informal local discussion telephone, in confidence, IAN BAKER on Bristol (0272) 277195 or alternatively write enclosing detailed c.v. to:

## Computer Manager

Barrow-in-Furness  
£9,060 to £9,660

Cumbria County Council invites applications from men and women for Computer Manager at Barrow-in-Furness College of Further Education. The post involves all day-to-day control of the college's operational control, teaching and research, the functions of operational control, systems analysis and programming. At present the college runs a DEC VAX 11/780 computer running under VMS and has a DEC 3032 and a DEC 3010 connected to a VMEbus system. It also has a VMEbus system and a VMEbus system. Applications should preferably have two years' professional computer experience with mainframe systems running BASIC.

Full details and application form, returning by 21 November, from Vice Principal, Barrow-in-Furness College of Further Education, Howard Street, Barrow-in-Furness. Please enclose a self-addressed envelope.

**JOB IN MICROS**

# How to migrate from mainframes

By the end of the decade the industry will need 50,000 micro programmers... Judith Morris reports

WITH all the current excitement about the micro revolution and the prosperity it promises, programmers toiling away in large mainframe installations could be excused for thinking that their days are numbered.

But for all the noise, many Cobol programmers' jobs have remained much the same throughout this period of change, and the demand for these staff - as witnessed in the job advertisements in journals such as this - show no signs of abating.

This puts the traditional programmer in a bit of a quandary. Does he stick with the sort of job he knows is, at least, secure and reliable, or does he quickly equip himself with micro programming skills to insure against the future?

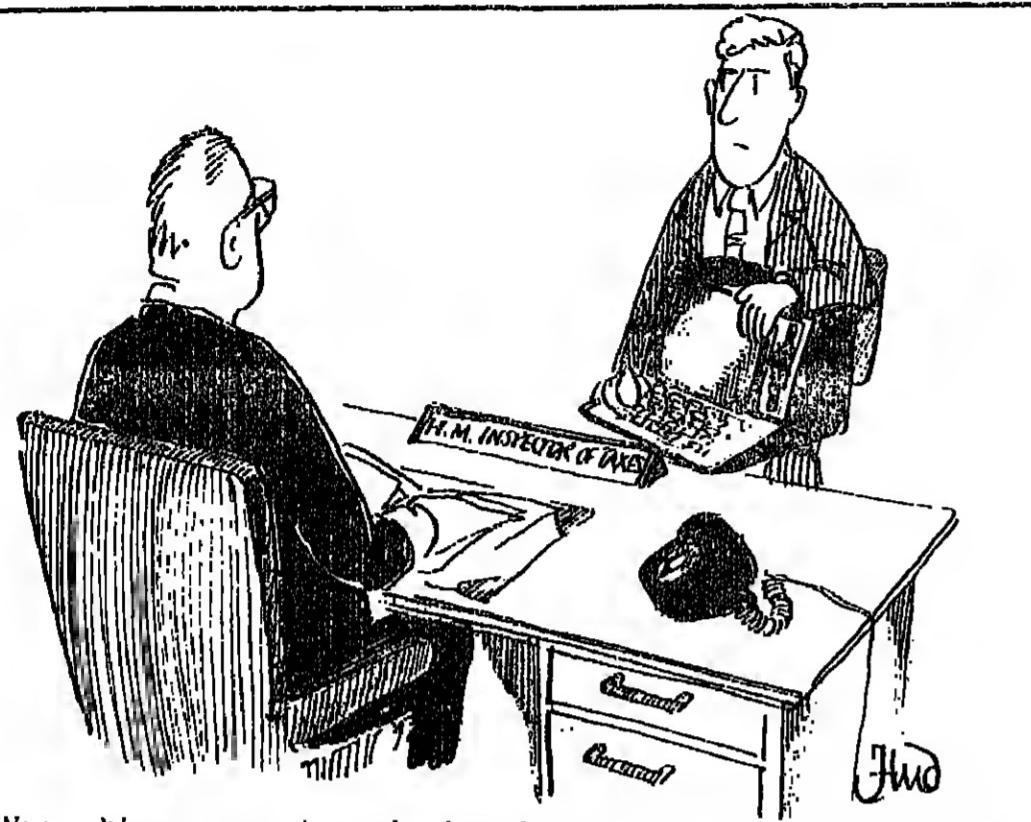

And, more importantly, how on earth does he do it?

There is a national shortage of microcomputer programmers, for the simple reason that the micro boom came upon us so quickly there was little time for training bodies and industry to react; also, a large but persistent crew of what used to be known as "hobbyists" sat down and produced micro software at a spanking pace.

Alcirus has also been responsible for a great change of emphasis in organisations which traditionally revolved around a large centralised DTP department.

More and more managers are using their own micros on their own desks, and even attempting simple programs for them, with the result that a central body of programmers is not really getting a look-in in the micro scene.

"It is difficult for programmers to find the time to learn about programming micros," explained one

"No we can't let you treat your micro as a dependent, and as it does the work of two people we expect it to make a tax return."

concerned DP manager. "We rarely get to know who has personal computers in our organisation, and we in the DTP division are the last to get to use them. It is extremely unlikely that, say, a Cobol programmer would start in learn micro programming in an organisation such as this."

So how do programmers make the migration from mainframes to micros, and what sort of jobs can they expect when they have done it?

The most obvious route is to get a job with one of the UK's successful software houses, such as CAP, Logica, or perhaps a micro software company like Peachtree which has recently recruited a

large group of programmers and other staff in this country.

They have traditionally had to rely on programmers trained in the mainframe world because no micro programmers have yet been produced.

But although it might seem fairly natural that mainframe programmers should be expected to

Hobbyists who have paid out

their own money for a system are also more conscious about software, and are more prepared to sit down and write their own code than fork out more money for programs.

This training has taught the hobbyist to define his needs and write programs to meet those requirements from scratch with limited resources.

Grant feels particularly strongly about the subject because he claims there is a massive shortage of micro programmers and the need for them will grow rather than diminish. He also says there is widespread ignorance about the fact, and that government and industry alike are turning a blind eye.

Companies are buying micros left, right and centre in the present wave of enthusiasm, but few are paying sufficient attention to the fact that they do not have enough staff to program them.

Bin Grant recommends the hobbyist as the ideal recruit for firms seeking micro programmers, because mainframe programmers have developed a number of bad habits over the years which it is difficult to break when it comes to working with microcomputers.

Hobbyists have usually started as enthusiastic amateurs and progressed to full-time positions. But again, there is no hard and fast rule. One manager of a UK software house said that as far as he was concerned, things are changing so rapidly in the computer world generally and the micro world specifically, that no-one can be expected to have relevant experience for a particular job.

Judith Morris is editor of Computer Talk.

their own money for a system are also more conscious about software, and are more prepared to sit down and write their own code than fork out more money for programs.

This training has taught the hobbyist to define his needs and write programs to meet those requirements from scratch with limited resources.

So it would seem sensible for programmers who are serious about micro programming to get their hands on a micro first, and write some basic applications to it, arming themselves with some

experience before jumping in.

If you are keen to develop your career in a stimulating environment at the forefront of technology then write with your qualifications, curriculum and personal details to:

## PROCESS CONTROL ANALYST LOOKING FOR A CAREER STEP IN ADVANCED TECHNOLOGY?

We are the UK's major manufacturer of optical fibres for tele communications equipment. An Anglo-American partnership operating in ultra-modern, purpose-built premises. Our computer section is already expanding and we are now looking for a sound and enthusiastic man or woman to join us.

You will have 3-4 years experience in writing real time software in a process control environment, using a high level language preferably Fortran. Experience on DEC computers would be an advantage.

You will assist in the continuing development and maintenance of a laboratory distributed process control system, using PDP 11/41's, 11/34's, LSI 11/23's, LSI 11/23's and VAX's.

The benefits package reflects our progressive company policy and includes competitive salary, 25 days holiday per year, private medical insurance, and a full free relocation package (in appropriate cases) which includes generous help with legal, educational and removal fees, together with a disturbance allowance of 15% of salary.

If you are keen to develop your career in a stimulating environment at the forefront of technology then write with your qualifications, curriculum and personal details to:

## SENIOR SOFTWARE ENGINEERS

NEWBURY - BERKSHIRE

### ATTRACTIVE SALARIES : RELOCATION ASSISTANCE

The Micro Consultants Group is a world leader in the design, development and manufacture of interactive video imaging systems and data acquisition equipment.

We need Senior Software Engineers to be responsible for the designing, writing, testing and documenting, test and verification software for the manufacture or servicing of any of the company's products.

Suitable candidates should have at least 2-3 years' experience of real-time engineering or scientific software, including experience in the commissioning of software on untried electronic systems. Experience in using DEC equipment together with experience in Software documentation is essential. A formal Computer Science or Electronics qualification, a degree or HND/HNC, is desirable although not essential for those candidates with proven track records.

This position requires Software Engineers with a high degree of self-motivation, so if you fill our requirements please write or telephone for an application form to: The Personnel Officer, Micro Consultants Group, 17 West Mills, Newbury, Berkshire. Tel. Newbury (0635) 48222.

Have you dug deep into your profession?

We have clients, nationwide, who are seeking professionals with in-depth experience in one or more of the following disciplines:

Communications (i.e., data/voice/tele, local area networks, protocol), Industrial Control, Manufacturing Systems, E.P.O.S., CAD/CAM Systems, Major Database Management Systems, Artificial Intelligence Systems, EXPERT Systems, Operating Systems, Image Processing, M.o.D. Systems (i.e. radar, avionics, command & control, navigation, electronic warfare, ADA, MASCO) etc.

We expect you to have high academic qualifications together with a minimum of 4 years post academic experience (for senior management positions we seek 10 years plus). Requirements are for Software Engineers/Designers up to Principal Consultants and Management level. For some of the managerial posts exposure to sales and marketing and good business acumen is also essential.

Experience of DEC PDP-11's, VAX, Hewlett Packard, Data General, Argus, Intel, Motorola, Texas Instruments, etc., together with relevant operating systems, experience of UNIX would also be most acceptable. You must also use an Assembly level language as well as one or more high level languages e.g. PASCAL, FORTRAN, COBOL, RPL, etc.

Clients are: Users, Computer Manufacturers, Consultancies and Systems Houses, located not only in London and the Home Counties, but the rest of England and Scotland too. It seems we are asking a great deal from you, but the rewards for such quality of experience and intelligence are manifold. Not just excellent salaries but interesting and challenging work, where your mind and ingenuity will be stretched and demands on your expertise will be high.

Early response could mean you having an exciting new job lined up for 1984, what better way to start the new year. Telephone Beryl McLaren, 01-836 9719, any hour of the 24 (weekends too) you'll get a personal reply, not a recorded message.

# Pay rises by 8.1% and 1984 looks good

John Aczel analyses salary trends — and says the jobs boom is set to continue

SALARY trends in the computer sector have shown an above average increase and have speeded up over the past year. The outlook for further rises also looks promising for 1984, especially as the boom in vacancies for skilled staff is likely to continue during the next 12 months.

According to a survey carried out by the *Computer User's Year Book*, salaries have gone up by an average of 8.1% for the 12 months ended April 1983 compared with a growth of 7.7% in 1982. Retail prices advanced by only 4 to 5% during that period.

The investigation by the CUYB covers over 1,150 computer installations with a total of about 19,000 staff. The survey itself is broken down into various job categories ranging from data processing managers to junior programmers and operators.

Overall, the breakdowns are given in terms of 21 job categories and the salary range in 1983 was from £3,700 to over £13,700 a year. Breakdowns are also provided by regions and by job location.

This investigation, though very detailed, contains certain limitations. The figures are not as up-to-date as one would like. Considerable variations can occur in salary movements even within a short time, and obviously there have been many exceptions to this rule.

Some of the biggest increases have occurred for specialist staff who offer highly skilled services. Senior systems analysts and operations managers have seen rises in earnings of more than 10% on an annual basis. A marked growth in earnings for lower paid personnel has also taken place. For instance, data control supervisors have recorded a rise of over 11% while

British industry, the computer sector as a whole has moved slightly faster than average. It is estimated that the basic salary in British industry rose by 7.5%, whereas the average increase for computer personnel has been over 8%. But such comparisons have to be treated with care, particularly because of the time element involved in any analysis of this kind.

At present, the gap between salary rises for computer staff and the rest of British industry has widened and earnings for computer personnel are now considerably above average, resulting from the sharp increase in demand for computer staff in recent months.

Fringe benefits now play an integral part of staff remuneration, especially at the managerial level. Company cars are becoming quite widespread in industry and a significant proportion of computer managers now receive this benefit as a matter of course.

According to the survey the overall percentage of DP managers with company cars has remained fairly steady during the beginning of 1983. Thus, 54.4% of all managers had a company car during the current year.

There has been a big increase in company cars among computer managers with salary of over £19,000 a year.

One factor which emerges from the Reward investigation is that some of the high flyers in the computer industry have been receiving much higher salary in-

creases than the average computer person. In the case of computer managers, the salary figures, according to the Reward survey, have gone up by an average of 11.5% up to August 1983, while the top 10% of computer managers have seen their remuneration going up by over 15%. Clearly firms are now much more selective in the way they grant salary rises and are willing to pay for hard work and ability when reviewing salary levels.

Smaller firms are now giving higher increases than some of their larger competitors. The Reward survey points out that "there are also indications that salary increases in small companies are rising faster than in large ones. This is a reversal of a 20-year trend and is immensely significant for the future style of UK ownership and company activity".

A number of factors play an important part in determining the salary of a computer employee and the Reward survey focuses on such items as company size, regional differences and types of industry. For instance, the average salary for a computer manager is now about £15,000 per year and it can vary by more than £3,000 either way.

The Reward statistics are quite different from those used in the *Computer User's Year Book*. In particular, there are differences in definition and timing, so that comparisons should not be drawn.

*John Aczel is a freelance journalist.*

TABLE 1: MEDIAN SALARY PER YEAR IN THE COMPUTER SECTOR IN 1983

	1983 £ p.a.	% increase
Data processing manager	14,727	9.1
Chief systems analyst	13,800	7.2
Chief analyst/programmer	11,400	2.9
Senior systems analyst	11,450	10.1
Chief programmer	11,137	9.4
Operations manager	10,643	10.7
Senior analyst/programmer	9,861	8.3
Systems programmer	10,143	9.4
Systems analyst	9,531	3.7
Senior programmer	9,500	6.8
Analytical/programmer	8,750	8.4
Chief operator	8,166	8.9

## MACRO 11 Programmer

COMET is the foremost electronic mail system available in the UK and is marketed exclusively by BL Systems Limited. Rapid expansion of the Client base in both the UK and Europe, where the system has been taken by many blue chip Companies, has created an excellent opportunity for a MACRO 11 Expert, to join a small, highly motivated team of professionals within this large and highly respected Organisation.

This unique position will involve tailoring the source code of the package to suit individual Clients' requirements, technical support and development of the products into new technological directions.

Development of, and migration to, VAX/VMS applications is scheduled for 1984, creating exciting opportunities to become involved in new areas of technology. In summary, you will become a key member of the team, enjoying total involvement in the development of the product.

Full product training will be given. Benefits will include a low cost leased car, company pension, bonus scheme, 25 days annual holiday and full relocation assistance where appropriate.

This is an excellent opportunity for an ambitious Technician with DEC expertise, to move into new areas of high technology in an Organisation equipped to provide excellent career prospects.

For further information and application form, contact Ian Payne on 021-256 3781 (24 hour answering service) or send him a concise c.v. at the Birmingham office as soon as possible.

# SUSTAINED BRILLIANCE ...ACHALLENCE FOR SYSTEMS ANALYSTS

£12-14k

Dixons are one of Britain's most dynamically expanding leisure technology retailers. The consistency of our growth shows that our success is more than mere luck.

Systems, and the imaginative way we use them, form a focal point in our success. Our expansion continually provides fresh opportunities for systems professionals to broaden their understanding of business, their technical skills and their career horizons.

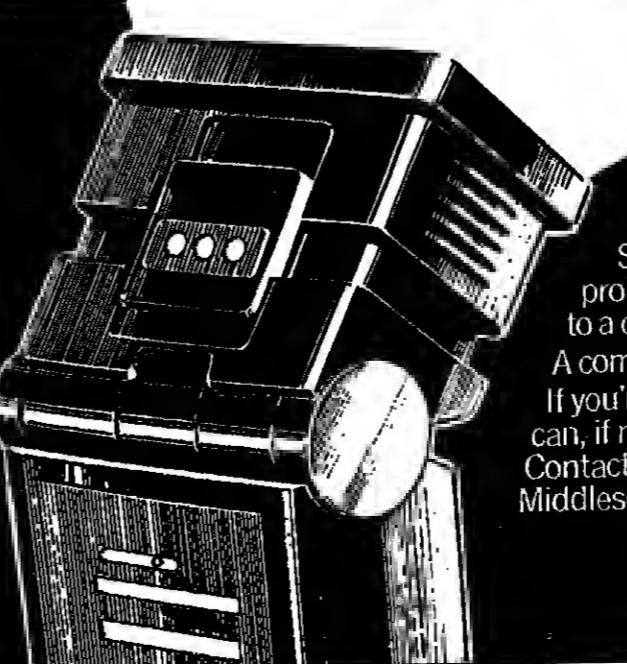

Currently, major developments are required in our point-of-sale, stock management, merchandising, buying, and financial systems areas. So at our head office in Edgware we need experienced Systems Analysts who can demonstrate specific systems development achievements.

Since our systems development plans cover the full spectrum of our business, we can probably match you to your particular area of interest or specialisation. We can certainly match you to a challenge.

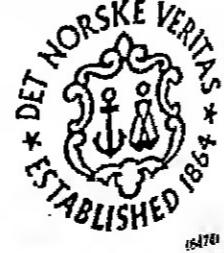

A comprehensive benefits package includes discounts on our products. If you're interested in brightening your prospects, telephone or write for an immediate interview which can, if necessary, be arranged for an evening.

Contact Christine Dulson, Dixons Limited, Dixon House, 18-24 High Street, Edgware, Middlesex HA8 7EG. Telephone 01-952 2345.

**JOBS IN THIRD PARTY SERVICING****I'm finding a job  
for the wrong reasons**

John Riley finds the third party maintenance sector in a thriving state

ONE area of the computer industry that enjoys a steady and relatively secure growth is third party maintenance. That is the sector that keeps the industry ticking over by making sure the hardware keeps running.

The third party maintenance companies maintain new machines as well as old ones.

Computer manufacturers offer maintenance, but their charges tend to be high, and can be as much as three times what a specialist third party company will charge. That is why many customers users take out contracts with third party companies to maintain their equipment.

Although the life of a computer system averages about five years, the life with users can be 15 years or more. Manufacturers tend not to keep permanent staff to maintain old machines, and in practice often sub-contract to the third party maintenance companies.

As a result, the third party companies are usually able to maintain a full range of equipment from punch card machines to computers straight from the factory.

One of the largest maintenance companies is CFM (Computer Field Maintenance), which has contracts ranging from microcomputers through to mainframes.

"We are chugging on and growing very steadily," said a spokesman. "CFM recently won a £1 million a year contract with British Telecom to maintain its computerised directory enquiry system, and among

its customers are other large companies like Barclays.

CFM looks for engineers, but not necessarily graduates. "University graduates have the wrong attitude," said the CFM spokesman. "They want to find the root of the problem rather than aiming to get the machine going in the quickest possible time."

**University graduates have the wrong attitude.  
They want to find the root of the problem rather  
than aiming to get the machine going in the  
quickest possible time**

"We look for people with technical knowledge, and a knack for engineering, as well as the ability to get on with people. They have to have the right attitude as well as an aptitude for engineering," he added.

CFM finds that it has a lot of ex-Service personnel among its staff. Other people attracted to the company - and the industry at large - include engineers from other companies who are "bored with the product line or finding themselves moving out of engineering and more towards marketing or some other activity as they get promoted."

"With us, all the area managers are engineering people and enjoy an engineering challenge," added the spokesman. "CFM is about engineering."

The company places great emphasis on its own training programme. "We have our own

training school near Cirencester, and we invest a lot of cash in training," he explained. "In average, every engineer gets one month's training each year."

Kode Services, another top third party maintenance company, also takes on a lot of ex-Service people. "They have good experience of older electro-mechanical

systems," says general manager Brian Brown. "We like to recruit people in their 30s or 40s as most young people are trained in electronics but not in mechanics. The older group is more ready to take them."

Lamb says it is particularly hard to find people who are willing to work in central London or in the north. "Most computer engineers in London are bachelors," he said, "and as soon as they get married, they end up buying a house 35 miles away and soon find a local job, say in Reading or north Hampshire."

Kode, like CFM, looks to engineering aptitude and general experience, rather than paper qualifications. "Experience is a better criterion than formal qualifications," says Brown, "as we take on a broad spread of people depending on where we want to slot them."

Kode takes on a "constant stream" of young people straight from school.

The 160 strong workforce has an average staff turnover of 11-12% each year, according to Brown, who says: "Field service engineers are in demand all the time. We have one or two vacancies most of the time."

Although companies such as Kode and CFM maintain the hardware, they tend not to maintain software. They will help to sort out whether problems are hardware or software, however, and the companies find that with experience, engineers get to know where the software problems are.

**HITACHI**

The Company's DP centre at HAYES, MIDDLESEX is based on IBM 4300's running under DOS/VSE, CICS, DL/1. A TP network (local and remote) of more than 140 terminals gives one of the highest ratios of screens to users in the commercial sector.

Automated Office Systems are being introduced using micros where necessary to ensure the DP Department maintains a high level of service to users by utilising current technology to the full.

The following professionals are required:

**SENIOR SYSTEMS ANALYSTS  
Package C £13,500**

Applicants should have 8 years or more experience in DP with a minimum of 4 years in Analysis. You must have worked on Commercial applications in an IBM TP environment and preference will be shown to people with a programming background.

**ANALYST/PROGRAMMERS  
Package C £12,500**

The prime requirement is 4 years experience using COBOL in a CICS, DL/1 installation. A knowledge of micros would be very useful as they may be used alongside the mainframe.

In addition to the indicated package other benefits include:

- \* Staff discount on a wide variety of household goods
- \* Highly subsidised canteen
- \* Excellent Pension Scheme
- \* Holiday accommodation scheme
- \* Free Permanent Health Insurance
- \* Discounted Private Medical Scheme

Hitachi Sales (UK) Ltd., reward people who show the right attitude and application, and care about service levels. The planned growth of the DP department together with the philosophy of internal promotion, will provide great opportunities for the committed professional.

Call David Mason Johns at K.P.G. or on 01-747 0969 (evenings/weekends) or see us at COMPEC Stand V202.

# ANALYSTS & PROGRAMMERS a stitch in time

If you've made a wrong turn in your career, and are facing boredom or dreary prospects, be positive. Because the longer you stay where you are, the more likely you are to get left behind, losing your motivation and even your confidence.

The Analysts and Programmers who come to our software centre know they've arrived. They enjoy a pure software environment, the most up-to-date equipment and a constant stream of challenging on-line real time data handling and display projects. Security is unquestioned, career development is certainly.

For more information telephone or write with brief details to Ms. E. Ann Harrison, Personnel and Training Officer, Marconi Radar Systems Limited, Writtle Road, Chelmsford, Essex. Tel: Chelmsford (0245) 267111.

A test technician gets to work on a 135 console at IRM's Havant plant.

## KENT COUNTY CONSTABULARY Data Processing Manager

**£13,395 — £15,357**

Kent Police are currently acquiring a major real time computer system as well as moving forward in the use of mini-computers, micro-based systems and interactive video data. Our major equipment comprises 2 Burroughs 8500 Mainframe Computers with extensive terminal networks distributed throughout the County, a Burroughs 8100, and 2 Microdata Computers.

We are looking for a highly motivated progressive Manager to head up the professional services of the Constabulary's Computer team. He/she will be a senior Manager with a proven track record, able to build up existing applications and assist with the planning of future developments.

Working conditions are excellent. An essential user car allowance is payable and a leased car scheme is available. Removal and other expenses paid in suitable cases and temporary housing can be made available.

Further detailed particulars and application forms returnable by 2 December, from the Assistant Chief Constable, Personnel and Training, Kent County Constabulary, Sutton Road, Maidstone. Tel: 0865 432 212.

## sandwell

Metropolitan Borough Council

### An Equal Opportunity Employer

#### EDUCATION DEPARTMENT (LIBRARIES AND MUSEUMS SERVICE)

#### COMPUTER SERVICES LIBRARIAN

(Ref. 537)

Grade SO1/2

£6,080 to £10,539

Sandwell Library Service is considering the introduction of an integrated stand alone on-line computerised system for circulation control, stock ordering, acquisition and cataloguing. The postholder will be responsible for the necessary investigation of the project and implementation. It is anticipated that the appointment will initially be for a period of three years.

Applicants must have considerable experience in staff management and public library computer operations at a senior level, together with the ability to plan, organise, negotiate with suppliers and effectively manage a project of this nature.

A thorough knowledge of public library systems and developments in the new technology is required, together with the ability to work under pressure. Minimum qualification for this post is Associatehip of the Library Association, or appropriate equivalent.

Closing date: 30th November, 1983.

Requests quoting ref. No. 537 and enclosing S.A.E. for application form and further details should be made to the Personnel Officer, Town Hall, West Bromwich B70 8DX.

LOTHIAN REGIONAL COUNCIL  
STEVENSON COLLEGE OF FURTHER EDUCATION  
Department of Computing and Microtechnology

#### ★ Lecturer B In Data Processing (2 Posts) —

Applicants should hold a degree or equivalent in Data Processing and have gained experience in a commercial data processing environment. The primary programming language required is COBOL with either PASCAL or BASIC as a second language. The ability to teach database techniques and systems analysis would be an advantage.

#### ★ Lecturer B In Microcomputer Software —

Applicants should hold a degree or equivalent in Computer Studies and have gained experience of a range of commercial microcomputer-based software. They should have worked with a CP/M base system and be familiar with MPM, MS-DOS, or UNIX. A knowledge of COBOL, BASIC or PASCAL is also required.

#### ★ Lecturer B In Digital Electronics —

Applicants should hold a degree or equivalent in Electronics and have experience of digital systems and microprocessors. A willingness to develop and teach associated software at machine code level and microcomputer servicing is essential.

#### ★ Salary on Scale £7,644-£10,413

Application forms and further particulars from the Registrar, Stevenson College of Further Education, Bankhead Avenue, Edinburgh EH11 4DE. Telephone 031-443 7111.

#### THE LAKE DISTRICT SYSTEMS ANALYST

SCALE 6/SO1, £8,154 — £9,660 pa

The Council is committed to a major computer development programme and invites applications from experienced persons who wish to join an ambitious team. The successful applicant will undertake feasibility studies and design and implement computerised systems.

Application development will be primarily based on the Council's CMC Real-time computer.

The Authority has an extensive coastline and approximately two-thirds of its area is within the Lake District National Park. The Council offers generous conditions of service and removal expenses etc.

Application forms and further details are available from the Personnel Section, The Council Offices, Catherine Street, Windermere, Cumbria LA2 8AA. Telephone 0539 3111, ext 227.

Closing date: 28 November 1983.

P. N. DENISON  
Chief Executive

103691

104201

Required with good VAX experience (preferably 2-3 years) and an interest in the design and implementation of real-time systems. Previous experience of the CMC Real-time computer is an advantage.

Ability to work as part of a team and to take responsibility for the design and implementation of complex systems.

Good communication skills and the ability to work under pressure.

Good knowledge of assembly language and experience of using it to program real-time systems.

Good knowledge of C and Pascal.

Good knowledge of the CMC Real-time system.

Systems Analyst/Programmer  
Luxembourg circa £24,000

Required with good VAX experience (preferably 2-3 years) and an interest in the design and implementation of real-time systems. Previous experience of the CMC Real-time computer is an advantage.

Ability to work as part of a team and to take responsibility for the design and implementation of complex systems.

Good communication skills and the ability to work under pressure.

Good knowledge of assembly language and experience of using it to program real-time systems.

Good knowledge of C and Pascal.

### IBM OPPORTUNITIES

**SYSTEMS ANALYST** CITY to £14,000 + MORT. Our client in International Banking Corporation with impressive offices seeks to recruit an Analyst to work on large financial projects. Applicants should have TWO YEARS' IBM analysis experience preferably with a programming background. Banking knowledge would be advantageous and candidates should have worked on projects from inception to completion.

**PROGRAMMER** C. LONDON to £10,000. WANT TO LEARN CICS? If you have 18 MONTHS' IBM COBOL preferably with MVS, in a commercial environment this company can offer training in CICS. They are looking for ambitious individuals to work on large development projects and for people who enjoy USER CONTACT.

**AN/PROGRAMMERS** W. LONDON c. £13,500. Do you want to work on a NEW DEVELOPMENT PROJECT? This client offers new projects, TRAINING IN CICS and DATABASE, excellent PROMOTION prospects, and a dynamic working environment. In return can you offer good analytical skills, minimum of TWO YEARS' IBM COBOL, enthusiasm and commitment?

**PROGRAMMERS** S. LONDON £11,000 + MORT. This prestigious International Bank retains IBM 4300 hardware using COBOL CICS and DL/I. They are seeking two PROGRAMMERS to work initially on Foreign Exchange Systems. No banking experience is necessary as full training is given. For this excellent opportunity you need TWO YEARS' IBM COBOL with some exposure to CICS.

**PL/1 PROGRAMMERS** C. LONDON to £10,000. TRAINING IN CICS & DL/I. Major expansion within this well-known company has led to vacancies for programmers with 18 MONTHS' IBM PL/1 experience. This client is involved in major development projects, offers excellent training and career progression. They retain IBM mainframe running under MVS using CICS and DL/I.

**PROG. TEAM LEADER** CITY c. £13,000. Could you lead a team of EIGHT PROGRAMMERS? This international company based in the city seeks to recruit a PROGRAMMING TEAM LEADER to work on new development projects. Ideal applicants will have a minimum of three years' IBM COBOL and have some supervisory experience. Phone now for further details.

**PROGRAMMERS** N. LONDON to £12,500. This well-respected company based in North London retains IBM mainframes using COBOL, CICS and DATABASE. All you require is a minimum of 18 months' IBM COBOL. TRAINING will be given in TP and DATABASE. Company offers excellent starting salaries plus yearly reviews.

### LECTURESHIPS IN INFORMATION TECHNOLOGY

The Polytechnic has been able to make a number of very good appointments to support its new courses which have now made an excellent start. However there are still some vacancies for which applications are now invited. Candidates experience in the following areas:

DIGITAL ELECTRONICS/MICROPROCESSOR ENGINEERING  
DATA COMMUNICATIONS  
SOFTWARE ENGINEERING  
DATA BASES & INFORMATION PROCESSING

or allied technology

The School has a very vigorous programme of course development (including a new 'calendared' course, research and consultancy). Successful candidates will be entitled to continue to the MA in Information Technology. Further information may be available, and opportunities exist for part-time study for a higher degree, which will be encouraged. Qualified younger candidates will find the School a stimulating environment in which to begin an academic career.

Appointment will be most appropriate to qualifications & experience in one of the following areas (incl of London allowances)

Lecturer II	£12,713
Part-time Lecturer	£11,238 - £14,098

Bates and application forms to be returned by 2 December from Academic Registry Dept. A.O., Kingston Polytechnic, Pamsham Road, Kingswinford-Tipton K7 2EE. Tel: 01-849 1285. B485

### DATABUS PROGRAMMERS

to £11½K + Profit-sharing Bonus

Fraser Williams (Hertfordshire), an expanding member of a leading national consulting services group, requires experienced Programming Staff with Datapoint experience.

Initially, you will join a team to develop and implement a system for a major client. This will be based on a Datapoint ARC network running under RMS.

You should be self-motivated, have commercial experience and a solid background in applications programming. Knowledge of RMS is not essential, but would be an advantage. After this assignment excellent opportunities will be given to train and broaden your professional horizons in terms of hardware, software and business applications.

Programmers should have two years' Datapoint experience and lead Programmers three years. Salaries offered will be commensurate with experience, up to £19K for Programmers and £11½K for Lead Programmers. A substantial half-yearly bonus is paid.

Please phone Jeff Boston on 01-930 4041 or evenings on 078 087 428.

Fraser Williams  
Recruitment & Training  
19 Charing Cross Road,  
London WC2N 0ES.

### DATA GENERAL CONTRACTS EUROPE

**DG ECLIPSE, RDOS, EXTENDED BASIC**  
Our client based in Amsterdam requires two contractors with the above experience to work on a variety of commercial applications. Duration will be a minimum of six months.

**DG ECLIPSE, AOS/VS**  
Our client based in Brussels requires two contractors to work on a flight simulation project. Knowledge of HP 9816 would be advantageous. Duration will be a minimum of one year.

For more information please contact your nearest K.P.S.L. office today.

## US prizes British standards

Ron Coates finds out Britons are in demand across the Atlantic

THERE can be few DP staff in the UK who have not toyed with the idea of taking a job in the US.

And judging by the way that major UK recruitment and contract agencies are opening up offices in the US, there must be more and more British computer staff who have decided to make the jump.

According to agencies like Tangent, Trilean and VLI, British programmers and analysts are gaining a very good reputation in the US. John O'Sullivan, chairman of Trident, said: "They are finding that the Brits — that's what they call them out here — have a higher standard technically and are more competent, though they'd probably kill me for saying it."

The general reason given for the high regard that British DP staff enjoy in the US has been that US DP departments have generally had large budgets and larger machines than their UK counterparts. The UK programmers and analysts on the other hand have always been under more pressure to get more out of their hardware. This has developed their technical skills and general resource.

Most agencies now take a great deal of care over the people they send out to the US. As they are now developing their own network of local offices they are on the spot to deal with any of the obvious immediate problems, such as late cheques and extension of contracts.

The type of people who go to the US from here have been traditionally regarded as being the young and single with three, four or five years' experience, who wish

There is often an informal system for helping new arrivals

to broaden their technical knowledge and have a good time doing it. One mildly cynical agency man described the typical applicant as being "single or almost divorced".

But this is beginning to change. When VLI gained a contract last year to supply around 50 people to a major insurance group, it found that at the end of the day the young and single stereotype did not fit.

And even if you can get a visa to work, it is as well to remember that your husband or wife may not be so lucky.

The delay on visas is currently between two and 12 weeks and is mostly closer to the longer figure.

O'Sullivan said: "You just can't forecast how long a visa will take. You could send the details in on twins with the same qualifications and you wouldn't know when you'd get the applications back."

This sort of delay causes two problems. The first is that the client of the agency may get tired of waiting for the UK staff to get visas. The second is that the individuals in the UK can get fed up as well.

But the working visa is essential for anyone who wants to work in the US. The application of the regulations has been very much tightened up since those days (if they ever existed) when large numbers of people went to the US on holiday and came back claiming to have worked for three months.

US employers have had enough problems with people who have tried this little trick to discourage them from biting again. The UK agencies are eager to stay in business in the US and the majority of them ensure that their staff get the right kind of visa and renew it properly.

There is a huge number of advanced projects being installed in the US, so a contract can be exciting technically, as well as usually.

## SALES EXECUTIVES HELP US SELL A REVOLUTION!

If you know anything about the problems of enabling computers and peripheral devices to communicate, you will appreciate how difficult it can become when this is extended into a multi-vendor situation, particularly within a local or geographical networking situation. Few have been able to master the problems and only our client can be said to have found a complete solution. This has been achieved by developing a high performance networking system, operating at speeds of up to 50 million bits per second, which encompasses the protocols of most significant major mainframe, mini and microcomputer manufacturers. In other words, our client enables computers of virtually any manufacturer, involved in a diversity of applications, to intercommunicate within a communications network at channel speeds, whilst at the same time sustaining their own independence.

So much for the technology; the company is substantial, but relatively new in Europe, yet a world leader in its area of specialisation. So, here is a chance to be in at the early stages of an assured success. Already, many prestigious accounts have been secured and expansion is very rapid.

The requirement is for two salesmen located in

### LONDON and the SOUTH

both of whom will be experienced in selling either substantial mini/mainframe computers, or large-scale communications systems to major companies and institutions. A proven record of success embracing both existing and new accounts selling involving DPM and board-level negotiations, is essential. Familiarity with data communications and real-time systems will be an advantage, but not a necessary qualification.

We are prepared to negotiate a minimum compensation package of around

### £30,000 + COMPANY CAR

which will include a guarantee for the first 12 months of employment, at a level no less than current earnings, as well as providing fringe benefits such as Health Insurance, Pension and Life Assurance.

Please contact Alesdair Scott, quoting reference WSD/103.

## Computer Officers (Two Posts)

Applications are invited from graduates with relevant academic, industrial or research experience for the following posts:

**Post 1.** Computer Officer within the User Services Group of the Centre. The Group is responsible for Applications Software and user guidance and the appointee will have special responsibilities in the area of liaison with external services. In particular use of the Cyber 203 System of UMRC.

**Post 2.** Computer Officer in the Microprocessor Systems Laboratory which covers software and hardware construction services together with general advice to all departments of the University. Experience of designing and writing real time and systems software is required and experience of microprocessors hardware and interfacing is an advantage.

Salary according to age, qualifications and experience, on the Computer Officer scale £6,310 - £11,615 - £14,125 plus superannuation.

Further particulars from Mrs J. E. Butler, Senate Division, The Registry, University of Birmingham, P.O. Box 363, Birmingham B15 2TT, to whom applications (three copies) including full curriculum vitae and naming three referees, should be sent by MONDAY, 12th DECEMBER, 1983. Please indicate for which post you are applying.

(16403)

## BRITISH AIRWAYS HELICOPTERS LTD. FLIGHT SIMULATOR ENGINEER OFFICER BV234

British Airways Helicopters Ltd are looking to recruit a team leader for their simulator maintenance section at Aberdeen. Duties will include the maintenance and overhaul of S61 and BV234 simulators. In detail the successful applicant will be responsible for the co-ordination of engineering tasks on the BV234 simulator implementing aircraft modifications, controlling software modifications and updates, progressing outstanding defects and ensuring that preventive maintenance tasks are completed.

Applicants must hold an HNC in electronic engineering and have previous simulator experience, preferably gained on SEL 32/77 equipment. An in depth knowledge of multi-line simulation software and allied hardware equipment would be desirable.

Salary will be up to £10,150 and additional benefits will include favourable concessionary air travel opportunities, contributory pension scheme and subsidised staff restaurant.

For an application form please contact: Mrs Becky Panford, British Airways Helicopters Ltd, Gatwick Airport South, Gatwick, Sussex RH6 0PB.

(16342)

## SCOTTISH EXAMINATION BOARD COMPUTER PROGRAMMER/OPERATOR

Salary scale £7,404 to £8,154 Inc increments £8,154

This is a permanent staff post. Applicants should have several years' experience of IBM Cobol and Fortran. Experience with VMS/CMS would be of particular advantage. Previous operating experience would be of interest because assistance with two-shift operating could be required between March and June each year. Conditions of Service will be generally those of the Local Government Service. Further information may be obtained by telephoning 031-563 8601 (ext 254). Application forms from Establishment Officer, Scottish Examination Board, Ironmills Road, Dalkeith, Midlothian EH22 1LE, to be returned by 2 December 1983.

(16468)

## THE LAW SOCIETY Systems Analyst

£9,880-£14,450 (Inc. London Weighting)

The Law Society is responsible for the administration of the Legal Aid and Advice Scheme, on behalf of the Government. To assist in carrying out this task it has used computers for many years. It currently has a UNIVAC 90/40 Mainframe installed in Central London and Microprocessors are being installed in 15 Area Offices throughout the country.

There are ambitious plans for further development in computer usage and the opportunity arises for a Systems Analyst to join the team at the outset of the project. Applicants should be able to demonstrate successful specification and design of on-line systems in a commercial environment. Experience in data base and local Area Networks interface with Mainframes will be a significant advantage. A positive attitude and approach to the task may offset lack of experience in some of the above areas.

Salary on appointment will be related to age and experience.

Requests for application forms should be addressed to Personnel Officer, The Law Society, Greencoat House, 12 Roger Street, London, WC1N 2JL quoting Ref. CW to arrive not later than 28th November 1983.

(16467)

# EUROPEAN MPU MARKETING MANAGER

...the industry's foremost challenge

about £10,000

Without question this is the key appointment within the European computer market industry. That is the nature of the product's strategic importance.

Powerful features like 32 bit architecture, high level language capability, large memory address, combine to create a real world benefit. All that remains is to appoint the individual who will lead the continuing future growth.

The prime personal challenge is in the wide-ranging nature of the function. To conceive and apply programme to a freely design-with object, third party software support, customer education, applications support, product promotion and fitting product definition across a European wide field of operation. Only an exceptionally talented engineer could achieve these goals.

Currently in your 30's, you must be a graduate engineer with significant experience in high level languages, operating systems, preferably in a computer system environment. Strongly technical you must also possess the vision, drive and pragmatism to succeed in a fiercely competitive market place.

If you feel ready to accept the industry's foremost challenge then call me, Martin Warner on 041 515 5615 or write enclosing a current cv.

Kramer Westfield Associates Ltd, 24 Victoria Street, Windsor, Berks. SL4 1HF

Renowned Consultants to the Semiconductor Industry.

## SALESMAN

In office furniture systems c. £14,000 including bonus + car + expenses.

Based in London and the South East.

Consider these two facts:-

- more people are working in offices, which are changing rapidly with the introduction of electronic equipment.
- more people are demanding a better working environment.

As one of the country's leading and most successful manufacturers of office furniture we responded to the need brought about by these facts and launched the Matrix office furniture system.

The Matrix division is now so successful we need an ambitious professional to join our sales team and help cope with continued expansion.

With the backing of an expert sales and marketing programme the post holder will sell direct to end users from enquiries generated from sales leads.

It is essential that the successful applicant is self-motivated. Candidates with experience in negotiating at senior level in computer software, finance or related fields should have acquired the necessary essential skills.

Telephone for an application form to:-

Personnel Department,  
Project Office Furniture Ltd.,  
Hanlaf Green,  
HAVERHILL,  
Suffolk.  
Tel: HAVERHILL (0440) 705411.

THIS IS AN EQUAL OPPORTUNITY COMPANY.

## NETWORK DESIGNERS AND TELECOMMUNICATIONS SERVICES CONTROLLERS

Barclays Bank has vacancies for the Network Designers and Telecommunications Services Controllers. The positions are based at Radcliffe Hall in Cheshire.

Network Designers - £9,800-£13,700 p.a.

Applications are invited from suitable applicants to assist in the preparation of designs and specifications for telecommunications networks. This includes network terminating equipment such as PBX's, Modems, multi-connect systems, multiplexors, monitoring and logging equipment, network management facilities and test equipment.

Candidates should ideally have had five years experience in this field, dealing with one of these types of systems and equipment.

Certifications are required, either a City and Guilds Certificate or an appropriate degree.

Telecommunications Services Controllers - £5,500-£9,500 p.a.

The successful applicants will be required to process orders for the timely delivery and installation of equipment and services - usually relating to small telephone exchanges, telex/telexpinters and the like. This could extend to the smaller nodes of telecommunications network. There will be a continuing demand to perform the task of installing, installing and/or the telecommunications network.

Some experience within this field would be required and certainly knowledge of the equipment mentioned above.

There may be opportunities in the future for the successful applicants to move on to Network Designer positions.

The usual fringe benefits in working for a Bank apply, including subsidised restaurant facilities, an annual bonus and a profit sharing scheme.

Requests for applications should be made to:-

S. N. Jayaraman, Manager (Personnel),  
Barclays Bank PLC, Management Services Department,  
Radcliffe Hall, Radcliffe, Cheshire WA18 9BL.  
Telephone Radcliffe (0563) 388 Ext. 2742 or 2743.

**JOB FOR OPERATORS**

# Tales of the op's death are greatly exaggerated

**With apologies to Mark Twain, Margaret Park demolishes some of the scare stories about 'a dying breed'**

OPERATORS tend to be denigrated these days for being in a job that is nearing the end of its useful life. But as more technical progress is made, there are still no signs of them being wiped out en masse.

Operations managers tend to dismiss the scare stories by pointing to similar tales, even more obviously untrue, about the death of the programmer who is, according to some, in danger of being killed off by program generators and advances in user-driven software.

It's true that today's computers need less operating skills than their predecessors, but at the same time the sheer number of computer departments in the country is increasing and most DP employers think operating jobs are good for another five years at least.

But operators are being hit by the low turnover among computing staff in the same way as every other grade.

Phil Reid, operations manager at London-based Rolfe Nolan Computer Services, points out that, rather than disappearing altogether, the operator's function is changing.

"The operator's role is different

now," he says. "Operators are becoming less responsible because they have less to do with running the actual machines. Instead, their function is to control the computer's output."

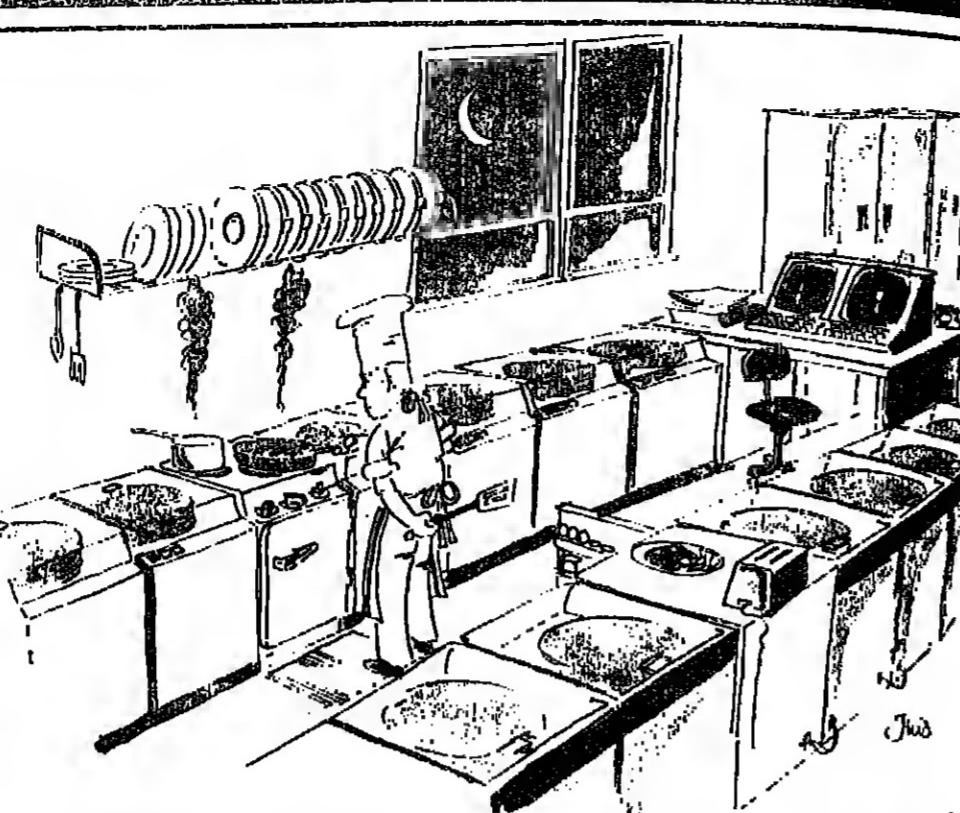

So with the demise of the hatch system, operators are no longer machine minders, inputting at keyboards or punch card machines. The operator's job has become more administrative. The real time system largely runs itself so the operator simply collects its output and is responsible for directing it to the user.

This means that operations is no longer a team function. Where there were once half a dozen or more operators on each shift in the computer room, now there is likely to be just one. And quite large installations manage with only three or four taking turns on shifts.

Rolfe Nolan Computer Services, though, is one firm that has increased the number of operators it employs because of its growing business.

"Two years ago, we only had four operators, now we have eight," he says.

Rolfe Nolan supplies services to

"The emphasis of future computing work will come from outside the machine's environs," he says, "rather than from inside the computer room."

"Now people have the equipment and the ability to submit their own jobs by means of quasi-remote job entry and by the greater use of online systems," he added.

Senate Computer Services says it has not needed to take on any new operators for over a year — the same story of low staff turnover.

A spokesman for the company said in a futuristic tone that Senate is geared to getting machines working rather than people.

"Operators are required, less now than in the old days," the spokesman added.

"There'll always be a need to

have someone watching the machine, but the days of changing tapes and so on are over now, it's mostly just a watching job."

Senate only employs three operators working single-handed on two shifts a day and looking after five machines.

But if the operator has not been dismissed completely as a dying breed, his function in the computer department does sound increasingly dull.

Anyone considering operations as a career, unless endowed with a meditative nature, would do well to make sure that any prospective employer offers a chance of promotion into the less sedentary role of programmer.

Once upon a time, few self-respecting data processing managers would consider sweeping operators up from their lowly ranks to be

turned into programmers. But now this snobbish attitude is fast disappearing along with the idea that a good programmer comes exclusively from a mathematical and scientific background.

Programmers are just as likely to be drawn from arts backgrounds.

Some employers swear by them, preferring to take trainees with open minds uncorrupted by previous contact with computers.

And a number of employers say that when taking on operators they choose those likely (at some future point) to have an aptitude for programming.

Operators, it seems, can benefit at the moment from opportunities in companies where computing activities are expanding, particularly in the London area.

Margaret Park is deputy editor of Computer Talk.

**RPG II/III****RPG III/6, 10/6, 16/6 To RPG III**

Here is an excellent opportunity to gain System 38 experience! Internationally renowned company seek one analyst/programmer with either two years' + RPG II System 34, or 12 months' + RPG III experience to join a D.P. Department of eight. Middlesex based, they offer RUPA, subsidised restaurant, discount on exclusive products and excellent training. REF. CW/2987

**IBM SYSTEM 38 SPECIALIST £13,000 (+ £100 bonus)**

The small highly reputable software house, is a subsidiary of an international firm with headquarters in West London. They seek a Senior Analyst/Programmer with at least three to four years' D.P. experience and in-depth System 38 RPG III, who can have confidence with clients, and develop banking, financial and commercial systems in-house. Possibility of car, and excellent bonus scheme. REF. CW/2986

**IBM SYSTEM 36 CITY To £11,000**

Car based insurance company will be upgrading from System 34 in next month and seek a programmer/analyst with two years' + RPG II experience. As part of a small dynamic team you will be developing insurance and financial bespoke systems. Excellent perks including non-contributory pension, BUPA, travel loan and four weeks hols. REF. CW/1790

**DARKING BENEFITS! RPG II £10,000**

International City Bank with a range of IBM kit, is seeking an analyst/programmer with at least two years' RPG I/II/IBM System 34 experience. Banking or financial knowledge preferred but other applications will be considered. Full range of benefits including mortgage subsidy after three months, free life assurance, profit share. REF. EW/509

**IBM SYSTEM 34 BUCKS £12,500**

A heavy-weight analyst/programmer required to play a senior role in this international marketing/manufacturing group. Besides your three years' + RPG II experience, you should be capable of taking systems from the initial user discussion stage, through design, programming and implementation. As you move more into an analytical role, you will be given programmes to take the bulk of the coding and testing from you. This is very much a key role in an expanding international group, and offers 23 days hols., BUPA, non-contributory pension and relocation assistance. REF. CW/3600

**RPG III MOVING TO KENT £8-11,000**

I currently have seven clients in the Northern, Central and Coastal areas of Kent seeking ambitious programmers and analyst/programmers. If you can offer over 12 months' solid RPG II or III experience, you may like to know more about these exciting opportunities in finance, financial, manufacturing and software house environments. I'm on a phone call away. REF. EW/1GEN

**RPG II ANY MACHINE To £12,000**

North London based rapidly expanding retail company have an urgent requirement for a retail computer operator with a minimum of 18 months' experience on any machine. The house is Ware & Son, involved in a telecommunications network covering a large part of the UK. This company will recognise the career aspirations and needs of their employees and offer comprehensive training and quick promotion prospects to ambitious individuals. Excellent working environment and benefit package. REF. MW/138

**SOFTWARE HOUSE CENTRAL LONDON To £12,000**

A leading software house based in Central London who offer a wide range of specialist consultancy services in the field of computers and telecommunications are seeking IBM System 38 Programmers and Analyst/Programmers with a minimum of 12 months' RPG II experience. Both of these positions will be completely involved in systems maintenance, but in existing client driven projects. You will be well rewarded with salary plus benefits which include good packages for career development in other companies. REF. GW/1756

**SYSTEMS PROGRAMMER £12,000**

Prestigious publishing company, with a firm commitment to D.P. expansion, have a requirement for an analyst/programmer with a minimum of 18 months' IBM System 34, or 12 months' + RPG III experience to join a D.P. Department of eight. Middlesex based, they offer RUPA, subsidised restaurant, discount on exclusive products and excellent training. REF. CW/2987

**RPG II OR III £12,000**

A major multi-national group with a subsidiary office based in North London have a requirement for an IBM System 38/RPG III. Programmer/Analyst, although an IBM System 34/RPG III person may also be considered. Familiarity with MAAPICS would be an added advantage. You will be developing commercial systems within a small team. Benefits include five weeks holiday, non contributory pension scheme, free life ass., sports and social club. REF. GW/6780

**RPG III PROGRAMMER To £10,000**

Great career prospects, small friendly team environment. International finance firm, city based, require a keen young programmer with 18 months' + IBM System 38/RPG III experience, to work with two others, and get involved in some analysis duties. Terrific working atmosphere. REF. EW/2962

**IBM OPPORTUNITIES****IBM - ANY LANGUAGE To £13,500**

My client is in the financial services field and has two positions available for a Programmer and a Senior Analyst/Programmer. They run IBM 4341's, under DOS/VSE and make extensive use of CICS! Most of their development work is in CICS ASSEMBLER, but they are willing to train good COBOL or PL/I applicants. 18 months' + IBM experience required for the programmer and three to four years' IBM, possibly with some finance or mini experience, required at senior level. The senior applicant should have the ability to move into a management role in the near future. REF. CW/2762

**IBM COBOL WEST END To £11,500**

Unique opportunity with this petroleum firm to get more involved in user liaison, analysis and consultation work. Two years' + IBM MVS COBOL is required, and a flexible and tactful personality is essential. You will be dealing with clients throughout the UK and Europe, consulting programmers and designers, evaluating hardware, working on your own initiative, developing systems from scratch. Really unusual opportunity with great career prospects. REF. CW/3520

**IBM PROG/ANAL HERTS £9,500**

Due to continued expansion my client on the Herts/Middlesex border are currently recruiting an additional member of staff to enhance their development team. The essential requirement is for someone with 12 months' + COBOL

preferably with exposure to IMS and/or DL/I. This is an interesting and challenging position with good salary and excellent career prospects. If you have proved yourself in a manufacturing environment and are now looking to take a further step up the ladder of success, please give me a ring. REF. EW/2933

**ANALYST NEW IBM SITE To £13,000**

My client is a renowned British retailer, moving to the Bucks/Beds./Mids' borders in January. They seek a systems analyst with three years' + analysis experience gained in an IBM CICS environment. You should be in the 20-30's age range, able to write specs, design on-line systems and liaise confidently with users at all levels. Sports and social club, restaurant, discount on products, relocation assistance, excellent pension scheme and health insurance. REF. CW/2587

**MVS SYSTEMS PROGRAMMER BUCKS/SURREY To £14,500**

Experienced systems programmer required with two years' + MVS, JES2 TSO experience, and preferably knowledge of SPF, ACP2, VSAM or NJE. Excellent salary, relocation package, five weeks holiday, flexitime, sports and social club. REF. CW/2974

**OTHERS****VAX EXP-ANY LANGUAGE EXEC £11,000**

An exciting opportunity has arisen for individuals with VAX experience to move into systems work. My London based clients will provide extensive training to the right applicants with the aptitude and desire to become involved in user liaison, analysis, software development and in the senior roles. Systems Management. This department is operational and includes DECWARM/780 which it links with its clients around the country. The position is excellent and includes non-contributory pension scheme, profit share, staff restaurant and medical services. REF. AW/2182

**SYSTEMS PROGRAMMER £14,000**

Due to continued expansion, this leading London based oil company is looking to recruit top class programmers and lead programmers with 18 months' + IBM 3800. Job sharing and possibly with DL/I. A first class career move as the work is 99% development, allows the opportunity to gain more responsibility, and competitive salary plus a substantial benefit package. You should be able to offer 12 months' + five years' IBM COBOL expertise. REF. AW/2816

**EMERGING PROGRAMMER £13,000**

A vacancy exists within this prestigious manufacturing concern for an IBM COBOL programmer. The company retain dual IBM 3831's running under DOS/VSE utilising CICS and DL/I supporting a national VTAM network. CICS and DL/I would be a distinct advantage. Familiarity with MAAPICS would be an added advantage. You will be developing commercial systems within a small team. Benefits include five weeks holiday, non contributory pension scheme, free life ass., sports and social club. REF. GW/6780

**RPG II OR III £12,000**

A major multi-national group with a subsidiary office based in North London have a requirement for an IBM System 38/RPG III. Programmer/Analyst, although an IBM System 34/RPG III person may also be considered. Familiarity with MAAPICS would be an added advantage. You will be developing commercial systems within a small team. Benefits include five weeks holiday, non contributory pension scheme, free life ass., sports and social club. REF. GW/6780

**CNEG**

Ground floor opportunity for a programmer with a good educational background coupled with a minimum of six months' HP 3000 COBOL experience to join a successful West End financial company and become involved with major new development projects. This company will give the successful applicant all the backing necessary to progress both in a technical and a personal level. REF. AW/2958

**CHEVLETT PACKARD**

**COBOL £7,500-8,500**

Three leading opportunities with Reading, Slough and Bracknell based organisations, housing IBM 4341's. Programmers should have 18 months' + IBM COBOL gained in an MVS, DOS/VM environment and some on-line experience. You will be trained in database techniques and given every opportunity to take a step upwards in your career. BUPA, five weeks hols. and discount on company benefits. REF. CW/2220

**IBM (MORTGAGE & RELOCATION) HANTS £11,000**

As an Analyst/Programmer within this City based distribution concern. You will be developing new financial and commercial systems from initial user contact stage through to implementation. The successful applicant must have two years' + D.P. experience with in depth exposure to HP 3000, COBOL, IMAGE, VIEW and QUERY. If you are an enthusiastic and capable D.P. professional looking to pursue a worthwhile and interesting career that offers the opportunity to progress into management - call now. REF. AW/2792

**CINI EXP SOFTWARE HOUSE To £15,000**

My client, a small well established City organisation is currently embarking on a long term major development with direct links to a well known computer manufacturer. They have two requirements, one for an analyst/programmer with good banking or financial background plus several years COBOL on any mini. This is a new post and offers an excellent opportunity for real career development in a challenging and expanding area. They envisage a salary of £15,000 for the right candidate. Secondly they seek an ambitious programmer with 18 months' + solid COBOL, preferably on a mini. Excellent prospects and career path for the right person. The salary will be commensurate with experience up to £10,000. REF. MW/6600

**NEW DEC INSTALLATION MIDDLESEX £10,500**

This market leader in its field has just taken delivery of 2x DEC PDP 11/23, and are consequently seeking to recruit additional members of staff. The essential requirement is for two years' BASIC + experience, hopefully gained within a RSTS/E environment. You will be involved with the development of new commercial systems including stock control from feasibility through to implementation. If you want to work on new systems, in a new installation then call now for further details. REF. AW/2954

**ICL 2900 SYSTEMS EXCELLENT**

Due to planned expansion in 1984 an outstanding opportunity exists for programmers, analysts and project leaders with good experience of ICL VME, IDMS and TPMS to join the systems development team of this leading City based insurance company. Company benefits include flexi-hours, subsidised mortgage bonus schemes plus the security of working for a long established, well managed professional organisation. REF. DW/28425

**IMMEDIATE OPPORTUNITY £10,000 (OR MORE)**

For an experienced programmer to join this established London based Engineering firm. The requirement is for two years' + ICL ME29, TME/MTS, COBOL and PLAN expertise. A knowledge of manufacturing/engineering systems including Production Control would be highly advantageous. In return the company offer a generous salary along with a full benefit package including relocation assistance where appropriate. REF. D/W/2993

**ANALYST/PROGRAMMER £16K**

There exists within this leading engineering concern a superb opportunity for an analyst/programmer with three years' + exposure to DEC systems to take up a key position within this new team engaged in commercial development. The successful candidate, in addition to solid DECsystems experience will have proven systems analysis expertise. Training is given in DB2/BASIC, and there is every opportunity to gain promotion into management. Excellent benefit package including BUPA, Pension Scheme and subsidised restaurant. REF. AW/2182

**SYSTEMS ENGINEER £14K**

To work on the development of operating systems/disk drives; CAD/CAE; compilers etc. Experience of real-time programming using CORAL, UNIX/C or Assembler would be advantageous.

**Ref 06/04****Ref 06/04**

## PERMANENT OPERATIONS

### IBM POSITIONS

#### SHIFT LEADER SURREY

A large software house requires a shift leader with five years' operating experience to work on their 4341 and 3032. Experience of either DOS/VSE under VM or MVS is essential and a general knowledge of VTAM is preferred. Two shifts only are worked and a salary of up to £10,000 will be paid.

#### SENIOR OPERATOR CITY

A large foreign banking concern need an experienced person with at least two years' DOS/VSE under VM. Knowledge of POWER and CICS is preferred. Usual banking benefits coupled with a salary of up to £10,800 make this a first-class position.

#### OPERATORS CITY, SURREY AND ESSEX

A number of 4341 sites are looking for good DOS/VSE and VM/CMS people. A minimum of one year's experience could bring up to £8,500.

#### SYSTEM 38 OPERATOR BERKSHIRE

A days-only position paying £7,000 exist with this large cosmetics/pharmaceutical company. Communications experience would be an advantage.

#### SYSTEM 34 OPERATOR MIDDLESEX

One year's working knowledge of OCL is required for this two shift site on the Middlesex/North West London border. The salary for this position is £7,500.

#### ANALYST PROGRAMMER ESSEX c.£10,000 + RELOCATION

Extensive 1100 series experience. COBOL essential. New installation offering generous relocation and lease car. G7872

#### ANALYST ESSEX

To £13,000 Outstanding opportunity for Analyst in late 20s with RPG II/III background. New GSD installation. G8053

#### ICL ANALYST/ DESIGNERS/ CONSULTANTS LONDON

c.£10,000 Software House currently seeking ICL skills particularly in the IDMS, TPMS, DDE area. Would be interested in meeting you. G8033

#### TEAM LEADER LONDON

c.£10,000 Six years' DP with at least two Team Leader level, IDMS, DDS, REPORTMASTER, QUERYMASTER. Degree or professional qualification preferred. G7529

#### SENIOR EDI AUDITOR SURREY

c.£14,000 Responsible for the planning, performance and supervision of EDI and related operational audits. Effective communicator at all levels. G8054

DataScene is part of the MDA group and has been established since 1975. Our business is Permanent and Contract Recruitment. We currently have internal vacancies for the permanent side as follows:

### ICL POSITIONS

#### 2900 OPERATORS LONDON & HOME COUNTIES

Get on the VME Bandwagon! We have several positions with companies operating VME already or who have definite plans to go to VME in the near future. Salaries are up to £10,000 with various company benefit schemes.

#### ME29 OPERATOR SURREY

Due to promotion to programming, this site on the Surrey/South West London border require an operator with one year's ME29 experience. Work two shifts and earn up to £8,000.

#### 2903 OPERATOR W. SUSSEX

Due to relocation an experienced 2903 operator is required by this site which will shortly be upgrading to an IBM 38. Good prospects and a salary of £8,000 are on offer at this days-only site.

#### OTHER POSITIONS

#### NCR OPERATOR CITY

Good VRX is needed for a leading foreign bank. A subsidised mortgage is one of the benefits as well as a salary of £8,000.

#### YOU CAN BANK ON PDP

Two banking organisations require operators with 18 months' AIMS or RSX 11M to work in the City or Surrey. Normal bank benefits and salaries of up to £8,000 will be paid.

## JOBS IN SCOTLAND

Keith Holder finds the Scots accent is an experience

Not only does Scotland have some justly famed scenery - this is Ullapool - but a thriving computer community.

## It takes a keen eye to spot a job North of Border

ANY casual observer of the appointments pages could be forgiven for thinking that Scotland offered no prospect of employment at all. This is not the case, and while the country may not be brimming over with unfilled vacancies it does support a thriving computer community.

This has developed into an efficient grapevine which can often pre-empt vacancies and prevent them from reaching outside other than in token advertisements.

Military systems companies are doing well in Scotland and this is reflected in a higher percentage increase in vacancies over other areas of the market.

Among the companies supporting this trend are Marconi and Ferranti though even here, finding a job is not simple. A spokeswoman for Marconi said: "We are looking for people, mainly analysts and programmers, with three to four years' experience and with a mainly manufacturing or financial background."

Companies such as Distillers, which has its group headquarters in Glasgow, confirmed this. A spokesman said that it was important to hire people who would be useful from day one; they also tried to offer a limited number of places to recently qualified people.

Brown, on the other hand, thinks that while a large number of these industries are using computers, they are particular about getting qualified staff and rarely are prepared to look at anyone else.

One area which seems to be winding down its recruitment is the oil and gas industry, which now recruits on a demand basis. In keeping with other industries, this tends to be more infrequent than in other areas of the UK.

The range of computers used by Scottish industry is wide, even within some of the larger organisations and high technology industries. John Duncan of Ferranti said: "We have a requirement for people to work on a number of different machines ranging from Apples and PCs right up to the bigger mainframes."

Staff requirements can, he said, fluctuate at the lower end of the spectrum depending on how many small projects are running, but is almost static for staff on larger systems.

Salary levels, according to Dunwoodie, hold up remarkably well against those in other areas of the UK including the south-east and London. But this does not mean any special advantage as the cities, particularly Edinburgh, are quite expensive places to live.

In conclusion, the general consensus is that though far from being non-existent, job opportunities have to be actively searched for. They do exist in numbers for those already qualified in software and data processing, mainly in manufacturing industries and defence-related projects.

This is particularly true for more senior positions such as DP managers and operations managers.

According to nearly all companies questioned, the senior positions tend to become vacant very rarely and are usually filled by headhunting from rivals. Here again, the local group grapevine is

very effective, creating a pretty determined

## ELECTRONICS (DATA COMMUNICATIONS) REPAIR ENGINEER

### MOTOROLA INFORMATION SYSTEMS LTD.

require an electronics repair engineer (in-house) in their repair department for the repairing, diagnostic and remedial work on data communications equipment.

Candidates should preferably have experience of both digital and analogue circuitry and experience in the repairing of microprocessor-based equipment would be an added advantage, as would background experience in computers, computer peripherals or data communications.

Applicants with HNC, C&G final or comparable qualifications or can demonstrate progress in studying for such qualifications will be considered, as will engineers with experience in computer game repairs.

Generous salary and overtime offered with benefits including private health plan, pension scheme, life assurance, 20 days annual holiday.

For application form please write or telephone Miss S. J. Sewerin, Personnel Officer, MOTOROLA INFORMATION SYSTEMS LTD, 114/116 Thornton Road, Thornton Heath, Surrey. Tel: 01-689 2101.

 **MOTOROLA**  
INFORMATION SYSTEMS LIMITED

Ferranti Computer Systems Ltd.

### Senior Software Designers and Software Engineers

required with a minimum of five and two years respectively in Real Time Computing. Experience in Process Control applications desirable. The positions will involve specification and design of software for Ferranti Argus 700 systems.

Salary: £7,500-£12,000.

Contact Mr P. Whalley,  
Ferranti Computer Systems,  
127 Causewayend,  
Aberdeen

**JOBS IN THE SOUTH**

Southern England has more jobs on offer than most areas – but only for experienced people, says Caroline Burgess

# Recession has made employers choosy

Dover docks, the gateway to England – and to a region that has fared better than most in the recession.

increasingly important.

"Over the past 18 months employers have become much more fussy. They have a blueprint of who they want. It is a far more critical approach," said Lee Walkinshaw, managing director of Computer People South. "For people without experience it is a desperate story."

Bournemouth branch of Abbey Life Assurance is currently trying to recruit 40 analysts and programmers, representing about a 25% increase in its data processing staff. But the jobs are all open only to those with industry experience – at least five years for analysts and two years for programmers.

"We have no training facilities so we do not take on people without experience," said Melanie Dyball, Abbey Life technical recruitment manager.

But she admitted: "We do get a lot of applications from people without experience."

The principal effect of this stand by employers is that there are not enough trained people to go around, leaving many vacancies

unfilled, while there are plenty of hopefuls trying to get a start in the industry.

"There is a lack of people with real time skills – they could all be placed tomorrow. People such as experienced system programmers remain like gold, especially as some demand unacceptable salaries," said Walkinshaw. "But employers are still holding out so jobs are being filled by contract staff."

As for the plight of inexperienced people, Johnson said: "A few years ago in the south, people straight from Tops courses

could get jobs, but now it is different. We sometimes test 50 applicants for two or three jobs. We may get 200 replies to an advert for one job, which we then have to sift through and compile a short list."

The recent boom in the microcomputer market has had its effect on the types of jobs available. "The demand for operators has gone down dramatically over the last three years," said Johnson. "As more and more people are going for minis and micros they are moving over to the package approach and modifying it."

Companies appear to be building up their computer staff rather than just replacing those that leave. Most consultancies recruiting staff for the south reported a definite upturn in the market over the last three to six months.

"Recruitment is a problem.

Employers are now far more

choosy who they take on. They know exactly what they want – and are prepared to hold out for it.

The result, in computer personnel recruitment, is plenty of jobs for experienced people. But for those without it the picture is bleak.

"Employers used to be prepared to train, but now they want results from day one," said Colin Johnson, managing director of a recruitment agency based in Brighton.

He added the argument that over the last few years, as the price of hardware has been coming down, the cost of people has been rising, making staff productivity

## Analyst/Programmer

c. £11,000

The British National Oil Corporation is responsible for marketing over half the total crude oil production from the UK sector of the North Sea, acquired through participation agreements and other arrangements with producers. The Computer Services Section is responsible for the implementation of computer-based systems and their operation.

Following the installation of an HP3000, the Corporation is seeking to recruit an Analyst/Programmer to join a small team involved in the development and enhancement of a wide range of systems, using not only conventional programming languages but also specialist software in such areas as financial modelling, data dictionary/repairs and data entry.

Applications are invited from graduates who have at least three years' experience of computer programming. Preference will be given to those with a knowledge of COBOL and/or the HP3000 series of computers.

A salary in the region of £11,000 will be offered to the successful candidate. In addition, the Corporation provides a wide range of benefits such as free BUPA membership, 5 weeks' holiday and a subsidised staff restaurant.

If you are looking for greater involvement in systems analysis and wider application experience, write for an application form, quoting reference (APIEN/CW) to: The Personnel Manager, The British National Oil Corporation, 29 Bolton Street, London W1P 8BN. Tel: 01-408 1840 ext 3231. Applications should be received by Friday, 11th November 1983.

**The British National Oil Corporation**

## SYSTEMS & PROGRAMMING

### SYSTEMS PROGRAMMERS

#### LONDON AND HOME COUNTIES

£13,000 + 2-litre CAR

Leading independent support company seeks to recruit several Systems Programming professionals to service their rapidly expanding client base. Excellent rewards and career prospects. Candidates must have a minimum of two years' OS/MVS systems programming experience.

Ref: T2055

### SENIOR PROGRAMMERS

#### CENTRAL AND GREATER LONDON

to £12,000 + CAR

Several self-motivated COBOL professionals are required by this well-established software house to work on a variety of projects at their prestigious client sites. Applicants should have a minimum of two years' COBOL experience.

Ref: T1984

### IBM COBOL PROGRAMMER

£9,000-£13,000

International insurance company embarking on major development projects requires two IBM COBOL programmers with 18 months+ experience utilising VM/CMS or CICS. This is an ideal opportunity to gain expertise in the financial sector in pure development role.

Ref: M2238

### IBM COBOL ANALYST/PROGRAMMERS

£9,000-£11,000

Due to further computerisation of their financial systems, this Essex-based manufacturing company has a requirement for IBM Analyst/Programmers. Applicants should possess 18 months+ COBOL programming expertise; exposure to on-line development techniques is preferred although the company is willing to train successful candidates in CICS, OS/VS and Analysis. Excellent career prospects and the opportunity for some overseas travel.

Ref: M2100

### DEC COBOL PROGRAMMER

£9,000-£11,000 + MORTGAGE

Prestigious financial organisation is seeking a Programmer with two to four years' COBOL experience, to include at least 12 months in a DEC PDP environment. Good long-term prospects and the opportunity to work on interesting development projects. Full range of attractive benefits including MORTGAGE subsidy.

Ref: P2243

### RPGII PROGRAMMER

£9,000 + MORTGAGE

If you have 12 months' experience on System 34 and are seeking a more rewarding position, then this may be the career move for you. The successful candidate will be involved in the development of international banking systems. Occupational: diverse travel. Normal banking benefits including subs. MORTGAGE Ref: M2229

## SALES PROFESSIONALS

### EUROPEAN SALES MANAGER

B'ham or London to £30K

Our client is a leading manufacturer of 16 bit MICRO SYSTEMS with an enviable track record in the UK. Due to the launch of a new and unique product range there is a golden opportunity for a forceful, energetic sales professional with a solid mini/micro background. Ideally, the successful applicant will have had recent European experience and be conversant with another language. Preference will be given to applicants who are used to appointing and motivating major distributors or OEMs. This is a rare opportunity which will appeal to an accomplished and ambitious sales professional. Base salary and guarantees are negotiable and whilst there is no real ceiling on total earnings, the right candidate will easily achieve between £25K and £30K during the first year.

E. Midlands to £28K

This is a key position with one of the most respected and successful UK MULTI-USER MICRO suppliers. Responsibilities will include managing existing major accounts, controlling a small but expanding dealer network and constructing a UK sales team. The chosen candidate will be technically competent, have a strong business background together with the necessary flair and energy to keep the company ahead of its competitors. In return this position offers genuine scope for a directorship and the benefits are those expected from a true market leader. The remuneration package includes a negotiable guarantee, a choice of car and if necessary, a generous relocation allowance will be provided.

### UK SALES MANAGER

London to £20K

One of the UK's fastest growing software companies specialising in PERSONNEL SYSTEMS is seeking a top flight sales professional to manage major accounts and dealers. Reporting to the Marketing Director the successful applicant will be expected to assist at exhibitions and seminars, work to agreed budgets and ultimately develop and manage a small but select sales team. This position will best suit a self starter with sufficient drive to justify a senior management position within a progressive organisation. Realistic first year earnings will be between £18K and £20K and given the required level of success, the appointee can look forward to a main board position within two years.

Interviews will be held in London and Birmingham.

Call Vic Chivers on 021-455 7811 (office) 0905 353246 (home) or send full CV to: Search Dynamics Ltd, Edgbaston House, 3 Duchess Place, Hagley Road, Edgbaston, Birmingham, B16 8BH

## IN THE NORTH ...

Lorien's experience, range of positions and ability to match applicants to the right job is exceptional.

We offer a highly professional and committed service enabling us to work as equal partners with both you as an applicant, and our clients throughout the North.

We like to think your interests are very much ours, and to offer that little extra. The positions shown here are a small percentage of the hundreds of appointments we are currently handling, so please telephone for more details and help us to help you.

### CONTACTS:

For the North West: John Levina on (0532) 455911, or (0532) 785825 evenings & weekends.

For the North East: John Mason on (0532) 455911, or (0532) 486967 evenings & weekends.

### Programmer

to £50,000

You will need at least 2 years C/III/I, gained on any hardware, for this key position with a national organisation. You will work on the latest UNIVAC mini hardware and will assume responsibility for supporting remote sites.

### Programmer/Analyst

to £10,000

This dynamic System 38 installation is seeking an experienced Programmer/Analyst with a minimum of 2 years RPG II experience. Any knowledge of RPG III would be a plus but is not essential.

### Senior Programmer

to £9,500

Programmers with a minimum of 2 years mainframe COBOL can expect rapid progression with this major company. You should have a good academic background and ideally thorough knowledge of PL/I and Database Systems.

### Analyst

to £9,500

This rapidly expanding company is seeking to strengthen its development team and now needs an Analyst with a good commercial systems background. You should have seen projects through to completion.

Any experience of developing micro based applications is an advantage.

### Programmer/Analyst

c.£9,000

Around two years RPG experience on System 34 is sought by this major company with ambitious systems development plans. Ideally you should have analysis experience however this is not essential as training will be provided.

### Programmer

c.£8,000

This small department is seeking a flexible programmer with good ICL COBOL who can rapidly make an effective contribution. Knowledge of DME, IDMS or COMMS MANAGER would be a plus but is by no means essential.

### Programmers & Analysts

to £10,000

Excellent opportunity for experienced Programmers and Analysts with PL/I and database to join a major company who have two IBM mainframes. Knowledge of MARK IV, ASSEMBLER or COBOL, an added advantage in a progressive data processing department which offers excellent career prospects.

### Programmers

to £9,000

Several openings are available in these areas for COBOL Programmers with any of IBM, ICL or UNIVAC mainframe experience. CICS or database would be an added advantage.

Lorien Computer Services Ltd., Recruitment Consultants, OCS House, Servia Road, Leeds LS7 1NJ.

Tel: Leeds (0532) 455911

## UNIX AND 'C' Your passport to the U.S.A.

If you have a degree and at least six months' Unix and 'C' experience then our client, a top U.S. consultancy, would like to hear from you.

We are looking for programmers and systems programmers who wish to utilise and expand their skills in an environment at the forefront of Unix development. In return we offer permanent positions with a salary range of 35,000 to 45,000 dollars.

Live and work in New Jersey where you get the benefits of a picturesqure non-urban location

## JOBS IN WALES AND THE WEST COUNTRY

The health of the Welsh industry is rapidly on the mend as new complexes spring up, reports Jacqueline Moore

**EXPANSION** is perhaps not a word automatically associated with industry in Wales while current economic conditions persist. Principal fields of employment, such as the steelworks or coal pits, have suffered from the effects of the recession, or from overworking respectively.

Other traditional industries — fishing, tourism, farming — have suffered the same difficulties. Consequently, unemployment has neared its worst levels in the Principality.

Nevertheless, some companies in Wales are prospering and recruiting extra staff. The computer industry, in particular, is an example of a relatively stable and in some cases increasing source of employment.

Software house Target Computer Group is "expanding rapidly and taking on more staff", according to general office manager Simon Royal.

Cardiff is the base for Target's headquarters. It has about six offices in total, with the other major office located in Manchester.

Royal said that the company had recruited four programmers and one project manager recently — four of whom were taken on at the Cardiff office.

Target usually looks for recruits who meet some specific need, normally with particular relevant experience. "However, there is some scope for trainees," said Royal.

Students from Tops courses have met with success at Target. "We've taken on a couple in the past," he said, "who were quite exceptional. They quickly grasped the job, had up-to-date knowledge of the industry, and understood it."

Royal concluded: "We've had such remarkable success with Tops, we're happy to recruit along those lines."

North and South Wales have always had two distinct characters. The large industrial towns of the

The Edwardian fortress at Conway — a landmark in the Principality where new technology is spearheading a revival.

## The hillsides welcome new technology firms

south, like Swansea and Port Talbot, contrast with the hill farms and generally small fishing villages of the more sparsely populated north.

Access to North Wales from London, often an important factor for growth, is not easy and consequently expansion is taking place at a slower pace.

"Once people have got a job," he said, "they've stuck to it."

North Wales is, however, due for some development as far as new technology is concerned. Last month, the Welsh Development Agency announced that it was to set up two 60,000 sq ft complexes

in Newport, Gwent, in the South, and in Deseide in the North. Newtech, a company which develops software for BBC micros, has booked 20,000 sq ft of space in Deseide Park already.

The health of the Welsh computer industry, therefore, seems to also be emerging.

Bru Grinter, programming manager at Westland Helicopters in Yeovil, Somerset, which has over 100 commercial and scientific analysts/programmers, said that the company had been

room for expansion. They seem to have found this in the west, and that, combined with the easy access to London along the M4, has made it a spawning ground for dozens of new companies.

A pattern of growth or stability among the already-established companies in the West Country is also emerging.

The counties on the other side of the Bristol Channel from Wales, which make up the West Country, have also found life fast-moving.

Companies are constantly drifting away from the high rates and limited space in London to find

"growing steadily over the past seven years".

Recruits at Westland, he said, were mainly trainees, both graduates and TOPS students. Training was on the job and, he said, recruits were expected to be doing real work in two to three months, depending on the individual.

In the next door county of Avon is the old trading port of Bristol. The city seems to be set for growth again after some difficulties over the past few years.

Gordon Morris, assistant manager for the council's Avon and Bristol Computer Unit, said that there were no vacancies at present, but "it tends to remain a bit unpredictable".

He also said: "It's quite possible that there will be some expansion, but there's no definite indication."

Although there are no vacancies at the moment, there are no redundancies planned either, a good sign. There are about 100 data processing staff employed.

Earlier there had been reductions in the data preparation area, but that was now levelling out, according to Morris.

If there is expansion, Morris said he would ideally take on graduates with relevant experience to be analysts/programmers. He added, however: "We want people with potential, and who are adaptable and keen to get on, not necessarily graduates."

The Avon and Bristol Computer Unit would only consider taking on trainees when it was up to strength, he said. It might then replace someone junior.

"We have done this internally over the past few years," said Morris. "Some ex-operators have been re-trained as programmers, but we can't do this too often."

The unit in Bristol, like the Target Computer Group in Cardiff, has also recruited some ex-Tops students. "We've taken on two, one of whom is still here," said Morris.

## BAHAMAS

### Generous Tax-Free Salary Package

#### ICL Systems Design

#### SENIOR PROGRAMMER/ANALYST

£9,060-£9,660

We are looking for a versatile man or woman with at least three years' experience in designing, programming and installing systems on Honeywell Level 64 DPS 2 equipment to join a small team working on a variety of established and new financial applications.

This opportunity will exist for assistance with installations. Ruby is a pleasant country-side in the heart of England with easy access to all parts of the country via road and rail links. Relocation expenses (up to £1,000), possible Council housing. Salary within scale S01.

For an informal discussion, telephone Richard Freeman (ext 309), Application form and job description available from the Personnel Unit, Chief Executive's Office, Town Hall, Evesham CV21 2LB. Tel: Rugby 77177, ext 4234/44.

#### LONDON BOROUGHS OF BRENT AND EALING JOINT COMPUTER INSTALLATION

#### SENIOR SYSTEMS ANALYST

Based at ACTON TOWN HALL  
£11,961-£13,005 p.a. incl.

Systems and Programming Staff are organised as project teams, each team being responsible for a designated area of the Council's activities. These posts are new and will report to the project manager.

Successful applicants will be involved in and need experience of systems investigation and design, production of program specifications, system testing and implementation of new and existing systems.

The installation has an IBM 3083 running under VM and DOS/VSE, software includes CICS, DL1, Easytrieve, on-line Librarian, APL/MANTIS, etc.

Please quote reference: 048 FD.

Closing date: 18-11-83

Applications for obtainable from the Personnel Officer, Room A204, Town Hall Annex, New Broadway, Acton, Middlesex UB1 2AA (24 hour service).

AB Executive (Bristol) Ltd.  
Tel: (0272) 426631

#### CITY POLYTECHNIC OF HONG KONG

The Hong Kong Government has appointed a Committee to plan the establishment of a Polytechnic in Hong Kong. To be named the City Polytechnic of Hong Kong, the institution will have an initial intake of approximately 8,000 full-time students by early 1980s and a planned capacity for an ultimate population of 13,000. The Polytechnic expects to be able to enrol its first students in Autumn 1984.

It is intended that the new programmes should be designed on a modular structure with a strong vocational element. The courses will be at Foundation and Higher technical levels, and a substantial number will be day-release and evening courses.

There will also be degree programmes, although the number of students on such programmes will not exceed 30% of the total student population.

The Planning Committee has appointed a Director, Associate Director and Head of Department levels. Some of them are already in post. Meanwhile, applications are invited for the following posts:

At Head of Department Level:  
Heads of the following initial administrative departments:

HEAD (COMPUTER CENTRE)  
Ref. No. CP/CC/001/83

To be responsible for the development and operation of the Computer Centre.

MANAGEMENT INFORMATION OFFICER  
Ref. No. CP/MIO/001/83

To be responsible for the development and operation of a Management Information Unit.

The function of this Unit will to collect information from a variety of sources on all aspects of Polytechnic activity, to rationalise methods of data collection and analysis, and to produce, to a high standard, management information for planning purposes.

The Heads of administrative departments will be expected to work in conjunction with three Associate Directors (Academic Planning, Resources Planning and Administration) and to ensure that the administrative systems provide a proper framework for planned academic and administrative development.

At Principal Lecturer/Senior Lecturer/Lecturer Level:

DEPARTMENT OF COMPUTING STUDIES  
Ref. No. CP/COMP/002/83

Specialist Areas: COBOL, PASCAL, AS/400, 8th generation languages, Database, System Analysis and Design, Numerical, Optical Applications areas: Finance, Accounting, Banking, Marketing, Manufacturing, Process Control, Education, Engineering and Management.

Successful candidates are expected to assist the Head of the Department to plan, develop and administer new programmes and courses, particularly up to degree level; and to teach in their specialist areas. Personal research will be encouraged. Preference will be given to candidates with a successful research record.

Heads of Departments

Principal Lecturer  
Ref. No. CP/PL/001/83

Senior Lecturer  
Ref. No. CP/SL/001/83

Lecturer  
Ref. No. CP/L/001/83

Within a range but not less than HK\$277,200 p.a.  
HK\$266,880 - HK\$269,320 p.a.

HK\$176,320 - HK\$228,360 p.a.

HK\$84,440 - HK\$181,120 p.a.

(1) HK\$12,800 - Starting equivalent as of October 12th, 1983

Terms and Conditions of Service:

For Headship posts, the initial appointment will be made on fixed-term contract of four years, the first of which a grant-in-aid of 25% of salary will be paid. The whole contract period will be paid at the same rate.

For Principal Lecturer/Senior Lecturer/Lecturer posts, appointment will be made initially on two-year annual basis. Contracts will be renewed annually at a grant-in-aid of 25% of salary received over entire contract period. Benefits include long leave, substantial pension, medical and dental benefits and, where appropriate, children's education allowances and term leave.

For all posts, gratuity will be paid at 25% of salary received over entire contract period.

Modulation for overtime, additional benefit and, where appropriate, children's education allowances and leave arrangements.

Applications: Application forms and job specifications are obtainable from the Associate Director, Computer and Information Services, Gordon Beadle Building, London WC1H 9AE, United Kingdom. Tel: 01-580 6641. Tel: Sheung Wan Post Office, Hong Kong, by Association of Commonwealth Universities (Asia), 100 Gloucester Road, London SW1V 4JL. One additional copy should also be lodged with the Association of Commonwealth Universities, London WC1E 6BT, United Kingdom. Applications should be accompanied by a self-addressed envelope, in response to the previous address given. Interviews will be held in Hong Kong in January 1984. The recommendations of the selection committee will be forwarded to the relevant authority in Hong Kong.

Tangent means success in the software world. Tangent is a successful and growing international Software House. We have built an enviable reputation since our formation in 1974 and our services are in high demand by many major commercial organisations worldwide. In the UK we have recently opened new offices in London and Brentwood, Essex. In America, where we have been established for some years, we have recently opened branch offices in Texas and Florida.

Against this background of success, we now wish to increase our strength both in the technical and in the sales areas. We are looking to recruit experienced computer professionals who are seeking a challenging future. There are many fine opportunities now available with Tangent for career progression.

# FOR MORE SUCCESS IN YOUR SOFTWARE CAREER-JOIN OUR TANGENT TEAM- UK AND OVERSEAS.

## PROJECT DEVELOPMENT

Our Project Group undertakes fixed price projects on our own in-house hardware, IBM System 34 and imminently IBM System 38 and Hewlett Packard 3000.

### Project Leader & Programmers - HP3000

We wish to recruit a Project Leader and several experienced HP3000 COBOL Programmers to form a new project team who will be starting a major new project in the immediate future.

Experience with MM3000 is essential, a knowledge of IMAGE, QUERY and VIEW is desirable.

### Analyst Programmers - HP3000 - Insurance

We are seeking people with knowledge essentially of IMAGE MPE. Experience of SPL would be advantageous. Initial assignment would be in NEW YORK and subsequently in the UK.

### Analyst Programmers - IBM Financial Packages

Our product range covers 34, 36, 38 mainframe. We are prepared to retrain and will consider IBM mainframe experience with CICS or IBM System 38. These positions will entail travel in the UK and probably to the USA and Europe.

## SOFTWARE PRODUCTS

The Division provides skilled consulting Systems and Programming staff to work on client locations in the UK, Europe and the M. East. Our consultants are of a mixed discipline, combining both permanent and contract staff. We are now wishing to expand our permanent technical staff and to hire the following people:

### Programmer - Analyst HP3000

We are seeking experienced HP3000 COBOL programmers with a good knowledge of either RAPID or IMACS to work on-site for a major client based in London.

### Sales Account Executive - West London Area

We would like to recruit an ambitious Sales Executive to strengthen our current Sales Team and assist us with our target of considerably expanding our market share during 1984. Ideally we seek someone with experience in a similar environment, Software House etc., and proven sales ability. We envisage the successful candidate will assume responsibility for the West London area and Western Home Counties.

## PROFESSIONAL SERVICES

Tangent offers an attractive package which includes:

- \* excellent salaries
- \* non-contributory pension
- \* comprehensive medical and insurance scheme
- \* company car after six months.

To find out more, telephone Susan Buchan on Brentwood (0277) 255765 (24 hour answering service). Or write to Tangent Computer Services Ltd, Fairfield House, Fairfield Road, Stanwell, Essex CM14 4LR.

SUCCESS IN THE SOFTWARE WORLD

## Cobol - User Liaison Programmers and Analyst/Programmers

£9,000-£13,000

Central/West London  
Our client currently in the early stages of development of several large CICS and Database projects has several exciting openings for COBOL Programmers and Analyst/Programmers. Programmers will be able to offer around 18 months' COBOL experience preferably gained in an IBM DOS/VSE or DOS/VSE environment. Analyst/Programmers will have gained some exposure to design and development of on-line systems. Candidates should be keen to join a progressive on-line database environment and should enjoy working closely with Users.

## RPGII . . . Learn RPGIII

Central London

An excellent opportunity exists for a young RPGII programmer to progress to an Analyst/Programmer role and be trained in RPGIII and IBM System 38 techniques. The successful candidate will join a small and friendly team within the large data processing department of this established and internationally renowned banking organisation. The emphasis will be on financial systems development. However, previous experience of banking systems is desirable but not essential.

## Business Systems Analyst

£11,000-£13,000

West London  
An expanding and well-known commercial organisation utilising an IBM 4331 mainframe running under DOS/VSE using CICS and DL/I is seeking to recruit two additional analysts. Future projects include the design and development of various financial, commercial and marketing systems and the successful applicants will be responsible for analysing business and data processing requirements and introducing the relevant computer systems and hardware. Upwards of three years' data processing experience with relevant business skills is required together with excellent user communication skills.

01-434 2042

**dp SELECTION SERVICES**  
A member of the DP Selection Group  
7 Swallow Street, London W1R 7HD

"We look forward to hearing from you."

To apply for these positions either write or telephone DP Selection Services quoting the appropriate reference.

## International Banking

A leading American International Bank, operating Transaction Processing and Communications Systems based on DEC VAX11/780s and micro computer networks has the following opportunities.

### Systems Programmer

to £10,000

A self-motivated programmer, with experience of DEC VAX-VMS or PDP11-RSX11, will supplement a small team involved in:-

- \* developing and maintaining communications systems installed in Europe and the U.S.
- \* maintaining operating systems in European branches.

### Junior Programmer

to £8,000

A young programmer, educated to 'A'-Level standard, will supplement a small team working with AIMS: previous experience in a similar environment is preferable, but training will be given where necessary. Ref: JP15153.

In addition to the negotiable base salaries, benefits will be offered including bonus, special mortgage facilities where applicable, free lunch and a full range of generous fringe benefits.

Please apply in confidence quoting the appropriate reference.

All applications will be forwarded unopened to our Client, unless you list companies to which you do not wish to apply in a covering letter marked for the attention of the Security Manager.

# OPERATIONS ANALYST

up to £12K (under review)  
Dover

If you seek a stimulating and varied career come on board Britain's most progressive ferry company.

Townsend Thoresen, part of the European Ferries Group, has been voted Britain's top ferry company for three successive years and last year achieved the accolade of top transportation company. This success has led to a major expansion of the group's computer activities, based in Dover.

An integrated on-line reservations system is in operation with terminals throughout the UK, France, Belgium, Holland and Germany. This system also hosts an interactive agency Viewdata system utilising Prestel Gateway.

Operations are based on twin ICL 2966s. The service is provided 24 hours per day, 365 days a year. The Viewdata system is front-ended by a Modcomp Classic configuration.

An Operations Analyst is required to assist in the growth and expansion of the computer services centre. Applicants should have several years' experience in a large ICL 2966 environment, running on-line systems and interactive development under the VME operating system. Experience, additionally, should include operations supervision and network control, operational support, development and operational analysis from within a 'service centre' environment.

This position offers an excellent opportunity, highly competitive salary and a benefits package which includes concessionary travel and a pension scheme.

Please apply with full c.v. to Derek Weaver, Senior Personnel Officer, Townsend Thoresen, Enterprise House, Channel View Road, Dover, Kent CT17 9TJ.

(6472)

**TOWNSEND THORESEN**

**Ireland:**  
the island of saints and scholars, programmers, systems programmers, DDP and office systems specialists.

IBM has been involved in Ireland's technological development for the past 27 years. We have over 350 people working with us and our revenue has doubled in the past five years.

With the establishment of an International Software Development Centre in Dublin earlier this year - IBM's third such centre in Europe - we are currently producing software for internal use by our sister companies in Europe, the Middle East and Africa. This Irish centre is working in strategically important areas:

- Distributed Data Processing
- End-user Productivity Aids
- Personal Computing
- Information Centre Facilities
- Office Systems

We are now looking for a team of bright, enthusiastic people who will shape the future of this new centre. If you have experience in any of the areas mentioned and have worked extensively with IBM hardware and software, then write to us giving details of your qualifications and experience.

You don't have to be a saintly scholar - just someone who likes a challenge!

Write to: The Personnel Manager, IBM Ireland Ltd., 2 Burlington Rd., Dublin 4, Ireland. Tel. Dublin 785344

## PLAN YOUR CAREER WITH PRESCOT

**England**  
**Australia**  
**New Zealand**  
**South Africa**  
**Zimbabwe**

Careful planning often makes the difference between the successful and the not so successful computer career. Prescot Computers understand this because we specialise in overseas computer recruitment, and the selection for an overseas post requires extra care by Prescot, employer and employee. We use the same principles of care whether UK or overseas employment is involved:

We wish to interview: Programmers, Systems Analysts, Analyst/Programmers, Consultants and Sales People for a broad range of clients in England and overseas. Salaries range from:

**£7,000 to £20,000 p.a.**

If you are interested, why not telephone us on 01-836 8885 for an informal discussion. Alternatively, if you prefer write to:

**Prescot Computers Ltd**

**As a career strategy crossing the Atlantic might be more effective.**

Even in the world of DP, the longest journey begins with a single step. Any move ought to promise the maximum boost to a professional career and not just a hopeful step at improving experience and salary.

For so many British programmers in the past, General Electric Professional Services (formerly LIT) has offered that singularly important step in the right direction. GEPSCO has done this by being able to deliver real career opportunities and the scope for exciting and varied project involvement at the home of D.P.

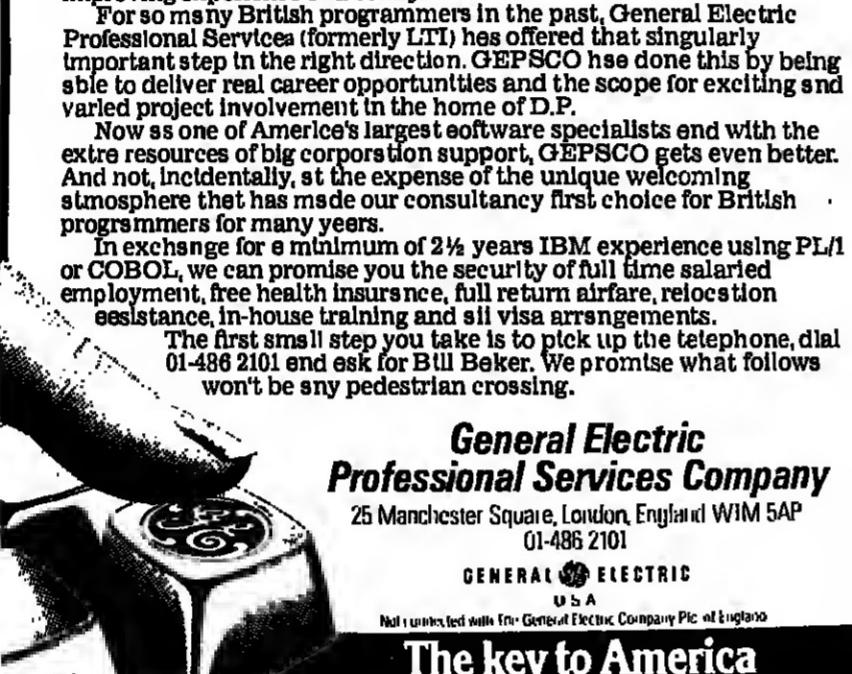

Now as one of America's largest software specialists end with the extra resources of big corporation support, GEPSCO gets even better. And not, incidentally, at the expense of the unique welcoming atmosphere that has made our consultancy first choice for British programmers for many years.

In exchange for a minimum of 2½ years IBM experience using PL/I or COBOL, we can promise you the security of full time salaried employment, free health insurance, full return airfare, relocation assistance, in-house training and all visa arrangements.

The first small step you take is to pick up the telephone, dial 01-486 2101 and ask for Bill Baker. We promise what follows won't be any pedestrian crossing.

**General Electric Professional Services Company**

The key to America

**EXETER COLLEGE**  
Hele Road, Exeter EX4 4JS  
**LI COMPUTING SYSTEMS**

Applications are invited for the above vacancy which will be filled January 1984, or as soon as possible thereafter. Candidates will be expected to fit in to a Computer Services Unit which serves the College as a whole. It is desirable that candidates should have business experience preferably related to micro-computing, and have knowledge of programming in COBOL. Graduates or Professional qualifications in business and/or computing are desirable. Teaching experience would be an added advantage.

Further particulars and application forms from the Principal (FAX please) returnable within 14 days of the date of this advertisement (651).

## Exhibitions are an opportunity to be exploited

FOR those who have never worked at an exhibition, life on an exhibition stand may seem like a soft option, an opportunity for escaping the rigours of the field. For those who have seen it all before, it is an occasion greeted with mixed emotions.

Make no mistake: working at an exhibition is hard work. It almost certainly demands standing around for maybe eight or nine hours a day. A week of that can be exhausting.

Then there is the work itself, sometimes exhilarating, sometimes boring, lots of pressure, lots of time-wasting. It very much depends on factors such as the attraction of the exhibition in general, the product in particular, the influence of external promotion, the quality of the stand, the time of day, and so on.

But like all selling situations, personal and company success can be very much a reflection of attitude. Many sales people approach the exhibition syndrome with a negative frame of mind which reflects "Can I help you?"

It is so very hard to resist the reflex reply of "No, thank you!" even if it is conditioned by the afterthought "- I'm just looking." In some circumstances it is even worse than being ignored. At least being left alone gives you the chance to pace around and perhaps discover something interesting.

Well, there is an answer, and I offer it to you as a gift in celebration of Compec. It is the word "How". All you have to do is add it to the most tried of all "closed" questions and it immediately becomes open ended.

"How can I help you?" adds new dimensions to the introductory question. Why, who knows, the prospect might even start talking about his needs.

There are other negative situations that the visitor inevitably comes across during an exhibition. There's the "We're too busy doing things out the back to come and see you" syndrome. There's nothing worse than calling on an empty stand only to be ignored; despite the fact you know there are people around who apparently believe their out-of-sight activities are more important than prospective clients.

Take the plastic carrier-bag syndrome. Some enthusiastic body confronts you with an armful of plastic bags, each bearing the company legend: "The Superboob Micro - a legend in its own time" (about a fortnight).

"Of course" you say, "thank you very much" also thinking to yourself "just as long as you don't try to sell me anything!"

At which you proceed to empty into it all the brochures you have collected about products you are really interested in, and then proceed on your way with a cheery farewell, never to give a second thought to the wonder of Superboob.

Why does it not occur to those people who cannot resist the urge to give away plastic carrier-bags that it is a waste of getting more value out of the exercise than simply putting their name about?

The first rule is not to flout the carrier-bags.

The second is to select a location well away from your own stand. After all, if they've made it there, your objective is already achieved.

The best rewards are from identifying locations with plenty of traffic, but no overcrowding. People won't stop in a moving crowd.

The third is to use the approach as a means of asking a question which will link your product with any related interest of the visitor.

Nothing is more important than what is actually sold to visitors once they have been engaged in conversation.

That's what I'd like to discuss next week.

Alan Williams

## LAST YEAR OUR SALES EXECUTIVES

EARNEAD AN AVERAGE INCOME OF OVER £40,000

In fact, the top salesman earned over £70,000!

If you look around you will see there are lots of job opportunities for experienced computer industry salespeople, but in reality they are no more than clones of each other, lost in the static survival of the computer establishment or the transient euphoria of micro-computers. Many are acceptable to those already committed to changing employer, but offer little incentive to those successful salespeople who would like to advance their careers if only the risk was not so profound. In contrast, this is one of those truly rare opportunities that must appeal to every accomplished salesperson within the computer industry.

Consider the following facts:

- \* We get so many enquiries, there is virtually no need for prospecting.
- \* We provide highly comprehensive pre-and post-sale support.
- \* Our continual investment in R & D keeps us far ahead of competition.

If you add to this the wide scope for personal advancement within our young and fast growing company, plus typical earnings that are almost double the industry average, and compare it with your present situation, you will surely forgive us for saying this is a very special opportunity indeed.

Success has now created additional job opportunities.

## LONDON and the SOUTH The MIDLANDS, NORTHERN ENGLAND

for experienced and well accomplished salespeople.

Applicants must have significant past or present experience of selling for major mainframes or minicomputer manufacturers, or perhaps a large scale bureau specialising in engineering or industrial applications, ideally with experience of the manufacturing industry. Above all they must have the proven ability to negotiate high value sales at board level within major companies and institutions.

In return we offer on target earnings of £38,000 with a high minimum income guarantee for the first year of employment plus a 2 litre company car and other fringe benefits including health insurance, pension, luncheon vouchers, etc.

Please contact Alesda Scott (London) or Roger Dodd (Midlands) quoting reference WSB/103. This is undoubtedly the best opportunity for advancing your career that is likely to be available for many months to come.
